The New Domestic Medical Manual; Being a Practical and Familiar Guide to the Treatment of Diseases Generally John Wiley & Sons
Now in full color, *Principles and Practice of Veterinary Technology* provides comprehensive coverage of the competencies every vet tech needs to know. Illustrated, step-by-step instructions emphasize the technician's role and responsibilities in each procedure, and dozens of new summary tables and boxes make it easy to find key information. Written by experienced vet tech educator Margi Sirois, this edition offers excellent preparation for clinical practice and for veterinary technician credentialing

examinations. Comprehensive coverage includes the entire scope of competencies reflecting today's veterinary technology practice. 82 illustrated, step-by-step procedures include instructions for all AVMA-required psychomotor techniques. Clinical discussions of the technician's role are emphasized in every procedure. Expert authors are qualified vet tech educators who understand your needs and write in a clear, concise style. New Physical Therapy, Rehabilitation, and Complementary Medicine chapter helps you integrate physical rehabilitation, acupuncture, and herbal remedies into practice. Expanded coverage of exotics includes handling, restraint, and examination procedures for birds, reptiles, amphibians, and wildlife. Over 900 full-color photos and illustrations accurately depict specific disorders, diseases, and procedures, making these easier to

learn. More tables and boxes summarize key information, to simplify the learning of complex material.

The Dictionary of Substances and their Effects (DOSE) Grand Central Publishing

The must-have resource drawing together all aspects of hospital care of the horse and specialist techniques in equine medicine. This new edition of The Dictionary and Substances and their Effects (DOSE) supersedes the renowned 1st edition. The 1st edition has been completely revised, updated and extended with all the latest significant data on the chemicals known to have adverse effects on lifeforms or the environment. The new edition is a must for all those who need easy access to a single source of the latest essential and fully referenced data on chemicals which are known to have significant toxic or environmental effects. The web database is ideal for targeted searches and customised data retrieval. The 2nd edition of DOSE includes new toxicity, environmental and regulatory data from the world's literature,

presented in concise summaries. These new data are essential for the accurate assessment of the risks associated with the use and disposal of chemicals. Data on over 100 chemicals new to this edition have been added, including endocrine disruptors, food carcinogens, pesticides and compounds studied by IARC and NTP. All of the 4000 chemicals contained in the 1st edition have been reviewed. New and updated information for these chemicals includes: * occupational exposure limits for 6 countries * recent toxicity and ecotoxicity data * results of new carcinogenicity, mutagenicity and environmental fate studies * the latest regulatory requirements DOSE 2nd edition comprises 7 hardcover volumes covering over 4000 chemicals alphabetically, and includes indexes of substance names and synonyms, molecular formulae, and CAS Registry Numbers; glossaries of medical terms and Latin to English organism names; an abbreviations listing and a comprehensive guide to the types of data and their origin. DOSE is also available via Knovel's Engineering and Scientific Online Reference, located at www.knovel.com.
