McGraw-Hill Europe

Introduction to Managerial Accounting, 4/e by Brewer/Garrison/Noreen is based on the market-leading text, *Managerial Accounting*, by Garrison, Noreen and Brewer.

However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 4/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course: cost

accounting/cost management. Faculty and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.

McGraw-Hill Education

This unique book analyses the bold attempts of the Thai Government to encourage State universities to

move to autonomous governance and management. Systems used for universities that are similar to government departments are often inadequate for the increased responsibility of autonomy. In this book, Dr Wasan details the process of transition, including some pitfalls, over a five-year period as Thaksin University evolved to become 'autonomous'. Including

history, accounting and foreign inputs, the book provides a narrative of the policy and procedural changes needed to make autonomy work. Complemented by surveys of two other universities and users of the new procedures, the book concludes that the continuous improvement resulting from proper budgeting offers a benchmark for government universities

seeking to improve their efficiency and effectiveness. It is a wise book insofar as it does not claim that there is one path to follow. Those concerned with university management, particularly in Thailand and the region, will find this is a book they keep at hand for many years.
