Solutions At Power Systems Design Solutions Ltd, we offer extensive engineering services to electrical utility companies as well as their supporting project organisations. We have over 80 years of combined expertise and experience in the application and integration of substation protection and control (P&C) systems. Engineering services from Power Systems Design Solutions Ltd

1. Design transmission line (electrical and mechanical aspects)
2. Design primary and secondary distribution.
3. Selection of sizes and location of generating stations, substations.
4. Explain the basic concepts of power system earthing and measurement of earthing resistance.
- 5.

Explain the basic concepts of insulation co-ordination.
