Many fans of drag racing consider the most interesting era to be from the 1950s through the 1970s, the years when the sport really took off. During that period, so much changed from a speed and technology standpoint that people often refer to this time as the golden age of drag racing. Drivers often became associated with a particular manufacturer, such as Chevy, Ford, or Chrysler through sponsorship, factory team rides, or sometimes simply their own preference. The more successful drivers became household names in the drag racing community. Chevy had Grumpy Jenkins, Pontiac had Arnie "the Farmer" Beswick, Mopar had Sox & Martin and Dandy Dick Landy, and Ford's most successful driver of the era was the legendary "Dyno Don" Nicholson. Nicholson's first wins on a national level were actually in the early 1960s in Chevrolet products. He became extremely

successful on the match-race circuit. Then, in 1964, he switched over to Mercury with the new Comet after General Motors enacted a factory ban on racing activities. He won 90 percent of his match races that year. He stuck with Ford and Mercury products and won throughout the 1960s and 1970s, even after Ford also pulled the plug on factory team sponsorship. He made it to the final rounds in nearly 50 national events during that period, in addition to winning championships, awards, and match races along the way. If you are a fan of a certain era of racing, a Ford fan, or certainly a "Dyno Don" fan, this book will be a welcome addition to your library.

Trends in automotive modification come and go, some outlandish, some practical. Currently, the trend called "Pro Touring," while expensive, definitely leans toward the practical.

Originally a term coined for GM cars, the term Pro Touring has come to mean a style of all cars, and many eras. Pro Touring is essentially the art of adding modern technology to aged designs, creating cars that stop, start, handle, drive, and behave just as modern performance cars do. You can do this in many ways and choose from many suppliers. Detroit Speed is at the forefront of the Pro Touring movement. Both a parts manufacturer and car builder, the company is in a unique position not only to design and manufacture parts, but to build cars and test the parts for their effectiveness on the street and track. Kyle and Stacy Tucker have put their considerable skill in engineering and market savvy to create a unique company to lead the Pro Touring movement. Not only do you learn about the history of the company and how they design their performance parts, install sections cover front sub-frame assemblies, rear suspension assemblies, wheel tubs, fuel system upgrades, brake upgrades, driveline upgrades including an LS swap, cooling system upgrades, and more. The featured cars are customer builds as well as DSE test cars, which include a host of different Chevrolet products, a 1966 Mustang and a 1969 Charger. Detroit Speed's How to Build a Pro Touring Car is a vital edition to every performance enthusiast's library. *1963 Chevy II Shop Manual Supplement* Faxon Auto Literature Straight from the auction block! With its light weight and high-performance V-8 engines, Chevrolet's Nova SS was one of the most popular performance cars of the '60s. Nova SS enjoyed its greatest popularity and performance from 1962 to 1972, the period that's the focus of this book. The Nova was a sleeper, a car that might look plain but might also have a powerful Chevy small-block V-8 under its hood. In Nova SS trim, it carried SS (Super Sport) badges that revealed its performance potential and earned it a full measure of respect on the street. This book shows Nova SS models from throughout its decade of glory, including rare models with big-block engines.
