When you're

Griffin seems

about Griffin.
He always

And if Griffin

the truth
about Griffin:
he's a liar, a

functions to underwrite racially hostile and unwelcoming campus communities for People of Color, all the while upholding the interests and values of white students, faculty, and staff. While higher education scholars and practitioners have long explored the role of race and racism in college and university contexts, rarely have they done so through a lens of Critical

Whiteness Studies (CWS). Exploring such topics through the lens of CWS offers new opportunities to both examine white identities, attitudes, and ways of being, and to explicitly name how whiteness is embedded in environments that marginalize and oppress students, faculty, and staff of color. This book is especially concerned with naming the material consequences

of whiteness in the lives of People of Color on college and university campuses in the United States. Part one of the book introduces theoretical ideas and concepts administrators, scholars, and activists might use to interrogate how whiteness functions on campus. Part two of the book explores practical considerations for how whiteness functions across campus

spaces, including student leadership programs, fraternity and sorority life, faculty tenure and promotion, LGBTQ support services, and so forth.

Principally, the change work performed by student affairs practitioners is about supporting the growth and</p>	<p>development of individual students and student groups. Increasingly, that work has called for practitioners to become more active in working to change higher education so that it lives up to its radically democratic, inclusive ideals. text represents an effort to describe and document these practices of intentionally centering critical theories. The first section of this text examines the ways that critically-minded practitioners lead through equitable, liberatory frameworks, offering important models for reimagining the future of higher education. In the second section, the editors take

up thinking and acting to support the development of critical consciousness in students, providing examples of programs, initiatives, and student support offices that center social justice in their work, and foster a critical lens through their interactions with students. In their conclusion, the editors provide a model for critical praxis, offering enduring strategies for practitioners seeking to

incorporate critical, socially just praxis into their everyday work, and defining areas for future research and praxis, including identifying strategies for effective assessment of critical praxis, and modalities for “scaling up” the work for maximal impact.
