The rapid changes in the economic and political climate of the Balkan and

the Black Sea countries demand continuous adjustments in the mixture of the implemented economic policy in the area. Under this framework, there is a special interest to investigate the impact of the global economic reality in these economies, the importance of their integration in the European Union, as well as the foundation of various regional organizations that host many countries of the specific area. Taking into

consideration the current developments within the European Union, the economic crisis that strikes the peripheral EU countries and the dispute over the credibility of the euro currency, economists need to enhance the effectiveness of regional development, to underline the value of FDI and entrepreneurship of the countries of the Balkan and the Black Sea, to assist the bank sector in order to support the level of productivity, to control the financial flows with the help of auditing

structures and to exploit human resources in order to achieve economical reforms in these countries. The current volume approaches, among others, the above matters and aspires to contribute to the further investigation of the possibilities and the perspectives of the economies of the region. In the current technological world, Web services play an integral role in service computing and social networking services. This is also the case in the traditional FREG (foods, resources, energy, and goods) services because almost all traditional services are replaced fully or partially by Web services.

Handbook of Research on Demand-Driven Web Services: Theory, Technologies, and Applications presents comprehensive and in-depth studies that reveal the cutting-edge theories, technologies, methodologies, and applications of demand-driven Web, mobile, and e-business services. This book provides critical perspectives for researchers and practitioners, lecturers and undergraduate/graduate students, and

professionals in the fields of computing, business, service, management, and government, as well as a variety of readers from all the social strata. *International Perspectives* IGI Global

Interest in Financial Services Marketing has grown hugely over the last few decades, particularly since the financial crisis, which scarred the industry and its relationship with customers. It reflects the importance of the financial services industry to the economies of every

nation and the realisation that the consumption and marketing of financial services differs from that of tangible goods and indeed many other intangible services. This book is therefore a timely and much needed comprehensive compendium that reflects the development and maturation of the research domain, and pulls together, in a single volume, the current state of thinking and debate. The events associated with the financial crisis have highlighted that

there is a need for banks and other financial institutions to understand how to rebuild trust and confidence, improve relationships and derive value from the marketing process. Edited by an international team of experts, this book will provide the latest thinking on how to manage such challenges and will be vital reading for students and lecturers in financial services marketing, policy makers and practitioners. *Impacts of ICT and CRM* Academic Conferences Limited

This book highlights recent research on Intelligent Systems and Nature Inspired Computing. It presents 212 selected papers from the 18th International Conference on Intelligent Systems Design and Applications (ISDA 2018) and the 10th World Congress on Nature and Biologically Inspired Computing (NaBIC), which was held at VIT University, India. ISDA-NaBIC 2018 was a premier conference in the field of Computational Intelligence and brought

together researchers, engineers and practitioners whose work involved intelligent systems and their applications in industry and the “real world.” Including contributions by authors from over 40 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering. **Intelligent Systems Design and Applications** DEStech Publications, Inc Banking Theory and

Practice covers the entire gamut of topics in the field of banking—from its evolution to the latest trends. The Indian banking system is undergoing unprecedented changes as a result of new legislations and reforms in response to the contemporary needs. The present edition has kept pace with these developments, including the changes in legislation, growing globalization of banking, as well as the expansion of the banking business to meet the

needs of customers for a wider range of services. The book, which was initially aimed to serve the needs of undergraduate students, has over the years deepened and widened in both scope and contents. It is now an essential resource not only for undergraduate students, but also for professional bankers and those who pursue more advanced and practically oriented studies on the subject.

In recent years,

information and communication technologies (ICTs) have gained significant importance and become vital to the operations of both organizations and individuals. However, there are numerous factors that have affected the adoption of ICTs including access and accessibility barriers, political participation, and social empowerment. This has attracted the attention of researchers who are interested in

understanding the socioeconomic influences of ICT adoption and how these technologies impact the infrastructure of modern organizational activities. Recent Developments in Individual and Organizational Adoption of ICTs is a collection of innovative research on the methods of organizational and infrastructural advancement through the application of information

and communication technologies. While highlighting topics including internet banking, supply chain management, and e-government services, this book is ideally designed for managers, researchers, policymakers, politicians, business practitioners, educators, decision scientists, strategists, and students seeking current research on the socioeconomic impact of ICT adoption.
