The Immortal Life of Henrietta Lacks Ravenio Books

This early work by H. H. Munro was originally published in 1911 and we are now republishing it with a brand new introductory biography. 'The Chronicles of Clovis' is a collection of short stories, including 'The Great Weep', 'Tobermory', 'Adrian', and many more. Hector Hugh Munro was born in Akyab, Burma in 1870. He was raised by aunts in North Devon, England, before returning to Burma in his early twenties to join the Colonial Burmese Military Police. Later, Munro returned once more to England, where he embarked on his career as a journalist, becoming well-known for his satirical 'Alice in Westminster' political sketches, which appeared in the Westminster Gazette. Arguably better-remembered by his pen name, 'Saki', Munro is now considered a master of the short story, with tales such as 'The Open Window' regarded as examples of the form at its finest.

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film Blade Runner. By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding,

unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world."—John Brunner "A kind of pulp-fiction Kafka, a prophet."—The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from."—Rolling Stone

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSD's path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmann's trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmann's powerful conclusion that mystical experience may be our planet's best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmann's problem child, his vision of its true potential is more relevant, and more needed, than ever.

10 Buildings that Changed America tells the stories of ten influential works of architecture, the people who imagined them, and the way these landmarks ushered in innovative cultural shifts throughout our society. The book takes readers on a journey across the country and inside these groundbreaking works of art and engineering. The buildings featured are remarkable not only for aesthetic and structural reasons, but also because their creators instilled in them a sense of purpose and personality that became reflected in an overarching sense the American identity. Edited by the staff of WTTW, the Chicago PBS affiliate that is the most-watched public television station in the country, 10 Buildings will be released alongside the national broadcast of an hour-long special by the same name. This television event will be promoted over digital media, on-ground events, and educational initiatives in schools, and the book will be a significant component to all of these elements. 10 Buildings retells the shocking, funny, and even sad stories of how these buildings came to be. It offers a peek inside the imaginations of ten daring architects who set out to change the way we live, work, and play. From American architectural stalwarts like Louis Sullivan and Frank Lloyd Wright, to modern revolutionaries like Frank Gehry and Robert Venturi, this book examines the most prominent buildings designed by the most noteworthy architects of our time. Also profiled are Americans less noted for their architectural acumen, but no less significant for their contributions to the field. Thomas Jefferson, a self-taught architect, is profiled for designing the iconic Virginia State Capitol. Taking its inspiration from ancient Rome, America's first major public building forged a philosophical link between America and the world's earliest democracies. Similarly, Henry Ford employed Albert Kahn to design a state-of-the-art, innovative factory for Ford's groundbreaking assembly line. Reinforced concrete supported massive, open rooms without any interior dividing walls, which yields the uninterrupted space that was essential for Ford's sprawling continuous production setups. What's more, Kahn considered the needs of workers by including astonishingly modern large windows and louvers for fresh air. The design of each of these ten buildings was completely monumental and prodigious in its time because of the architect's stylistic or functional innovations. Each was also highly influential, inspiring a generation or more of architects, who in turn made a lasting

impact on the American landscape. We see the legacy of architects like Mies van der Rohe or H.H. Richardson all around us: in the homes where we live, the offices where we work, our public buildings, and our houses of worship. All have been shaped in one way or another by a handful of imaginative, audacious, and sometimes even arrogant individuals throughout history whose bold ideas have been copied far and wide. 10 Buildings is the ideal collection to detail the flashes of inspiration from these architects who dared to strike out on their own and design radical new types of buildings that permanently altered our environmental and cultural landscape.

Since Descartes famously proclaimed, "I think, therefore I am," science has often overlooked emotions as the source of a person's true being. Even modern neuroscience has tended, until

recently, to concentrate on the cognitive aspects of brain function, disregarding emotions. This attitude began to change with the publication of Descartes' Error in 1995. Antonio Damasio—"one of the world's leading neurologists" (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior. *A Deal with the Elf King* Cosimo, Inc.

Based on Stanford University psychologist Kelly McGonigal's wildly popular course "The Science of Willpower," *The Willpower Instinct* is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn:

- Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep.
- Willpower is not an unlimited resource. Too much self-control can actually be bad for your health.
- Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower
- Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control.
- Giving up control is sometimes the only way to gain self-control.
- Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models. In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

**Why We Fail to Do What's Right and What to Do about It** Hedrick\ McBride

'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over the coming days and weeks, I would never again be the same person

...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. *Brain on Fire* is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. *Brain on Fire* is a mesmerizing story' -Mira Bartók, New York Times bestselling author of *The Memory Palace* Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites. *Fundamentals of Computer Programming with C#* Faber Publishing

The New York Times bestselling collection of humorous autobiographical essays by the Academy Award nominated actress and star of *Up in the Air* and *Pitch Perfect*. Even before she made a name for herself on the silver screen starring in films like *Pitch Perfect*, *Up in the Air*, *Twilight*, and *Into the Woods*,

Anna Kendrick was unusually small, weird, and "10 percent defiant." At the ripe age of thirteen, she had already resolved to "keep the crazy inside my head where it belonged. Forever. But here's the thing about crazy: It. Wants. Out." In *Scrappy Little Nobody*, she invites readers inside her brain, sharing extraordinary and charmingly ordinary stories with candor and winningly wry observations. With her razor-sharp wit, Anna recounts the absurdities she's experienced on her way to and from the heart of pop culture as only she can—from her unusual path to the performing arts (Vanilla Ice and baggy neon pants may have played a role) to her double life as a middle-school student who also starred on Broadway to her initial "dating experiments" (including only liking boys who didn't like her back) to reviewing a binder full of butt doubles to her struggle to live like an adult woman instead of a perpetual "man-child." Enter Anna's world and follow her rise from "scrappy little nobody" to somebody who dazzles on the stage, the screen, and now the page—with an electric, singular voice, at once familiar and surprising, sharp and sweet, funny and serious (well, not that serious).

This important collection of anecdotes and reminiscences from Sheikh Mohammed bin Rashid Al Maktoum is published to mark the occasion of his fifty years in public service, which began with his appointment as Dubai's Minister of Defence in 1968. These stories tell of the vision behind Dubai's meteoric growth from a small and bustling trading port to an international metropolis at the heart of global business. They record the evolution of the United Arab Emirates from a shared ideal to a nation where more than 195 nationalities live and work in peace, harmony and prosperity. And they reveal insights from a man whose drive, determination and will to succeed have become legendary. Within these stories lies the heart of Sheikh Mohammed the statesman, the equestrian, the poet and the leader. They are written with the intent to inspire and inform new generations of readers, and to celebrate the achievements of this young and vibrant nation and the people who shaped it. This celebration of a life in service is unavoidably incomplete. As Sheikh Mohammed himself indicates, there is still so much left to do. As a record of the first fifty years alone, however, it forms part of a remarkable legacy. Other titles written by Sheikh Mohammed and published by Explorer include
