## NEAL MCCARTHY

---

**Tea Sommelier** Chicago  
Review Press  
This book is targeted  
mainly to the  
undergraduate students  
of USA, UK and other  
European countries, and  
the M. Sc of Asian  
countries, but will be  
found useful for the  
graduate students,  
Graduate Record  
Examination (GRE),  
Teachers and Tutors. This  
is a by-product of lectures  
given at the Osmania  
University, University of  
Ottawa and University of  
Tebrez over several years,  
and is intended to assist  
the students in their  
assignments and  
examinations. The book  
covers a wide spectrum of  
disciplines in Modern  
Physics, and is mainly  
based on the actual  
examination papers of UK  
and the Indian  
Universities. The selected  
problems display a large

variety and conform to  
syllabi which are currently  
being used in various  
countries. The book is  
divided into ten chapters.  
Each chapter begins with  
basic concepts containing  
a set of formulae and  
explanatory notes for  
quick reference, followed  
by a number of problems  
and their detailed  
solutions. The problems  
are judiciously selected  
and are arranged section-  
wise. The so- tions are  
neither pedantic nor  
terse. The approach is  
straight forward and step-  
- step solutions are  
elaborately provided.  
More importantly the  
relevant formulas used for  
solving the problems can  
be located in the  
beginning of each  
chapter. There are  
approximately 150 line  
diagrams for illustration.  
Basic quantum  
mechanics, elementary  
calculus, vector calculus  
and Algebra are the pre-  
requisites.

Love is You & Me. Henry  
Holt and Company (BYR)  
Love is me, and love is  
you. You see, when you  
smile I smile too. When

you're around, the skies  
are blue. It's like being  
happy . . . times two!  
Monica Sheehan's  
delightful follow-up to Be  
Happy! reminds readers  
about the surprisingly  
simple acts that  
demonstrate love: giving  
a hug, sharing your toys,  
being a good friend, and  
much more. This vibrant,  
uplifting title all about  
love makes a perfect gift  
for Valentine's Day or any  
time of the year!  
*The Bacteria Book* The  
Rosen Publishing Group,  
Inc  
Diary of a Wimpy Kid  
meets Percy Jackson in  
Odd Gods, the first book  
in a hilarious illustrated  
series about the most  
unlikely, unusual Gods  
ever to grace the halls of  
Mount Olympus Middle  
School. Oddonis may be  
the son of Zeus, but he's  
a little bit...odd for a God.  
He's so odd, in fact, he's  
not sure if he has any  
powers at all. And if that  
isn't enough, his twin  
brother Adonis is the most  
popular, most athletic,  
and most otherworldly  
handsome God of them  
all. Oddonis's future at

Mount Olympus Middle isn't looking bright, especially when he makes the last-minute decision to run against Adonis to be class president. With the help of his friends Mathena (Goddess of math and poultry), Germes (God of all things sniffing and snotty), Puneous (the smallest God of them all), and Gaseous (enough said?), Oddonis is determined to win the race, prove that his friends are as good as any Greek God, and maybe, just maybe, find out what his true powers really are. Read the hilarious new adventures of Oddonis and his friends from debut children's authors David Slavin and Daniel Weitzman, filled with dozens of black-and-white illustrations by award-winning artist Adam Lane.

Simon and Schuster  
A SUNDAY TIMES  
BESTSELLER From the creators of the wildly popular YouTube channel AsapSCIENCE comes a book about the science that people actually want to learn, presented in a quirky and accessible way. And in the spirit of science, no subject is taboo. Why do we get hungover? Which actually came first, the chicken or

the egg? Is binge-watching TV bad for you? Now, for the first time, Mitchell Moffit and Greg Brown, the geniuses behind AsapSCIENCE and AsapTHOUGHT, answer these questions by explaining the true science of how things work in this fascinating and hilarious book. Applying the fun, illustrated format of their addictive videos to topics ranging from brain freeze to hiccups to the science of the snooze button, AsapSCIENCE is the book that answers the questions you were too afraid to ask in science class. Whether you're a total science newbie or the next Albert Einstein, this guide is sure to educate and entertain ... ASAP. PRAISE FOR MITCHEL MOFFIT AND GREG BROWN 'Written by the two blokes who do the vids for the very addictive AsapSCIENCE YouTube channel, a bunch of brilliant content that'll keep you hooked for hours. This book is a wonderful companion.' The Daily Telegraph 'Be educated and entertained by this quirky book, which unites baffling questions and their surprising answers.' The Observer [Death from the Skies!](#) Puffin

