MELODY ROGERS

Rising Above the Gathering Storm, Revisited Springer Science & Business Media

Fundamental world changes that simultaneously undermine a nation-state's charisma and promote the rise of a supra-national system have wide-ranging effects upon national states within a modern global society. My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling, which are central institutions in every country. Globally, primary and secondary education initially emerged as the premier tool for nation-states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition. I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education. The analyses consist of two sections. Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970-2008. These findings show a

worldwide increase in emphasis on human rights and increases in discussions of diversity in well-established liberal democracies. Cross-national, quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia (BC), which examines nation-building within a context of strong emphasis on diversity and human rights. The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871. It also draws on a selection of historical documents, including Ministry of Education reports, curricular frameworks, and high school exit exams. Process-wise, I find the incorporation of human rights and diversity reflects macro-level changes in national and global society. Content-wise, I find four main approaches to reconciling ideas of human rights and diversity with national identity: (1) framing human rights and multiculturalism as part of national identity, (2) using pedagogical approaches that promote multiple perspectives and individual agency, (3) celebrating social and scientific figures and accomplishments as the source of national pride, and (4) drawing on exogenous sources to affirm state legitimacy. This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of

this trend. A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world. Further, students are increasingly taught that the global civil society and non-state actors are important and legitimate agents of social change.

A Mighty Long Way Arnold Pub Limited

Twenty-three contributors turn a critical lens on the dominant music education paradigm to examine how we teach, what we teach, for what we teach, what is expected of teachers and how we teach them, whom we should be teaching, and the very assumptions and structures of which we base our practice.

Progress in Reading Literacy Waxmann Verlag

This book is an introduction to the language and standard proof methods of mathematics. It is a bridge from the computational courses (such as calculus or differential equations) that students

typically encounter in their first year of college to a more abstract outlook. It lays a foundation for more theoretical courses such as topology, analysis and abstract algebra. Although it may be more meaningful to the student who has had some calculus, there is really no prerequisite other than a measure of mathematical maturity.

When Nora and Tad observe a squirrel reading a little newspaper and their dog behaving strangely, they decide their new neighbor is a witch.

The Learning and Teaching of Geometry in Secondary Schools Stanford University

When *The Vertical Mosaic* first appeared in 1965, it became an instant classic. Its key message was that Canada was not the classless democracy it fancied itself to be. In fact, Canada was a highly inequalitarian society comprising a 'vertical mosaic' of distinct classes and ethnic groups. This collection of papers by five of Canada's top sociologists subjects John Porter's landmark study to renewed scrutiny and traces the dramatic changes since Porter's time - both in Canadian society and in the agenda of Canadian sociology. Based on papers written for a conference held in commemoration of the thirtieth anniversary of *The Vertical Mosaic's* publication, the five essays revisit the central themes of the original work, including gender and race inequality; citizenship and social justice; and class, power, and ethnicity from the viewpoint of political economy. An introduction by the editors provides a historical biography of Porter and discusses his influence on Canadian sociology.

The Vertical Mosaic Revisited Routledge

In *World History: Societies of the Past*, students explore societies of the past and see the influences and impact history has on their lives today. The textbook provides students with an easy-to-understand and in-depth look at human societies?from early hunters-gatherers to ancient societies to the beginnings of modern-day societies (1850 CE). A chronological approach explores social, environmental, political, economic, cultural, and technological issues that remain relevant in today's world. To help your students visualize historical situations and events, the textbook includes: hundreds of vibrant illustrations and historical artwork detailed maps, diagrams, and charts informative timelines questions, summaries, and quick facts stories of everyday people Recommended by Manitoba Education, Citizenship and Youth as a Manitoba Grade 7 Social Studies Learning Resource. recommended for British Columbia grade 7 classrooms

[Teaching the Violent Past](#) Routledge

This book provides a thorough review of the research literature on the effect of school size in primary and secondary education on three types of outcomes: student achievement, non-cognitive outcomes and costs per student. Based on 84 scientific publications and several prior reviews, the book discusses four main areas: the impact of school size on cognitive learning outcomes and non-cognitive outcomes; the "state of the art" of empirical research on economies of size; the direct and indirect impact of school size, conditioned by other school context variables on student performance and the specific position of the Netherlands in an international perspective. The book presents summaries of the results and main conclusions found and discusses these with respect to their relevance for educational policy in general and for the Netherlands in particular. The book concludes with suggestions for future research on school size.

