Or, The History and Policy of the Laws Relating to Commons and Enclosures in England. Being the Yorke Prize Essay of the University of Cambridge

for the Year 1886 University of Michigan Press

This book examines the intersection of race, political sermons, and social justice. Religious leaders and congregants who discuss and encourage others to do social justice embrace a form of civil religion that falls close to the covenantal wing of American civil religious thought. Clergy and members who share this theological outlook frame the nation as being exceptional in God's sight. They also emphasize that the nation's special relationship with the Creator is contingent on the nation working toward providing opportunities for socioeconomic well-being, freedom, and creative pursuits. God's covenant, thus, requires inclusion of people who may have different life experiences but who, nonetheless, are equally valued by God and worthy of dignity. Adherents to such a civil religious worldview would believe it right to care for and be in solidarity with the poor and powerless, even if they are undocumented immigrants, people living in non-democratic and non-capitalist nations, or members of racial or cultural out-groups. Relying on 44 national and regional

surveys conducted between 1941 and 2019, *Race and the Power of Sermons on American Politics* explores how racial experiences impact the degree to which religion informs social justice attitudes and political behavior. This is the most comprehensive set of analyses of publicly available survey data on this topic.

These essays critically examine the issue of race in college and professional sports, beginning with the effects of stereotypes on black female college athletes, and the self-handicapping of black male college athletes. Also discussed is the movement of colleges between NCAA designated conferences, and the economic impact and effects on academics for blacks. An essay on baseball focuses on changes in Brooklyn during the Jackie Robinson years, and another essay on how the Leland

Giants became a symbol of racial pride. Other essayists discuss the use of American Indian mascots, the Jeremy Lin spectacle surrounding Asians in pro sports, the need to hire more NFL coaches of color, and ideals of black male masculinity in boxing.
