Football is universal in the values that it protects and proposes, and in its capacity to produce social and economic value, the economic value coming from the professional domain and the social value from the amateur domain. The former is the domain of stars, big events, new stories, victories and outstanding feats of athleticism; the second is the less visible side of the whole movement, the domain of spontaneity, fun and participants of all ages and abilities being together regardless of race, religion, language or the chances of victory or great athletic feats. This book, the result of much study and contemplation on football management, embraces all of these themes, starting with the acknowledgement of the diversity of these two domains and at the same time of their inseparability.

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

Read about sixty-nine years of miracle after miracle. How I survived numerous unimaginable traumas, illnesses, surgeries, mental illness, and suicide attempts. The book begins at age twenty-one, just married, suffered kidney failure, having emergency surgery afterward being pronounced dead, ending up in heaven. My return from heaven finds I am now terminally ill with only a year to live if I do not get pregnant. But God! Also how I, as a little girl, hunted for the God of the "and may God bless" and finding him. See how depending on God brings me to sanity, even supernatural physical healing throughout all my troubles, suffering, responsibilities, and laced with spiritual warfare.

According to the New York Times, Cuba is at an historic turning point. As Cuba catches up with political and economic changes, baseball will inevitably catch up and change as well. In Cuba Loves Baseball, photographer Ira Block, who has spent the past three years photographing the culture of

Cuba through baseball, has assembled more than one hundred images of baseball players of all ages. In doing so, Block helps to preserve baseball's enduring presence in Cuba. The colorful photos cover everything from grass roots baseball to the pro teams, from portraits of old-timers to children playing baseball in the streets, and from exuberant fans at stadiums to vendors selling traditional food before the games. Cuba Loves Baseball incorporates sport with culture in a country that has been "closed" for so many years. It makes the perfect gift for sports fans, people interested in Cuba and travel, men and women who played baseball as children in cities or rural areas, and parents who have children playing baseball now.

Masterful . . . [Thompson] illuminates both the fascinating coders and the bewildering technological forces that are transforming the world in which we live.' David Grann, author of The Lost City of Z Facebook's algorithms shaping the news. Uber's cars flocking the streets. Revolution on Twitter and romance on Tinder. We live in a world constructed of computer code. Coders - software programmers - are the people who built it for us. And yet their worlds and minds are little known to outsiders. In Coders, Wired columnist Clive Thompson presents a brilliantly original anthropological reckoning with the most influential tribe in today's world, interrogating who they are, how they think, what they value, what qualifies as greatness in their world, and what should give us pause. One of the most prominent journalists writing on technology today, Clive Thompson takes us into the minds of coders, the most quietly influential people on the planet, in a journey into the heart of the machine - and the men and women who made it.
