The 1995 to present eruption of Soufrière Hills Volcano on Montserrat is one of the most important and best-studied eruptions of an explosive andesitic volcano. This volume presents scientific findings from the period between 2000 and 2010; it follows on from Memoir 21, which focused on the early years of activity between 1995 and 1999. In addition to descriptions and analysis of the growth, collapse and explosions associated with lava domes, there are papers on the deformation of the volcano caused by the deep magma, the petrology and geochemistry of the lavas and associated gases. Of particular note are: an overview of the insights into the deep structure of the volcano that resulted from a major international seismic tomography experiment; and an analysis of the quantitative risk assessment process that has run now for most of the eruption, the longest such continuous assessment in the world.

Dan Baum is a gun fanatic. He is also Jewish Democrat who grew up in suburban New Jersey. In Gun Guys, he takes us on a guided tour of gun stores and gun shows, shooting ranges and festivals, contests and auctions, trying to figure out what draws so many of us to guns in the first place. Is it just part of being American? Introducing a wide cast of characters, Baum shows both sides of the gun culture in America, bringing an entire world vividly to life, and in doing so helping to find a middle ground in the gun debate, where actual conversation can take place.

This unique and encyclopedic reference work describes the evolution of the physics of modern shock wave and

detonation from the earlier and classical percussion. The history of this complex process is first reviewed in a general survey. Subsequently, the subject is treated in more detail and the book is richly illustrated in the form of a picture gallery. This book is ideal for everyone professionally interested in shock wave phenomena.