Red Sings from Treetops University of Toronto Press

Educators require constructive information that details their students' comprehension and can help them to advance the learners' education. Accurate evaluation of students at all educational levels and the implementation of comprehensive assessment strategies are essential for ensuring student equality and academic success. The *Handbook of Research on Formative Assessment in Pre-K Through Elementary Classrooms* is an essential research publication that addresses gaps in the understanding of formative assessment and offers educators meaningful and comprehensive examples of formative assessment in the Pre-K through elementary grade levels. Covering an array of topics such as literacy, professional development, and educational technologies, this book is relevant for instructors, administrators, education professionals, educational policymakers, pre-service teachers, academicians, researchers, and students.

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids including a PowerPoint presentation for each chapter. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Minority Populations in Canadian Second Language Education Hachette UK

In the face of so many daunting near-term challenges, U.S. government and industry are letting the crucial strategic issues of U.S. competitiveness slip below the surface. Five years ago, the National Academies prepared *Rising Above the Gathering Storm*, a book that cautioned: "Without a renewed effort to bolster the foundations of our competitiveness, we can expect to lose our privileged position." Since that time we find ourselves in a country where much has changed-and a great deal has not changed. So where does America stand relative to its position of five years ago when the *Gathering Storm* book was prepared? The unanimous view of the authors is that our nation's outlook has worsened. The present volume, *Rising Above the Gathering Storm, Revisited*, explores the tipping point America now faces. Addressing America's competitiveness challenge will require many years if not decades; however, the requisite federal funding of much of that effort is about to terminate. *Rising Above the Gathering Storm, Revisited* provides a snapshot of the work of the government and the private sector in the past five years, analyzing how the original recommendations have or have not been acted upon, what consequences this may have on future competitiveness, and priorities going forward. In addition, readers will find a series of thought- and discussion-provoking factoids-many of them alarming-about the state of science and innovation in America. *Rising Above the Gathering Storm, Revisited* is a wake-up call. To reverse the foreboding outlook will require a sustained commitment by both individual citizens and government officials-at all levels. This book, together with the original *Gathering Storm* volume, provides the roadmap to meet that goal. While this book is essential for policy makers, anyone concerned with the future of innovation, competitiveness, and the standard of living in the United States will find this book an ideal tool for engaging their government representatives, peers, and community about this momentous issue.

Handbook of Research on Formative Assessment in Pre-K Through Elementary

Classrooms Pearson Education

Contemporary Studies in Environmental and Indigenous Pedagogies: A Curricula of Stories and Place. Our book is a compilation of the work of experienced educational researchers and practitioners, all of whom currently work in educational settings across North America. Contributors bring to this discussion, an enriched view of diverse ecological perspectives regarding when and how contemporary environmental and Indigenous curriculum figures into the experiences of curricular theories and practices. This work brings together theorists that inform a cultural ecological analysis of the environmental crisis by exploring the ways in which language informs ways of knowing and being as they outline how metaphor plays a major role in human relationships with natural and reconstructed environments. This book will be of interest to educational researchers and practitioners who will find the text important for envisioning education as an endeavour that situates learning in relation to and informed by an Indigenous Environmental Studies and Eco-justice Education frameworks. This integrated collection of theory and practice of environmental and Indigenous education is an essential tool for researchers, graduate and undergraduate students in faculties of education, environmental studies, social studies, multicultural education, curriculum theory and methods, global and comparative

education, and women's studies. Moreover, this work documents methods of developing ways of implementing Indigenous and Environmental Studies in classrooms and local communities through a framework that espouses an eco-ethical consciousness. The proposed book is unique in that it offers a wide variety of perspectives, inviting the reader to engage in a broader conversation about the multiple dimensions of the relationship between ecology, language, culture, and education in relation to the cultural roots of the environmental crisis that brings into focus the local and global commons, language and identity, and environmental justice through pedagogical approaches by faculty across North America who are actively teaching and researching in this burgeoning field.

