*Open-Source Horizons - Challenges and Opportunities for
Collaboration and Innovation* IGI Global

"This book provides fundamental research on the architecture of learning technology systems, discussing such issues as the common structures in LTS and solutions for specific forms such as knowledge-based, distributed, or adaptive applications of e-learning. Researchers, and scholars in the fields of learning

content software development, computing and educational technologies, and e-learning will find it an invaluable resource"--
Provided by publisher.

Collaborative Public Management IOS Press

Open-Source Horizons - Challenges and Opportunities for Collaboration and Innovation dives into the world of open-source research and collaboration, exploring its impact beyond software development. This book brings together a range of voices to examine the exciting potential and ongoing challenges. You can read along to explore how open-source fosters innovation, empowers individuals and ensures wider access to knowledge.

Readers will encounter discussions on critical issues like public transparency or data privacy and ownership, along with the role of open-source in the new age of artificial intelligence. By examining these challenges, this text highlights remarkable opportunities for progress enabled by the open-source philosophy. This book aims, thus, to inspire and inform anyone interested in everything that surrounds this movement, from developers to designers and curious minds alike.

Collaborative Financial Infrastructure Protection John Wiley & Sons

This book is a comprehensive collection of chapters focusing on the core areas of computing and their further applications in the real world. Each chapter is a paper presented at the Computing Conference 2021 held on 15-16 July 2021. Computing 2021 attracted a total of 638 submissions which underwent a double-blind peer review process. Of those 638 submissions, 235 submissions have been selected to be included in this book. The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences. We hope that readers find this volume interesting and valuable as it provides the state-of-the-art intelligent methods and techniques for solving real-world problems. We also expect that the conference and its publications is a trigger for further related research and technology improvements in this important subject. .

A Digital Path to Sustainable Infrastructure Management Springer
Provides an understanding of best practices in building sustainable collaboration in intelligent community development.

Governing Cross-Sector Collaboration IGI Global

Big Science, Innovation, and Societal Contributions offers a connection between Big Science and its societal impacts from a multidisciplinary perspective, drawing on physics and astrophysics scholars to explain the reasoning behind their work, and how such knowledge can be applied to everyday life. Through simplifying complex scientific concepts, Big Science, Innovation, and Societal Contributions explains the evolution of Big Science experiments and what it takes to manage and maintain complex scientific experiments with a human centred approach. Further, it examines the motivations behind international efforts to develop capital-intensive and human resource-rich, large-scale multi-national scientific investments to solve fundamental research problems concerning our future. Drawing on reliable scientific evidence, multi-disciplinary perspectives, and personal insights from collider physics, detectors, accelerator, and telescopes research, the volume outlines the mechanisms, benefits, and methodologies, as well as the potential challenges and short-comings, of Big Science, to learn and reflect on for future initiatives. This is an open access title available under the terms of a [CC BY-NC-ND 4.0 International] licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations.

Project Management of Large Software-Intensive Systems IGI Global

Using the domain of crisis management, Christian Reuter explores challenges and opportunities for technology design in emergent environments. He therefore empirically analyzes

collaborative work in inter-organizational crisis – such as the police, fire departments, energy network operators and citizens – in order to identify collaboration practices that reveal work infrastructure limitations. He also designs, implements and evaluates novel concepts and ICT artifacts towards the support of emergent collaboration. Besides the discovery of potential organizational effects on the ability to deal with emergence he presents methodological implications for technology design.

Managing the Information Ecology Emerald Group Publishing
Faced with increased budget cuts, libraries must continue to advance their services through new technologies and practices in order to keep pace with the rapid changes society is currently facing. The once traditional in-person services offered can no longer be the only option, and to keep themselves afloat, libraries must offer more in terms of digital services. The convenience of offering mobile and digital services brings a new wave of accessibility to libraries and a new question on just how much libraries will need to change to meet the newfound needs of its patrons. Beyond offering these digital services, libraries are incorporating other types of technology in multifaceted ways such as utilizing artificial intelligence practices, social media, and big data management. Moreover, libraries are increasingly looking for ways to partner and collaborate with the community, faculty, students, and other libraries in order to keep abreast of the best practices and needs of their users. The *Research Anthology on Collaboration, Digital Services, and Resource Management for the Sustainability of Libraries* explores emerging strategies and technologies that are redefining the role of the library within communities and academia. This reference book

covers extensive ground on all the ways libraries have shifted to manage their resources, digitalize their services, and market themselves within the new technological revolution. These continued shifts for libraries come with benefits, challenges, and future projections that are critical for discussion as libraries continue to strive to remain updated and relevant in times of change. This book is ideal for librarians, archivists, collection managers, IT specialists, electronic resource librarians, practitioners, stakeholders, researchers, academicians, and students who are interested in the current state of libraries and how they are transforming to fit modern needs.

