Come along on Mustang's wild ride to automotive success. In the early 1960s, Lee Iacocca - then director of the Ford division at Ford Motor Company - convinced Henry Ford II to produce a sporty four-seat car aimed at the emerging youth market. That car,

essentially a reconfigured and re-skinned Falcon economy car, became the Ford Mustang, and it changed the automotive world like no other car before or since. In *Ford Mustang: America's Original Pony Car*, acclaimed Mustang writer Donald Farr celebrates this unbroken lineage of muscle. He chronicles the car's phenomenal first-year sales, the new pony car category it pioneered, and subsequent models that include the Mustang GT, Shelby GT350, Shelby GT500, Super Cobra Jet, Boss 302, and Boss 429 - all part of a line of American performance cars that continues to this day. Created in cooperation with Ford Motor Company and featuring some 400 photos from its historic and media archives, *Ford Mustang* is a must on the bookshelf of

any muscle car or Ford aficionado.

This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than forty-five years, pulls no punches.

**The Detroit Almanac** Haynes Publications

We are living through a time when old identities - nation, culture and gender are melting down. Spaces of Identity examines the ways in which collective cultural identities are being reshaped under conditions of a post-modern geography and a communications environment of cable and satellite broadcasting. To address current problems of identity, the authors look at contemporary politics between Europe

and its most significant others: America; Islam and the Orient. They show that it's against these places that Europe's own identity has been and is now being defined. A stimulating account of the complex and contradictory nature of contemporary cultural identities.
