The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. Free, Fair, and Alive presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. Free, Fair, and Alive provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

This book presents a comprehensive account of the use and effects of foreign languages in advertising. Based on consumer culture positioning strategies in marketing, three language strategies are presented: foreign language display to express foreignness, English to highlight globalness, and local language to appeal to ethnicity (for instance, Spanish for Hispanics in the USA). The book takes a multidisciplinary approach, integrating insights from both marketing and linguistics, presenting both theoretical perspectives (e.g., Communication Accommodation Theory, Conceptual Feature Model, Country-of-origin effect, Markedness Model, Revised Hierarchical Model) and empirical evidence from content analyses and experimental studies. The authors demonstrate that three concepts are key to understanding foreign languages in advertising: language attitudes, language-product congruence, and comprehension. The book will appeal to students and researchers in the fields of sociolinguistics, applied linguistics, psycholinguistics, marketing and advertising.

SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that 'texting' provides, examining both cultural variation in countries as different as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, *The Inside Text* is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century.
