• Choice 1988 Outstanding Academic Book • Named one of the Best Business Books of 1988 by USA Today A veteran reporter of American labor analyzes the spectacular and tragic collapse of the steel industry in the 1980s. John Hoerr's account of these events stretches from the industrywide bargaining failures of 1982 to the crippling work stoppage at USX (U.S. Steel) in 1986-87. He interviewed scores of steelworkers, company managers at all levels, and union officials, and was present at many of the crucial events he describes. Using historical flashbacks to the origins of the steel industry, particularly in the Monongahela Valley of southwestern Pennsylvania, he shows how an obsolete and adversarial relationship between management and labor made it impossible for the industry to adapt to shattering changes in the global economy.

It's 1979. Dorothy in Wonderland is the journey of Dorothy, a 29-year-old idealistic, gay woman, whose first career in teaching puts her at odds with the patriarchal Catholic system. Her firing catapults her on a dreamlike adventure to the woods of Maine where she joins a primitive religious community made up of renegade nuns and a priest. Here she meets the Empress, the spiritual leader, and the female version of Narcissus and Goldmund ensues. Dorothy's subsequent social work introduces her to several fascinating characters and synchronistic experiences. Eventually, a torrid affair with a Harvard student, ten years her junior, forces her to make new life choices. This is a story of unrequited love. The honest revelation of internal and external struggles will touch secret places hidden in all. Written in a memoir style of stream-of-consciousness thoughts, the book offers access into Dorothy mind. Insights into the creative process, spirituality, sexuality, and the interaction of strong women are the work's strengths.

In the late 19th century, rails from Bethlehem Steel helped build the United States into the world's foremost economy. During the 1890s, Bethlehem became America's leading supplier of heavy armaments, and by 1914, it had

pioneered new methods of structural steel manufacture that transformed urban skylines. Demand for its war materials during World War I provided the finance for Bethlehem to become the world's second-largest steel maker. As late as 1974, the company achieved record earnings of \$342 million. But in the 1980s and 1990s, through wildly fluctuating times, losses outweighed gains, and Bethlehem struggled to downsize and reinvest in newer technologies. By 2001, in financial collapse, it reluctantly filed for Chapter 11 bankruptcy protection. Two years later, International Steel Group acquired the company for \$1.5 billion. In Bethlehem Steel, Kenneth Warren presents an original and compelling history of a leading American company, examining the numerous factors contributing to the growth of this titan and those that eventually felled it—along with many of its competitors in the U.S. steel industry. Warren considers the investment failures, indecision and slowness to abandon or restructure outdated "integrated" plants plaguing what had become an insular, inward-looking management group. Meanwhile competition increased from more economical "mini mills" at home and from new, technologically superior plants overseas, which drove world prices down, causing huge flows of imported steel into the United States. Bethlehem Steel provides a fascinating case study in the transformation of a major industry from one of American dominance to one where America struggled to survive. Young Bear's own life in Brotherhood Community, Porcupine District of the Pine Ridge Sioux Reservation, is the linchpin of this narrative, which ranges across the landscape of Dakota culture, from the significance of names to the search for modern Lakota identity, from Lakota oral traditions to powwows and giveaways, from child-rearing practices to humor and leadership. "Music is at the center of Lakota life, " says Young Bear; he describes in rich detail the origins and varieties of Lakota song and dance. Severt Young Bear performed with the Porcupine Singers throughout North America, taught at Oglala Lakota College, and served on the Oglala Sioux tribal council. He was music and dance consultant for the films *Dances with Wolves* and *Thunder Heart*. This book is the fruit of his longfriendship and collaboration with R. D. Theisz, a fellow Porcupine Singer and professor of communications and education at Black Hills State University. [Regent's Wolf Princess](#) Berghahn Books

By the end of the 1980s, the once mighty U.S. steel industry seemed on its last legs, with more than a quarter of a million jobs lost overseas. Yet today the industry stands again as a world-class competitor. This fascinating book illuminates the forces behind this remarkable comeback, illustrating valuable lessons for managers in any business now battling the global marketplace. 12 illustrations.

