New report forecasts drought in the Horn of Africa - Sub ... Accordingly, a high-level roundtable discussion on humanitarian response to El Niño drought was held at the UN-ECA conference room on the sidelines of the summit. The roundtable was then followed by a visit to drought affected areas. Updates on financing food assistance in the current drought A drought is an event of prolonged shortages in the water supply, whether atmospheric, surface water or ground

water. A drought can last for months or years, or may be declared after as few as 15 days. It can have a substantial impact on the ecosystem and agriculture of the affected region and harm to the local economy. Annual dry seasons in the tropics significantly increase the chances of a drought developing and subsequent bush fires. Periods of heat can significantly worsen drought condition Drought - Wikipedia FAO Report Assesses Impacts of Drought on Food Security in the Caribbean. The Food and Agriculture Organization of the UN (FAO) has published a report titled, 'Drought Characteristics and Management in the Caribbean,' which estimates that between 1970 and 2000, the Caribbean region suffered direct and indirect losses of between US\$700 million and US\$3.3 billion due to natural disasters associated with weather and climate events.

Agriculture is the first sector affected when drought hits and also the most affected sector, absorbing up to 80 percent of all direct impacts, with multiple effects on agricultural production, food security and rural livelihoods. Climate change is exacerbating drought in many parts of the world, increasing its frequency, severity and duration.