Intelligent Computing IGI Global

A Digital Path for Sustainable Infrastructure Management delivers the much sought-after guidance that the industry seeks to embrace technological advancements, establish new sustainable working practices, and foster socially valuable collaborations.

Essentials of Supply Chain Management John Wiley & Sons
Large projects, especially in the construction and infrastructure sectors, involve collaborations of many different types, such as built-own-operate, public-private partnership, or competitive dialogue. This monograph details the authors' research on the types of collaborative projects. The research undertaken for this book responds to the need for a taxonomy of relationship-based procurement approaches, a particular type of project alliancing in need of standardization. Recommendations are made based on interviews with 36 subject matter experts from several countries, as well as an extensive literature review

This volume describes, analyzes, and critiques the design and evolution of the Laboratory for Analytic Sciences (LAS), a National Security Agency-funded big data laboratory. The LAS consists of teams of intelligence personnel, who provide practical understanding of needs, targets, and tradecraft, working collaboratively with university scholars and industry partners of varying disciplines to bring their collective expert knowledge and understanding to improve the tools and tradecraft of intelligence. This book details the theoretical and practical lessons that can be drawn from the LAS for the development of cross-sector, interdisciplinary collaboration. It will inform scholars and practitioners in intelligence, communication, design, management, public policy, political science, and indeed all arenas currently grappling with the desire to engage multiple and diverse stakeholders in the research and development of innovative solutions to the world's most challenging problems.

Big Ideas in Collaborative Public Management Springer Science & Business Media

"In the current business landscape, many business firms compete in one project and cooperate in another related project, and they do so at the same time. Even more interesting is that certain members of these firms are involved in both projects. This book examines this new business landscape"--Résumé de l'éd.

Architecture Solutions for E-Learning Systems John Wiley & Sons

Building the Agile Enterprise with Capabilities, Collaborations and Values, Second Edition covers advances that make technology more powerful and pervasive while, at the same time, improving

alignment of technology with business. Using numerous examples, illustrations, and case studies, Fred Cummins, an industry expert, author and former fellow with EDS and Hewlett Packard, updates his first edition incorporating the following industry developments: The ubiquitous use of the Internet along with intelligent, mobile devices, which have enabled everyone and everything to be connected anytime, anywhere The emergence of a "business architecture discipline that has driven improvements in business design and transformation practices The development of CMMN (Case Management Model and Notation) that will provide automation to support the collaboration of knowledge workers and managers The development of VDML (Value Delivery Modeling Language) that supports modeling of business design from a management perspective The importance of "big data management and analysis as a new source of insight into evolution of the business and the ecosystem How the architecture of the agile enterprise and business modeling change enterprise governance, management and innovation Building the Agile Enterprise with Capabilities, Collaborations and Values, Second Edition is a must have reference for business leaders, CTOs; business architects, information systems architects and business process modeling professionals who wish to close the gap between strategic planning and business operations as well as the gap between business and IT and enhance the creation and delivery of business value. Explains how business design abstraction based on collaborations, capabilities and values provides a management view of how the business works, the aspects to be improved or changed, and the means to quickly reconfigure to

address new business challenges and opportunities Discusses how technology must be exploited for efficiency, effectiveness, innovation and agility Provides practicable and use-case based insights from advisory work with Fortune 100 and 500 companies across multiple verticals Presents the features of CMMN (Case Management Model and Notation) and explains how it enables automation to support knowledge workers, managers and enterprise agility Describes application of the Value Delivery Modeling Language (VDML) to link strategic business transformation to operational design

Public Administration and the Modern State CRC Press
Necessity is the mother of invention; challenging times can provide new opportunities that must be detected and exploited at the right moments. The COVID-19 pandemic has demonstrated that it is not only an issue of healthcare but also a challenge for the global economy, business, and society. Organizations have rapidly deployed technology solutions that enable them to work and service remotely and continue most of their normal operations. The Handbook of Research on Technologies and Systems for E-Collaboration During Global Crises focuses on emerging technologies and systems, strategies, and solutions for e-collaboration. This book assesses the importance of technologies and systems for e-collaboration in dealing with emerging crises such as pandemics. Covering topics such as deep learning processes, machine vision, and profit-sharing models, it is an essential resource for computer scientists, public officials, engineers, students and professors of higher education, healthcare administration, programmers, researchers, and academicians.

Web Services: Concepts, Methodologies, Tools, and Applications Oxford University Press

Networks and other collaborations are central to the public sector's ability to respond to their diverse responsibilities, from international development and regional governance, to policy development and service provision. Great strides have been made toward understanding their formation, governance and management, but more opportunities to explore methodologies and measures is required to ensure they are properly understood. This volume showcases an array of selected research methods and analytics tools currently used by scholars and practitioners in network and collaboration research, as well as emerging styles of empirical investigation. Although it cannot attempt to capture all technical details for each one, this book provides a unique catalogue of compelling methods for researchers and practitioners, which are illustrated extensively with applications in the public and non-profit sector. By bringing together leading and upcoming scholars in network research, the book will be of enormous assistance in guiding students and scholars in public management to study collaboration and networks empirically by demonstrating the core research approaches and tools for investigating and evaluating these crucially important arrangements.