Readers experience for themselves how the coloring of a carefully designed picture almost magically creates understanding. Indispensable for every biology student. [Odd Gods](#) Simon and Schuster Blast off and experience space travel with this collection of fascinating, funny, and sometimes weird anecdotes from real astronauts. Everyone wonders what it's really like in space, but very few of us have ever had the chance to experience it firsthand. This captivating illustrated collection brings together stories from dozens of international astronauts—men and women who've actually been there—who have returned with accounts of the sometimes weird, often funny, and awe-inspiring sensations and realities of being in space. With playful artwork accompanying each, here are the real stories behind backwards dreams, "moon face," the tricks of sleeping in zero gravity and aiming your sneeze during a spacewalk, the importance of packing hot sauce, and dozens of other cosmic quirks and amazements that come with travel in and beyond

low Earth orbit. Praise for What's It Like in Space? "Houston, we have a winner." —Oprah Magazine "[A] captivating illustrated collection." —Smithsonian Magazine "A delightful mini-coffee table book about all the awkward and beautiful moments you can have in space, based on dozens of interviews with people who have actually been there. If you're looking for a fun read about life outside the gravity well, check out What's It Like in Space?" —Ars Technica "This charmingly illustrated book is much meatier than its diminutive size would suggest. These snippets are so clear, so beautifully curated, that they really do leave you with a sense of what it must be like to float miles above Earth." —Entertainment Weekly

*Work is Love Made Visible* White Star Editions Bermuda Triangle, North Atlantic Ocean -- Berwyn Mountains, Wales -- Bhangarh, India -- Carew Castle, Wales -- Caucasus Mountains, Eurasia -- Death Valley, California, USA -- Devil's Gate Dam, California, USA -- Devil's Sea, Japan -- German Cemetery, Cannock Chase, England -- Guadalcanal, Solomon Islands, Oceania --

Whether you are working on a human biology project or you just want to know more about how your body works, this is an excellent addition to your bookshelf.

*A Collection of Essays About the Power of Finding Your Purpose From the World's Greatest Thought Leaders* Simon and Schuster

Get to know Galaxy Zack—and his new home planet!—in this start to an out-of-this-world illustrated chapter book series. In Hello, Nebulon!, Zack makes the big move

from Earth. He is already nervous about starting school and making new friends, but it only gets worse when he dreams that his classmates are slimy aliens with tentacles, pizza comes covered in gross bugs, and he can never communicate with his Earth friends again! Fortunately, when Zack arrives at Sprockets Academy for his first day of school, he meets and befriends Drake Tucker, a Nebulite boy who also loves to explore and learn about the planets.

Nebulon isn't as awful as Zack's dream, but there are a lot of differences between Nebulon and Earth, and they make Zack miss his home in Dubbsville, Texas, even more. But things start to look up when he receives a mysterious surprise.

What could it possibly be? With easy-to-read language and illustrations on almost every page, the Galaxy Zack chapter books are perfect for beginning readers.

*AsapSCIENCE* Penguin Ordinary folks can construct 13 awesome ballistic devices in their garage or basement workshops using inexpensive household or hardware store materials and this step-by-step

guide. Clear instructions, diagrams, and photographs show how to build projects ranging from the simple—a match-powered rocket—to the more complex—a scale-model, table-top catapult—to the offbeat—a tennis ball cannon. With a strong emphasis on safety, the book also gives tips on troubleshooting, explains the physics behind the projects, and profiles scientists and extraordinary experimenters such as Alfred Nobel, Robert Goddard, and Isaac Newton. This book will be indispensable for the legions of backyard toy-rocket launchers and fireworks fanatics who wish every day was the fourth of July.

Martin Gardner's Science Magic Simon and Schuster

The bestselling author of *Hair of the Dog to Paint the Town Red* share more than 150 baffling, bizarre, and enlightening facts in the fun trivia collection. This curious, captivating collection of trivia will surprise and intrigue readers with amazing answers to questions like:

- Is Jurassic Park possible?
- What causes “the shakes” after drinking a lot of alcohol?
- Why do dogs walk in circles before

lying down? • What makes popcorn pop? The follow-up to the bestselling *What Did We Use Before Toilet Paper?*, *Can Holding in a Fart Kill You?* has even more fun and fascinating trivia. Perfect for the ever-curious trivia lover, this book is the ultimate in truly extraordinary information. From silly to serious to outright bizarre, this expansive collection offers surprising answers and unexpected facts on everything from history and science to pop culture and nature. From the everyday to the fantastical—it's all here. "A very handy book that could honestly, save their life—or just answer all those questions they're maybe too embarrassed to even google." —Buzzfeed  
*Crash and Burn* Chronicle Books

Wind and solar energy have negative economic value. An objective analysis of the economics involved show that wind and solar are heavily subsidized. Some of the subsidies are open, but much of the subsidy is hidden from the public. There are special tax deals and sweetheart power purchase agreements. Although wind and solar are promoted as a low carbon solution, they are a remarkably expensive way to reduce carbon emissions. The erratic nature of wind and solar means it is necessary to have a dual system - the wind or solar, and in addition, a conventional system to backup the erratic wind or solar. Sometimes the wind does not blow. The sun does not shine when it is

cloudy, or at night. Extensive lobbying and outright propaganda has convinced the public that it is a good idea to spend billions on this dumb wind and solar energy. The facts and figures are in this book, in an easily-understood format.

*Brains! Not Just a Zombie Snack* Scribe Publications Presents a review of technological innovations and inventions, from the ancient world to the present day.

#### **You Are Not Alone**

Simon and Schuster  
A collection of 20 original, unstinting essays by the young YouTube vlogger and creator of *Not Cool* shares intimate insights into his personal life, highlighting moments from his childhood, his rise on YouTube and his experiences as a filmmaker. Original.
