L'avenir du travail en Afrique se penche sur deux questions fondamentales : comment créer des emplois productifs et comment subvenir aux besoins des laissés-pour-compte. Le rapport met en lumière comment l'adoption des technologies numériques, conjuguée à d'autres phénomènes mondiaux, transforme la nature du travail en Afrique subsaharienne et pose un défi en même temps qu'elle crée de nouvelles possibilités. Les auteurs montrent que les nouvelles technologies ne sont pas simplement synonymes de destruction d'emplois, comme on le craint généralement, mais qu'elles peuvent permettre aux pays africains de construire un monde du travail inclusif et offrir des opportunités aux travailleurs les moins qualifiés. Pour exploiter ces opportunités, cependant, il est indispensable de mettre en place des politiques publiques et de réaliser des investissements productifs dans quatre domaines principaux. Il faudra notamment promouvoir des technologies numériques inclusives, développer le capital humain d'une main-d'œuvre jeune, globalement peu qualifiée et qui s'accroît rapidement, augmenter la

productivité des entreprises et des travailleurs du secteur informel et élargir la couverture de la protection sociale pour atténuer les risques liés aux bouleversements du marché du travail. Le présent rapport, prolongement du Rapport sur le développement dans le monde 2019 de la Banque mondiale, aborde en conclusion d'importantes questions de politique publique qui viendront alimenter de futurs travaux de recherche permettant de guider les pays africains sur la voie d'une croissance plus inclusive.

In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order

service is available for the Series and out-of-print volumes are available on microfiche.

While countless books have chronicled the wrongful conviction of French military officer Alfred Dreyfus, his ensuing trials, and his eventual exoneration, this distinctive volume examines France's Dreyfus Affair (1894–1906) with a critical eye, analyzing the actions of its main protagonists, the rise of the public intellectual, and the Affair's continued relevance. After a brief overview of the events to establish the poisoned ideological climate of the day, the work explores how intellectuals like Bernard Lazare, Émile Zola, and others contributed to the Affair, defining both it and themselves in the process. With mini-portraits of the key players and a detailed chronology, this telling book combines rigorous scholarship with cultural commentary to demonstrate the continued relevance of the example set by Dreyfus and his many supporters.

A Report on National Planning and Public Works in Relation to Natural Resources and Including Land Use and Water Resources: Report of the Land Planning Committee Routledge

Spain is facing an increasingly difficult situation in terms of water stress. This is an issue that is due mostly to poor management practices in all sectors. Large amounts of water have been used for agricultural purposes at very low prices for too long; there is an uncontrolled use of most aquifers in rural areas which result from ineffective control by the public administration; per capita consumption continues increasing as well as water used for industrial and energy generation, the construction and tourism sectors and for recreation activities. In fact, they have all exerted additional pressure on available water resources. In order to face the above challenges, water policy has made a gradual shift towards more rational and sustainable management of water resources. This has also been influenced by the European Water Framework Directive about which, as the book discusses, there are both myths and misunderstandings. This book analyses the very complex position of all sectors in the country, the alternatives available and the challenges ahead. In so doing, it makes an important contribution to the literature on water resources

management. This book was published as a special issue of the International Journal of Water Resources Development.

Originally published in 2000, this book highlights the interest Sedaine's life and work is now, belatedly, provoking in many scholarly disciplines. If Sedaine speaks today to literary history, theatre history and opera studies, it is because he possessed a multivalent vision, one which accounts for both his past neglect and is present rediscovery. Like many others, he believed that the established, 'official' genres needed to be reformed; unlike many, he made it his business to transform the actual language and operation of the theatre arts he practised. Until late eighteenth-century opera and drama in France become better understood, Sedaine's immense importance for the development of Romantic opera and theatre risks remaining generally concealed; to reveal something of this importance is one main reason for publishing the present volume. This book includes chapters on Sedaine and the question of genre, the representation of the female in the dramas of Sedaine, and the words, gestures and other signs in the era of

Sedaine.

In recent years, the search for innovative, locally relevant and engaging public service has become the new philosophers’ stone. Social procurement represents one approach to maximising public spending and social value through the purchase of goods and services. It has gained increasing attention in recent years as a way that governments and corporations can amplify the benefits of their purchasing power, and as a mechanism by which markets for social enterprise and other third sector organisations can be grown. Despite growing policy and practitioner interest in social procurement, there has been relatively little conceptual or empirical thinking published on the issue. Taking a critically informed approach, this innovative text examines emerging approaches to social procurement within the context of New Public Governance (NPG), and examines the practices of social procurement across Europe, North America, and Australia. Considering both the possibilities and limitations of social procurement, and the types of value it can generate, it also provides empirically-driven insights into the practicalities of ‘triple bottom line’ procurement, the related challenges of

measuring social value and the management of both the strategic and operational dimensions of procurement processes. As such it will be invaluable reading for all those interested in social services, public governance and social enterprise.

Minutes of Proceedings and Evidence

Martinus Nijhoff Publishers
S'inscrivant dans le cadre des activités de l'Observatoire juridique Natura 2000, le thème du présent ouvrage porte sur les questions juridiques que soulève l'application par le juge national – constitutionnel, administratif et judiciaire – des dispositions relatives à Natura 2000, en vue d'évaluer la contribution du juge à l'effectivité de ces dernières. Corps de règles complexe, technique, faisant appel à des concepts scientifiques ardues à interpréter pour un non-scientifique, le régime Natura 2000 n'est guère aisé à appliquer pour un juge non spécialisé. Le recours à l'expertise est souvent indispensable pour déterminer dans quelle mesure tel ou tel standard – par exemple le caractère « significatif » d'un impact – a été respecté ou non. Pour cette raison, les solutions trouvées par le juge aux différents problèmes que pose l'application du régime Natura 2000 dans les différents États membres méritent l'attention et sera enrichissante tant pour le chercheur que pour le praticien. As part of the activities of the Legal Observatory Natura 2000, this book focuses on legal issues arising from the implementation by the national courts – constitutional, administrative and judicial ones – of the provisions relating to Natura 2000, in order to assess the contribution of the judge to the effectiveness of this regime. The enforcement of this legislation, which encompasses a complex body of technical rules, grounded on scientific

concepts difficult to interpret for a non-scientist, is not easy to apply by a non-specialized judge. The use of expertise is essential to determine how a particular standard – for example the «significant» character of an impact – has been met or not. For this reason, the solutions found by the judge to the various problems arising from the application of the Natura 2000 provisions in the different Member States deserve attention and will be rewarding for both researchers and practitioners.