In the coastal town of Surfbreak, Molly Snow explores mysterious stories that whirl around a brave explorer who ventured here long ago. Why did the maps Alfred Aowl drew of the region depict places that don't exist? And how did he die? Soon her interest in Aowl and his feud with the Indians resurrects dark forces only a shaman can understand.

Wolf populations have recently made a comeback in Northern Europe and North America. These large carnivores can cause predictable conflicts by preying on livestock, and competing with hunters for game. But their arrivals often become deeply embedded in more general societal tensions, which arise alongside processes of social change that put considerable pressure on rural communities and on the rural working class in particular. Based on research and case studies conducted in Norway, *Wolf Conflicts* discusses various aspects

of this complex picture, including conflicts over land use and conservation, and more general patterns of hegemony and resistance in modern societies.

She, a nameless reporter from the 21st century, had somehow turned into a wolf! She felt that in this world, there was no one who had a more ridiculous experience than her! He, the Regent of the Heavenly Enlightenment, had power and influence. On his way back to the city, he accidentally saved 'it' from the tiger's mouth. However, he did not know that 'it' was actually a person. One afternoon, a servant girl ran over anxiously to report, "Prince, it's bad. The white wolf bit Miss Zhang!" The maidservant hurriedly came to report, but when Xiao Wang heard this, his eyebrows shot up, "I already disliked that woman a long time ago. The wolf did quite well. I'll give it a chicken leg at noon." Servant girl: "...". When the empress dowager was invited to the palace for dinner, her father-in-law came up to her with an ugly expression and said, "Prince, your beloved wolf killed off the empress dowager's pet. How do you think we should handle this?!" Prince Xiao was still calm. "It's just a cat. Just bury it if it dies." For the last time, a maid from his house rushed into his study: "My lord, this time something big has happened! The White Wolf it... He walks in the garden... "He suddenly became a human!" This time, King Xiao could no longer remain calm. His eyes lit up as he stood up from his chair and ran towards the garden!

Winner of the 2014 Oklahoma Book Award for nonfiction Winner of the 2014 Pate Award from the Fort Worth Civil War Round Table. When the peoples of the Indian Territory found themselves in the

midst of the American Civil War, squeezed between Union Kansas and Confederate Texas and Arkansas, they had no way to escape a conflict not of their choosing--and no alternative but to suffer its consequences. When the Wolf Came explores how the war in the Indian Territory involved almost every resident, killed many civilians as well as soldiers, left the country stripped and devastated, and cost Indian nations millions of acres of land. Using a solid foundation of both published and unpublished sources, including the records of Cherokee, Choctaw, and Creek nations, Mary Jane Warde details how the coming of the war set off a wave of migration into neighboring Kansas, the Red River Valley, and Texas. She describes how Indian Territory troops in Unionist regiments or as Confederate allies battled enemies--some from their own nations--in the territory and in neighboring Kansas, Missouri, and Arkansas. And she shows how post-war land cessions forced by the federal government on Indian nations formerly allied with the Confederacy allowed the removal of still more tribes to the Indian Territory, leaving millions of acres open for homesteads, railroads, and development in at least ten states. Enhanced by maps and photographs from the Oklahoma Historical Society's photographic archives, When the Wolf Came will be welcomed by both general readers and scholars interested in the signal public events that marked that tumultuous era and the consequences for the territory's tens of thousands of native peoples.

After moving to Billings, Montana, things

are finally looking up for the Shannon family Frank, Eileen, and their two children nine-year-old Jimmy Lee and seven-year-old Jodie. But when Jimmy is unjustly accused of stealing a gold medallion from his father's workplace, he runs away to the mountain wilderness. After being mistreated by his parents for years, Jimmy feels this is the best option for him. Mr. Shannon organizes a search party to look for Jimmy. After two weeks of looking, the sheriff asks a local Indian tribe for its help. The two men assigned to the task find Jimmy's tracks, and they follow them for days. At the end of the trail, they discover a large pool of blood where a fight has taken place. All signs indicate Jimmy was attacked by a wild animal, but no remains are found.

