Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry - and why it's necessary in our lives - can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the Handbook of Reflection and Reflective Inquiry presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss

reflective inquiry as a form of active attention (Thoreau's "wide-awakeness"), an act of consciousness, and a process by which people can understand themselves, their work (particularly in the form of life projects), and others. Building on this foundation, the Handbook analyzes through the work of 40 internationally oriented authors: - Definitional issues concerning reflection, what it is and is not; - Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education; - Reflection as promoted across professional educational domains, including K-12 education, teacher education, occupational therapy,

and the law; - Methods of facilitating and scaffolding reflective engagement; - Current pedagogical and research practices in reflection; - Approaches to assessing reflective inquiry. Educators across the professions as well as adult educators, counselors and psychologists, and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.

The Little Book of Reflective Practice
Springer

** By the authors of the acclaimed Introduction to Rubrics
** Major growth of interest in keeping journals or diaries for personal reflection and

growth; and as a teaching tool ** Will appeal to college faculty, administrators and teachers One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development—particularly for those in academic life; and demonstrates journals’ potential to foster college students’ learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member’s or administrator’s roles. Journals are effective for developing time

management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and

techniques most appropriate for the reader's purposes. Seven Psychological Principles of Persuasive Design Routledge

A Guide to

Transformative and Emancipatory Learning

Stylus Publishing, LLC

Reflective Practice has become established as an essential feature of practice in

psychotherapy and counselling in the UK, Europe, USA and some other parts of the world. However, the writing on reflective practice is arguably fragmented and scattered, and much of it is highly theoretical and abstract. This book draws together conceptual and ethical issues regarding reflective practice, including the meaning and development of the orientation. More importantly, it connects theory to day-to-day practice in psychotherapy and

counselling, addressing issues such as: What does reflective practice look like, in practice? How do we develop the skills in carrying it out? What ways does it assist practice? The book offers an exploration of reflective practice within different models of psychotherapy and counselling: CBT, psycho-dynamic and narrative, systemic family therapy, narrative and community approaches. Throughout, it employs a range of illustrations from a variety of clinical contexts to illustrate reflective practice in action. These include work with; children and families, adult mental health, trauma and abuse, learning disability, youth

offending and bereavement and loss. The mix of theoretical background along with practical examples and exercises will be key for students and practitioners in the fields of psychotherapy and counselling. The book will be a spur to readers to challenge dominant assumptions and modes of clinical practice and help them fulfil the compulsory requirement for a reflective practice element in their training.
