 A. Cognitive Behavioral Therapy (CBT) / Exposure and Response Prevention (ERP) Consistently, CBT/ERP has been shown to be efficacious in the treatment of OCD . All treatment guidelines have suggested the use of CBT as a first-line treatment option. CBT for OCD includes ERP. CBT/ERP is a first-line treatment option for OCD.
 Clinical practice guidelines for Obsessive-Compulsive Disorder
 CBT Clinical Practice Minimum Caseloads For Reaccreditation, there is no specific requirement for a minimum number of clinical hours. However, in order to maintain your accreditation, at least 50% of your psychotherapeutic practice must be acceptable forms of CBT, as defined in the following section.
 Reaccreditation Guidelines: CBT Practice
 CBT can be administered in individual or group formats. It is short-term (e.g., 20 sessions) and problem-focused. The most studied psychotherapy for depression, CBT has the largest weight of evidence for its efficacy. Interpersonal psychotherapy (IPT) is a structured and brief intervention addressing social issues that maintain depression.