Meanwhile, with Bear, a wolf pup, Jimmy struggles to survive on what he knows, encountering an array of challenging situations foraging for food, fighting off wild animals, braving the ever-changing weather conditions, and finding makeshift shelter. Like the mountain men in the 1800s, Jimmy survives by relying on his wits and wonders every day whether he will live or die.

From gloomy times in the 1980s, the American labor movement has returned to apparent prominence through the efforts of a new generation of energetic and progressive leaders. A distinguished group of authors examines this resurgence and the potential of American unions with sympathetic yet critical eyes. Experts from a wide variety of disciplines—industrial relations, political science, economics, and sociology—identify the central developments, analyze the strengths and weaknesses of the new initiatives, and assess the progress made and the

prospects for the future. Though all agree on the importance of unions, their opinions of the success of current renewal efforts diverge greatly. The interdisciplinary and comparative approach of *Rekindling the Movement* is both challenging and enlightening. Rather than merely trumpeting pet opinions, contributors provide hard evidence and causal analysis, grounded in realistic perspectives, to back up suggestions for the improvement of the new labor movement. Their straightforward observations about what is and is not possible, what does and does not work, will be of great practical value for policymakers and union leaders.

A variety of disciplines and professions have embraced geospatial technologies for collecting, storing, manipulating, analyzing and displaying spatial data to investigate crime, prosecute and convict offenders, exonerate suspects and submit evidence in civil lawsuits. The applications, acceptability and relevance and procedural legality of each geospatial technology vary. The purpose of this book is to explain the nature of geospatial technologies, demonstrate a variety of geospatial applications used to investigate and litigate civil and criminal activities and to provide a reference of current acceptability of geospatial technology in the production of evidence. This book is an introductory overview designed to appeal to researchers and practitioners across disciplinary boundaries. The authors of this book are researchers and practitioners across disciplines and professions, experts in the field.

This three-volume set concludes ABC-CLIO's groundbreaking series on the Industrial Revolution as it played out in the United States, offering volumes on the communications industry and the agriculture and meatpacking industries—plus a concluding overview volume on the causes, courses, and interconnections among the industries that brought such dramatic change to our lives. The concluding three-volume set in ABC-CLIO's landmark Industrial Revolution in America series offers vivid reminders of how this economic renaissance changed virtually every facet of American life. Communications takes readers from the telegraph to the telephone and beyond, showing how improvements in communication (aided by better transportation) helped create a truly national marketplace. Agriculture and Meatpacking details the shift of agriculture from family farms and local trade to mass production and agribusiness, sparking the development of a full range of farm machinery and spawning the rise of a new metropolis

practically overnight. The concluding Overview/Comparison volume looks at the Industrial Revolution as a whole—revealing the impact of various industries on each other and gauging the revolution's broader social and political legacy in the United States and around the world.

This groundbreaking collection focuses on what may be, for cultural studies, the most intriguing aspect of contemporary globalization—the ways in which the postnational restructuring of the world in an era of transnational capitalism has altered how we must think about cultural production. Mapping a "new world space" that is simultaneously more globalized and localized than before, these essays examine the dynamic between the movement of capital, images, and technologies without regard to national borders and the tendency toward fragmentation of the world into increasingly contentious enclaves of difference, ethnicity, and resistance. Ranging across issues involving film, literature, and theory, as well as history, politics, economics, sociology, and anthropology, these deeply interdisciplinary essays explore the interwoven forces of globalism and localism in a variety of cultural settings, with a particular emphasis on the Asia-Pacific region. Powerful readings of the new image culture, transnational film genre, and the politics of spectacle are offered as is a critique of globalization as the latest guise of colonization. Articles that unravel the complex links between the global and local in terms of the unfolding narrative of capital are joined by work that illuminates phenomena as diverse as "yellow cab" interracial sex in Japan, machinic desire in Robocop

movies, and the Pacific Rim city. An interview with Fredric Jameson by Paik Nak-Chung on globalization and Pacific Rim responses is also featured, as is a critical afterword by Paul Bové.

Positioned at the crossroads of an altered global terrain, this volume, the first of its kind, analyzes the evolving

transnational imaginary—the full scope of contemporary cultural production by which national identities of political allegiance and economic regulation are being undone, and in which imagined communities are being reshaped at both the global and local levels of everyday existence.
