 This book shows students and practitioners how to develop social marketing programs through a simple, six-step process of strategic planning and design. Nedra Kline Weinreich starts by introducing the concept of social marketing and then walks the reader through each of the six steps of the process: analysis, strategy development, program and communication design, pretesting,

implementation, and evaluation and feedback. The Second Edition incorporates developments in marketing practice over the last 10 years and focuses on how to apply the design approach to campaigns to effect behavior change. All organizations can do social marketing, Weinreich insists, if they follow the steps and start to think from a social marketing perspective.

 Think Sex Ed Is All About The "Facts of Life"? Think Again. If you think sex education is still about the birds and the bees, think again. And it's not about science either. In her shocking exposé, You're Teaching My Child What?, Dr. Miriam Grossman rips back the curtain on sex education today, exposing a sordid truth. Today's sex ed programs aren't based on science; they're based on liberal

lies and politically correct propaganda that promote the illusion that children (yes, children) can be sexually free without risk. As a psychiatrist and expert on sexual education, Dr. Grossman cites example after example of schools and organizations whitewashing—or omitting altogether—crucial information that doesn't fit in with their "PC" agenda. Instead, sex educators only tell teens the "facts of life" that promote acceptance, sexual exploration, and experimentation. What sex educators call an education, scientists would call a scam: • Sex educators won't tell girls their bodies are biologically and chemically more susceptible to STDs; they will only say 3 million girls have a sexually transmitted infection • Educators say it's natural for children to "explore" their sexuality from a young age and only they can decide when it's right to have sex—the real truth is neurobiologists say teen brains are not developed to fully reason and weigh consequences, especially in "the heat of the moment" • Teens are told condoms, vaccines and yearly testing provide adequate protection, without being told that studies now show condoms are no match for herpes, HPV and gonorrhea In *You're Teaching My Child What?*, Dr. Grossman reveals biological truths that you won't find in today's classrooms. *You're Teaching My Child What?* is critical reading for parents with teens and instrumental in teaching children the truth about sex.

Drug Abuse (NIDA) funded research project on drug information and online drug-related communities. The editors of this pivotal text, Edward Murguia, Ann Lessem, and Melissa Tackett-Gibson, elevate the debate about drug use and the Internet from a polemic discourse to social scientific investigation. The essays confront issues related to the study of drug communication online, including the causal factors of abuse as discussed in online forums, the relationship between music and drug use in virtual communities, and the ways in which individuals assess the accuracy of online drug information. This book highlights the variety of ways to examine drug use as a social problem and presents several theoretical perspectives valuable to online research. *Real Drugs in a Virtual World* is an enlightening and thought provoking read that will appeal to sociology students and those interested in virtual communities.

Introducing Electronic Text Analysis is a practical and much needed introduction to corpora - bodies of linguistic data. Written specifically for students studying this topic for the first time, the book begins with a discussion of the underlying principles of electronic text analysis. It then examines how these corpora enhance our understanding of literary and non-literary works. In the first section the author introduces the concepts of concordance and lexical frequency, concepts which are then applied to a range of areas of language study. Key areas examined are the use of on-line corpora to complement traditional stylistic analysis, and the ways in which methods such as concordance and frequency counts can reveal a particular ideology within a text. Presenting an accessible and thorough understanding of the underlying principles of electronic text analysis, the book contains abundant illustrative examples and a glossary with definitions of main concepts. It will also be supported by a companion website with links to on-line corpora so that students can apply their knowledge to further study. A clear explanation about what website visitors do and don't want, and how to create a site that really works hard to attract, engage and keep people returning to it, and raving about it to their friends. Addressing the issues of planning, copywriting and specific content, David Kelly uses his expertise as CEO of one of New Zealand's top website development companies to unravel the mysteries of this complex subject. This book is written with a clear eye on the importance of marketing as part of the overall focus of building and maintaining a great website, and David provides excellent case studies, examples and tools for the reader to easily understand and use. Not too basic for professionals in the business, neither is this book too technical for anyone new to the world of web management and design, including most managers and business owners.
