Robertson (history, U. of Melbourne, Australia) has written a history of the power struggle between Pope Paul II (1464-1471) and the commune of Bologna. The political motivations of Paul II are analyzed to show the importance of the state of Bologna to the Papal State and Paul's frustration with the ruling oligarchy. The history of Bologna's governing

system is vividly told, with many quotes from primary sources included (in both Italian and English translation). The audience will be historians of Italy's city-states and Renaissance political history. Distributed by the David Brown Book Company. Annotation copyrighted by Book News, Inc., Portland, OR.

The Late Roman fort at Yotvata is located in the southern Arava some 40 km north of Eilat/Aqaba (ancient Aila). The modern Hebrew name of the site is based on its suggested identification with biblical Jotbathah (Deut 10:7), where the Israelites encamped during their desert wanderings. The modern Arabic name of the site, Ein Ghadian, may preserve the ancient Roman name Ad Dianam. Because the Late Roman fort at Yotvata is visible as a low mound next to the Arava road, it has long been known to scholars. Each June between 2003 and 2007, Gwyn Davies (Florida International University) and Jodi

Magness (University of North Carolina at Chapel Hill) co-directed excavations here. This volume provides the results of those excavations, adding substantially to our knowledge of Roman defenses in the third and fourth centuries of the Common Era, along the trade route that traversed the southern Arava and on the eastern frontier of the Empire.

Il Mondo JHU Press

A new title in the successful Lives of the Artists series, which offers illuminating, and often intimate, accounts of iconic artists as viewed by their contemporaries. The most notorious Italian painter of his day, Michelangelo Merisi da Caravaggio (1571-1610) forever altered the course of Western painting with his artistic ingenuity and audacity. This volume presents the most important early biographies of his life: an account by his doctor, Giulio Mancini; another by one of his artistic rivals, Giovanni Baglione; and a later profile by Giovanni Pietro Bellori that demonstrates how Caravaggio's impact was felt in seventeenth-century Italy. Together, these accounts have

provided almost everything that is known of this enigmatic figure. *Catalogo delle monete romane consolari ed imperiali, monete bizantine e delle zecche italiane medioevali e moderne componenti la collezione del Signor Amilcare Ancona di cui la vendita al pubblico incanto avrà luogo in Milano ...* Penn State Press
 Winner of the Professional/Scholarly Publishing Award in Economics from the Association of American Publishers Within a few months of assuming the position of curator of medieval coins at the American Numismatic Society in 1980, Alan M. Stahl was presented with a plastic bag containing a hoard of 5,000 recently discovered coins, most of which turned out to be from medieval Venice. The course of study of that hoard (and a later one containing more than 14,000 coins) led him to the Venetian archives, where he examined thousands of unpublished manuscripts. To provide an even more accurate account of how the Zecca mint operated in Venice in the thirteenth through fifteenth centuries, Stahl commissioned scientific analyses of the coins

using a variety of modern techniques, uncovering information about their content and how they had been manufactured. The resulting book, *Zecca: The Mint of Venice in the Middle Ages*, is the first to examine the workings of a premodern mint using extensive research in original documents as well as detailed study of the coins themselves. The first of the book's three sections traces the coinage of Venice from its origins in the ninth century as a minor, and unofficial, regional Italian coinage to its position at the dawn of the Renaissance as the dominant currency of Mediterranean trade. The second section, entitled "The Mint in the Life of Medieval Venice," illustrates the mechanisms of the control of bullion and the strategies for mint profit and explores the mint's role in Venetian trade and the emergence of a bureaucratized government. The third section, "Within the Mint," examines the physical operations that transformed raw bullion into coins and identifies the personnel of the mint, situating the holders of each position in the context of their social and

professional backgrounds. Illustrated with photos of Venetian coinage from the world's major collections, Zecca also includes a listing of all holders of offices related to the medieval Venetian mint and summaries of all major finds of medieval Venetian coins.
