 Kinesiology for the Occupational Therapy Assistant: Essential Components of Function and Movement approaches the study of kinesiology by connecting function to the underlying components that make movement possible. Information is presented in a manner that enhances retention by incorporating applications in occupational therapy. With over 18 years of combined teaching experience, Jeremy Keough, Susan Sain, and Carolyn Roller present how aspects of movement enable or hinder function and engagement in daily activities using a top-down approach based on the Occupational Therapy Practice Framework, Second Edition. Benefits and Features: • Occupational profiles describing actual client conditions at the beginning of several chapters • Occupation/real-life based activities and questions at the end

of each chapter • Emphasis on function and identification of how and why movement occurs • Range of motion and manual muscle testing, as well as kinesiological principles, now available in one text • More than 300 tables and figures throughout the chapters • Call out boxes that highlight and clarify key concepts • A seamless integration of theory, fact, and practice • Glossary of terms, Web resources, and range of motion norms • Instructors will benefit from ancillary PowerPoint presentations

Instructors in educational settings can visit www.efacultyounge.com for additional materials to be used for teaching in the classroom.

Kinesiology for the Occupational Therapy Assistant: Essential Components of Function and Movement provides occupational therapy assistant students with thorough explanations and learning activities that will put kinesiology into context. Students will also gain insight into the practice of occupational therapy through directed questions and problem solving to assist the client in achieving movement goals.

Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.