Kiselev's Geometry Multilingual Matters

"A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation."—Professor Charles Ogletree, Harvard Law School "Provides important context for an important moment in America's history."—Associated Press When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the "Little Rock Nine," as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

"The old way of climbing was systematic, methodical, and consistent. Now it's anything goes, reacting to every situation differently." —Tommy Caldwell • For skilled climbers who want to push to the next level • Tips and advice from Tommy Caldwell, Steph Davis, Lynn Hill, Alex Honnold and more of the world's best climbers • 250 color photographs and 12 illustrations Advanced Rock Climbing: Expert Skills and Techniques is for good climbers who want to get even better—from training to gear, sport climbing to multi-pitch efficiency, and beyond. Each chapter has detailed advice from some of the world's best climbers and guides—Tommy Caldwell, Angela Hawse, Justen Sjong, Steph Davis, Sonny Trotter, Alex Honnold, Lynn Hill, and more. Through clear, step-by-step instruction, detailed color photographs, and hard-earned wisdom, this new guide helps strong climbers increase their speed on multi-pitch climbs, conserve energy on big faces, train for tendon strength, improvise self-rescue, and more. Advanced Rock Climbing is for someone who has been climbing for several years and aspires to transition from intermediate to advanced levels, experienced climbers who are stuck in a rut, and naturally talented climbers who are climbing high grades but who may not have the experience to go further safely.

No Such Thing as a Witch University of Toronto Press

Five years and more than 100,000 copies after it was first published, it's hard to imagine anyone working in Web design who hasn't read Steve Krug's "instant classic" on Web usability, but people are still discovering it every day. In this second edition, Steve adds three new chapters in the same style as the original: wry and entertaining, yet loaded with insights and practical advice for novice and veteran alike. Don't be surprised if it completely changes the way you think about Web design. Three New Chapters! Usability as common courtesy -- Why people really leave Web sites Web Accessibility, CSS, and you -- Making sites usable and accessible Help! My boss wants me to _____. -- Surviving executive design whims "I thought usability was the enemy of design until I read the first edition of this book. Don't Make Me Think! showed me how to put myself in the position of the person who uses my site. After reading it over a couple of hours and putting its ideas to work for the past five years, I can say it has done more to improve my abilities as a Web designer than any other book. In this second edition, Steve Krug adds essential ammunition for those whose bosses, clients, stakeholders, and marketing managers insist on doing the wrong thing. If you design, write, program, own, or manage Web sites, you must read this book." -- Jeffrey Zeldman, author of *Designing with Web Standards*

Educational Research and Innovation Innovative Learning Environments OECD Publishing

During an armed conflict or period of gross human rights violations, the first priority is a cessation of violence. For the cease-fire to be more than a lull in hostilities and atrocities, however, it must be accompanied by a plan for political transition and social reconstruction. Essential to this long-term reconciliation process is education reform that teaches future generations information repressed under dictatorial regimes and offers new representations of former enemies. In *Teaching the Violent Past*, Cole has gathered nine case studies exploring the use of history education to promote tolerance, inclusiveness, and critical thinking in nations around the world. Online Book Companion is available at:

Exploring a variety of topics—including health, politics, education, art, literature, media, and film—Aboriginal Canada Revisited draws a portrait of the current political and cultural position of

Canada's Aboriginal peoples. While lauding improvements made in the past decades, the contributors draw attention to the systemic problems that continue to marginalize Aboriginal people within Canadian society. From the Introduction: "[This collection helps] to highlight areas where the colonial legacy still takes its toll, to acknowledge the manifold ways of Aboriginal cultural expression, and to demonstrate where Aboriginal and non-Aboriginal people are starting to find common ground." Contributors include Aboriginal and non-Aboriginal scholars from Europe and Canada, including Marlene Atleo, University of Manitoba; Mansell Griffin, Nisga'a Village of Gitwinksihkw, British Columbia; Robert Harding, University College of the Fraser Valley; Tricia Logan, University of Manitoba; Steffi Retzlaff, McMaster University; Siobhán Smith, University of British Columbia; Barbara Walberg, Confederation College.

Handbook of Early Language Education Mountaineers Books

IMPACT (Interweaving Mathematics Pedagogy and Content for Teaching) is an exciting new series

of texts for teacher education which aims to advance the learning and teaching of mathematics by integrating mathematics content with the broader research and theoretical base of mathematics education. *The Learning and Teaching of Geometry in Secondary Schools* reviews past and present research on the teaching and learning of geometry in secondary schools and proposes an approach for design research on secondary geometry instruction. Areas covered include: teaching and learning secondary geometry through history; the representations of geometric figures; students' cognition in geometry; teacher knowledge, practice and, beliefs; teaching strategies, instructional improvement, and classroom interventions; research designs and problems for secondary geometry. Drawing on a team of international authors, this new text will be essential reading for experienced teachers of mathematics, graduate students, curriculum developers, researchers, and all those interested in exploring students' study of geometry in secondary schools.
