 Past imperfect Stranded in Ancient Egypt at the end of the STARGATE SG-1 episode Moebius, Jack O'Neill, Sam Carter, Teal'c and Daniel Jackson are enjoying the simple lives they've forged in

the years since Ra was driven from Earth. But life never stays simple for long... Back in the twenty-first century, trouble strikes the SGC. With one of their own people snatched by renegade Tok'ra, Colonel Cameron Mitchell leads the new SG-1 on a chase through time to rescue their friend - and to protect their future. But for Carter, Daniel and Teal'c, the greatest challenge is encountering themselves - and coming to terms with the consequences of their own choices. Moebius Squared "So this..." Cam gestured to the machinery. "This can only move us backwards and forwards in our own timeline." "That's my best guess," Sam said. She pushed her bangs back out of her face. Her hair had grown out and was now caught in a ponytail at the back of her neck. "Just like Janus' puddlejumper." "I don't even want to think about that thing," Daniel said. "Or anything else to do with Janus." He winced. "Sorry," Sam said. "Sore spot." "Damn right." Daniel had only been out of the infirmary for two weeks since his latest brush with one of Janus' inventions. This one had gotten him kidnapped and electrocuted. They all spun around as the gate began to activate. "Firing positions," Cam said, crouching down beside the control panel. If someone were making a grab for Ba'al's facility... The wormhole opened and stabilized, a glittering puddle of blue. Cam's radio crackled. "SG-1, this is

Stargate Command. You are to return to Earth immediately." What the...? Cam chinned his radio on. "Stargate Command, we still have a lot to do here. Colonel Carter..." "Return immediately," the voice of Sergeant Harriman said firmly. "Stargate Command has been attacked."

While film and television seem to be closely allied screen media, our feature films and television series have seldom been successfully adapted across those screens. In fact, rather than functioning as portals, those allied media often seem, quite literally, screens that filter out something that made the source work so popular in its original form. Differences in budget, running times, cast, viewing habits, screen size and shape all come into play, and this volume's aim is to track a number of popular texts in the course of their adaptive journeys across the screens in order to sketch the workings of that cross-media adaptation. For its specific examples, the volume draws on a single genre—science fiction—not only because it is one of the most popular today in either film or television, but also because it is arguably the most self-conscious of contemporary genres, and thus one that most obviously frames the terms of these technological adaptations. The essays included here mine that reflexive character, in both highly successful and in failed efforts at cross-media adaption, to help us understand what film and television achieve in screening science fiction, and to reveal some of the key issues involved in all of our efforts to navigate the various screens that have become part of contemporary culture.