Emergent Collaboration Infrastructures Elsevier

Describes the new information ecology in most large organizations and provides ways to build and manage the complexities of information technology.

Handbook of Research on Technologies and Systems for E-Collaboration During Global Crises IGI Global

The challenges faced by the public sector are many and varied. Civil services at the forefront of tackling pressing problems in a whole range of areas from climate change to income inequality are being allocated less money to do so. This collection explores how public sectors have adapted to address the demands placed on them in the 21st Century.

Unleash Your Mastery of Terraform CLI with the Terraform CLI Boss Book Bundle Are you ready to embark on a journey to become a true Terraform CLI Boss, from a Novice to a Command Line Guru? Look no further than our comprehensive book bundle: "Terraform CLI Boss: Novice to Command Line Guru." What You'll Discover: Book 1 - Terraform CLI Boss: Mastering the Basics In this foundational book, you'll lay the groundwork for your Terraform journey. Learn to set up your environment, grasp core concepts, and master essential commands to create and manage infrastructure resources. Whether you're a beginner or in need of a refresher, this book is your solid starting point. Book 2 - Terraform CLI Boss: Command Line Wizardry Elevate your skills as you delve into advanced configuration management techniques. Become a wizard in using HashiCorp Configuration Language (HCL), dynamic workflows with variables, and the customization of Terraform through providers and plugins. Unlock your potential and wield Terraform CLI with confidence. Book 3 - Terraform CLI Boss: From Novice to Ninja Transition into a Terraform ninja by exploring modules and workspaces. Discover the art of building reusable modules, optimizing collaborative workflows, and applying best practices. Equip yourself with the

expertise needed to navigate Terraform's intricacies and excel in your projects. Book 4 - Terraform CLI Boss: Expert-Level Commands Unleashed Take your Terraform mastery to the next level with this expert-level guide. Explore advanced CLI techniques, infrastructure testing, and validation. Master debugging and troubleshooting, ensuring the reliability of your Terraform projects. Conquer complex infrastructure challenges with ease. Why Choose the Terraform CLI Boss Book Bundle: · Comprehensive Learning Path: Seamlessly progress from beginner to expert with a structured learning path. · Real-World Skills: Gain practical, real-world skills that can boost your career in DevOps and infrastructure automation. · Experienced Authors: Benefit from the expertise of seasoned authors who have mastered Terraform CLI. · Ready for the Challenge: Be prepared to tackle complex infrastructure scenarios and troubleshoot with confidence. Unlock the full potential of Terraform's command-line interface and become a sought-after Terraform CLI expert. Don't miss out on this opportunity to elevate your skills and stand out in the competitive world of DevOps and infrastructure as code. Are you ready to become a Terraform CLI Boss? Order the Terraform CLI Boss Book Bundle today and transform your infrastructure automation skills!

E-Planning and Collaboration: Concepts, Methodologies, Tools, and Applications Springer Nature

The Critical Infrastructure Protection Survey recently released by Symantec found that 53% of interviewed IT security experts from international companies experienced at least ten cyber attacks in the last five years, and financial institutions were often subject to some of the most sophisticated and large-scale cyber attacks and

frauds. The book by Baldoni and Chockler analyzes the structure of software infrastructures found in the financial domain, their vulnerabilities to cyber attacks and the existing protection mechanisms. It then shows the advantages of sharing information among financial players in order to detect and quickly react to cyber attacks. Various aspects associated with information sharing are investigated from the organizational, cultural and legislative perspectives. The presentation is organized in two parts: Part I explores general issues associated with information sharing in the financial sector and is intended to set the stage for the vertical IT middleware solution proposed in Part II. Nonetheless, it is self-contained and details a survey of various types of critical infrastructure along with their vulnerability analysis, which has not yet appeared in a textbook-style publication elsewhere. Part II then presents the CoMiFin middleware for collaborative protection of the financial infrastructure. The material is presented in an accessible style and does not require specific prerequisites. It appeals to both researchers in the areas of security, distributed systems, and event processing working on new protection mechanisms, and practitioners looking for a state-of-the-art middleware technology to enhance the security of their critical infrastructures in e.g. banking, military, and other highly sensitive applications. The latter group will especially appreciate the concrete usage scenarios included.

Applied Mathematics, Modeling and Computer Simulation

IGI Global

The 11th International Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on

the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and 1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA.

Facilitating Interdisciplinary Collaboration among the Intelligence Community, Academy, and Industry Rob Botwright

Discusses the impact of emerging trends in information technology towards solutions capable of managing information

within open, principally unbounded, operational environments.
