### **Bankers Handbook for Asia** Partridge Africa

Cyber risk has emerged as a key threat to financial stability, following recent attacks on financial institutions. This paper presents a novel documentation of cyber risk around the world for financial institutions by analyzing the different types of cyber incidents (data breaches, fraud and business disruption) and identifying patterns using a variety of datasets. The other novel contribution that is outlined is a quantitative framework to assess cyber risk for the financial sector. The framework draws on a standard VaR type framework used to assess various types of stability risk and can be easily applied at the individual country level. The framework is applied in this paper to the available cross-country data and yields illustrative aggregated losses for the financial sector in the sample across a variety of scenarios ranging from 10 to 30 percent of net income.

The fourth edition of the reference for export/import professionals is revised to include new forms and instructions, new US Customs Service checklists, and new Automated Export System procedures. It overviews the entire export/import process and provides ready-to-use forms with instructions, cost-saving shortcuts, and tips on building a better operation. A training manual for new employees is included, plus a quick course on advanced techniques for more experienced professionals. There is also a glossary of 250 international trade terms. New to this edition is a section on e-commerce in international marketing, listings for export and import software, and a list of Web sites for 94 export and import agencies and information sources. Johnson is a partner in an international trade law firm. Annotation copyrighted by Book News, Inc., Portland, OR

**The Bank Directory** Nam H Nguyen

Electronic Value Exchange examines in detail the transformation of the VISA electronic payment system from a collection of non-integrated, localized, paper-based bank credit card programs into the cooperative, global, electronic value exchange network it is today. Topics and features: provides a history of the VISA system from the mid-1960s to the early 1980s; presents a historical narrative based on research gathered from personal documents and interviews with key actors; investigates, for the first time, both the technological and social infrastructures necessary for the VISA system to operate; supplies a detailed case study, highlighting the mutual shaping of technology and social relations, and the influence that earlier information processing practices have on the way firms adopt computers and telecommunications; examines how "gateways" in transactional networks can reinforce or undermine established social boundaries, and reviews the establishment of trust in new payment devices.

*Movers, Shakers, Moaners & Groaners* Nam H Nguyen

This book examines the nature of retail financial transaction infrastructures. Contributions assume a long-term outlook in their exploration of the key financial processes and systems that support a global transition to a cashless economy. The volume offers both modern and historic accounts that demonstrate the constantly changing role of payment instruments. It brings together different theoretical approaches to the study, re-examining and forecasting changes in retail payment systems. Chapters explore a global transition to a cashless society and contemplate future alternatives to cash, cheques and plastic, featuring the perspectives of academics from different disciplines in conversation and industry participants from six continents. Readers are invited to discover the innovation in payment systems and how it co-evolves with changes in society and organisations through personal, corporate and governmental processes.

With cryptocurrencies like Bitcoin on the rise, many wonder if these digital currencies could be the exchange medium of the future, but what are cryptocurrencies and the blockchain technology that facilitates them? Blockchain technology involves linking a series of digital records through cryptography without the use of a centralized server, which when applied to asset exchange creates cryptocurrencies. However, there are various concerns about the ability to regulate cryptocurrencies, their stability, and whether they can be applied on a global scale. This volume enables readers to better understand these new technologies and the controversies surrounding them.

*Transito* Nam H Nguyen

The revelations in this book are critical for the cash-in-transit (CIT) companies, financial services

industries and criminal justice system alike. Propelled by excessive greed, CIT robberies are executed ruthlessly with no respect for human life. The book epitomises and demonstrates how 'the love of money could be root cause of evil'. The book will assist the stakeholders within the criminal justice system to circumvent the stratagems of these robbers and mete out punishment proportional to the crime.
