*Laboratory Manual for General Biology I*  
Morton Publishing Company  
The Biology Laboratory Manual by  
Vodopich and Moore was designed for an  
introductory biology course with a broad  
survey of basic laboratory techniques.  
The experiments and procedures are  
simple, safe, easy to perform, and  
especially appropriate for large classes.  
Few experiments require more than one  
class meeting to complete the  
procedure. Each exercise includes many  
photographs, traditional topics, and  
experiments that help students learn  
about life. Procedures within each  
exercise are numerous and discrete so  
that an exercise can be tailored to the  
needs of the students, the style of the  
instructor, and the facilities available.

One of the best ways for your students  
to succeed in their biology course is  
through hands-on lab experience. With  
its 46 lab exercises and hundreds of  
color photos and illustrations, the  
LABORATORY MANUAL FOR NON-MAJORS  
BIOLOGY, Sixth Edition, is your students'  
guide to a better understanding of  
biology. Most exercises can be  
completed within two hours, and  
answers to the exercises are included in  
the Instructor's Manual. The perfect  
companion to Starr and Taggart's  
BIOLOGY: THE UNITY AND DIVERSITY OF  
LIFE, as well as Starr's BIOLOGY:  
CONCEPTS AND APPLICATIONS, and  
BIOLOGY TODAY AND TOMORROW, this  
lab manual can also be used with any

THE MADER/WINDELSPECHT STORY...

The twelfth edition of Biology is a traditional, comprehensive introductory biology textbook, with coverage from Cell Structure and Function to the Conservation of Biodiversity. The book, which centers on the evolution and diversity of organisms, is appropriate for any one- or two-semester biology course. Biology, 12th Edition is the epitome of Sylvia Mader's expertise. Its concise, precise writing-style employs lucid language to present the material as succinctly as possible, enabling students—even non-majors—to master the foundational concepts before coming to class. “Before You Begin”, “Following the Themes”, and “Thematic Feature Readings” piece together the three major themes of the text—evolution, nature of science, and biological systems. Students are consistently engaged in these themes, revealing the interconnectedness of the major topics

in biology. Sylvia Mader typifies an icon of science education. Her dedication to her students, coupled with her clear, concise writing-style has benefited the education of thousands of students over the past three decades. The integration of the text and digital world has been achieved with the addition of Dr. Michael Windelspecht's facility for the development of digital learning assets. For over ten years, Michael served as the Introductory Biology Coordinator at Appalachian State University—a program that enrolls over 4,500 non-science majors annually. Michael is the lead architect in the design of McGraw-Hill's Connect Plus and LearnSmart media content for the Mader series. These assets allow instructors to easily design interactive tutorial materials, enhance presentations in both online and traditional environments, and assess the

learning objectives and outcomes of the course.

*General Biology Lab Manual* Brooks/Cole Publishing Company

This lab manual for major and non-majors can accompany any introductory biology text. It covers most major laboratory topics used in introductory biology and includes comprehensive coverage of vertebrate dissection (fetal pig). Most labs in this laboratory manual do not require special equipment.
