Quality Assurance (QA) is an integral and very important part of laboratory medicine. Pathologists, microbiologists, biochemists and laboratory technicians all need to be proficient in this subject. QA is also mandatory for obtaining accreditation, which ensures a certain level of quality in services being provided. The subject of Quality Assurance (QA), though not new, is a relatively neglected entity and is looked at with some degree of apprehension. This book is addressed to those entrusted with implementing Quality Assurance (QA) in laboratory medicine; generally, these are persons with basic

training as pathologists. This handbook is meant as a beginner and handy guide to Quality Assurance; all the basics of Quality Assurance have been incorporated to encourage the beginner to make a start.
