## ANTON BRYNN

---

### **Language, Ethnography, and Education** Springer

This frontline volume contributes to the social study of education in general and literacy in particular by bringing together in a new way the traditions of language, ethnography, and education. Integrating New Literacy Studies and Bourdieusian sociology with ethnographic approaches to the study of classroom practice, it offers an original and useful reference point for scholars and students of education, language, and literacy wishing to incorporate Bourdieu's ideas into their work. More than just a set of stand-alone chapters around social perspectives on language interactions in classrooms, this book develops and unfolds dialogically across three sections: Bridging New Literacy Studies and Bourdieu - Principles; Language, Ethnography and Education - Practical Studies; Working at the Intersections - In Theory and Practice. The authors posit 'Classroom Language Ethnography' as a genuinely new perspective with rich and developed traditions behind it, but distinct from conventional approaches to literacy and education — an approach that bridges those traditions to yield fresh insights on literacy in all its manifestations, thereby providing a pathway to more robust research on language in education.

### Theory, Research and Practice Springer

Given the boost in global immigration and migration, as well as the emphasis on creating inclusive classrooms, research is turning to the challenges that teachers face with the increasing need for bilingual and multilingual education. The benefits of bilingual education are widespread, allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life. However, very few resources are available for the successful practice and implementation of this education into the curriculum, with an even greater lack of appropriate cultural representation in the classroom. Thus, it is essential for educators to remain knowledgeable on the emerging strategies and procedures

available for making bilingual and multilingual education successful. The Research Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves. This research anthology features a diverse collection of authors, offering valuable global perspectives on multilingual education. Covering topics such as gamification, learning processes, and teaching models, this anthology serves as an essential resource for professors, teachers, pre-service teachers, faculty of K-12 and higher education, government officials, policymakers, researchers, and academicians with an interest in key strategy and understanding of bilingual and multilingual education. International Handbook of Interpretation in Educational Research Routledge

Bringing Bourdieu to the study of Education Management, Leadership and Administration assumes a normative opposition to a meritocratic view of education. Through a lifetime's explication of the ways in which schooling both produces and reproduces the status quo, Bourdieu offers a powerful critique and method of analysis of the history of schooling and of contemporary educational policies and trends. This volume will explain each of the key terms in Bourdieu's thinking tool kit, showing how the tripartite concepts of field, habitus and capitals offer a way through which to understand the interaction of structure and agency and the limits on the freedom of an individual - in this case educational leaders - to act. It will provide a range of exemplars of the application of these tools to questions of concern to the scholars in the field of educational leadership, and of interest to those whose primary focus is the utility of Bourdieu's social theory.

### Reforming Vietnamese Higher Education Routledge

This book is a guide to current research and debate in the field of literacies practice and education. It provides both an historical and lifespan view of the field as well as an overview of research methodologies with first-hand examples from a range of researchers involved in literacy research.

### *Literacy Theories for the Digital Age* Springer Nature

This book deepens readers' conceptual understanding of and

provides practical insights into Vietnam's higher education reforms. Globalisation has had profound impacts on higher education worldwide, creating transnational linkages and junctures, as well as disjunctures. At the same time, it has generated fluidities, hybridities and mobilities. Within the postcolonial context of Vietnam, it is imperative to identify the unique global traits that characterise the Vietnamese higher education system. The book focuses specifically on key aspects of culture and values that are decisive to the reform of Vietnamese higher education under the forces of globalisation. It critically examines how global forces have shaped and reshaped Vietnam's higher education landscape. At the same time, the book explores local demands on Vietnamese higher education, and deciphers how higher education institutions are responding to globalisation, internationalisation and local demands. Based on empirical research, theoretical approaches and the experiences of researchers from Vietnam and overseas, it addresses critical perspectives on the aspects fundamental to the reform of Vietnamese higher education and outlines viable paths for the future.

### *Reframing the Subject* Routledge

This book discusses aspects of the theory and practice of qualitative research in the specific context of language and literacy education. It addresses epistemological perspectives, methodological problems, and practical considerations related to research involvements in areas of language education and literacy studies rather than generic issues of other fields of social sciences. The volume starts with Theoretical Considerations in the first part and raises some epistemological and theoretical concerns that are rarely debated in the specific context of research on language and literacy teaching. The second part, Methodological Approaches explores issues of the design and implementation of language and literacy education research within the framework of some of the major established qualitative research traditions. Finally, the part on Research in Action discusses practical aspects of a few actual instances of qualitative research on language and literacy education in different contexts.

### Plurilingual Pedagogies Springer

Drawing on sociocultural theories of learning, this book examines

how the everyday language practices and cultural funds of knowledge of youth from non-dominant or minoritized groups can be used as centerpoints for classroom learning in ways that help all students both to sustain and expand their cultural and linguistic repertoires while developing skills that are valued in formal schooling. Bringing together a group of ethnographically grounded scholars working in diverse local contexts, this volume identifies how these language practices and cultural funds of knowledge can be used as generative points of continuity and productively expanded on in schools for successful and inclusive learning. Ideal for students and researchers in teaching, learning, language education, literacy, and multicultural education, as well as teachers at all stages of their career, this book contributes to research on culturally and linguistically sustaining practices by offering original teaching methods and a range of ways of connecting cultural competencies to learning across subject matters and disciplines.

Media and Migration IGI Global

As education becomes more globally accessible, the need increases for comprehensive education options with a special focus on bilingual and intercultural education. The normalization of diversity and the acclimation of the students to various cultures and types of people are essential for success in the current world. The Handbook of Research on Bilingual and Intercultural Education is an essential scholarly publication that provides comprehensive empirical research on bilingual and intercultural processes in an educational context. Featuring a range of topics such as education policy, language resources, and teacher education, this book is ideal for teachers, instructional designers, curriculum developers, language learning professionals, principals, administrators, academicians, policymakers, researchers, and students.

**Exploring Interaction and Learning in the Multilingual Classroom** Springer

Social Literacies develops new and critical approaches to the understanding of literacy in an international perspective. It represents part of the current trend towards a broader consideration of literacy as social practices, and as its title suggests, it focuses on the social nature of reading and writing and the multiple character of literacy practices.

Bridging New Literacy Studies and Bourdieu Springer Nature

This book argues that adopting ethnographically oriented perspectives on research into academic writing is a valuable means of deepening understanding of the social influences on language use and individuals' experiences in academic writing contexts, helping to gain insider views of writers' experiences, writing practices, and the contexts in which academic texts are produced and assessed.

**Longitudinal Interactional Histories** Routledge

Offering a unique and original perspective on Bourdieu, language-based ethnographies, and reflexivity, this volume provides a nuanced, in-depth discussion of the complex relationship between these interconnected topics and their impact in real-world contexts. Part I opens the book with an overview of the historical background and development of language-based ethnographic research and Bourdieu's work in this space. Part II presents a series of case studies that highlight a Bourdieusian perspective and demonstrate how reflexivity impacts language-based ethnography. In each study, Bourdieu's conceptual framework of reflexively-informed objectivity examines the ways in which the studies themselves were constructed and understood. Building on Parts I and II, the concluding set of chapters in Part III unpacks the messiness of the theory and practice of language-based ethnography, and provides insights into what reflexivity means for Bourdieu and in practical contexts. Arguing for a greater reflexive understanding in research practice, this volume sets an agenda for future literacy and language research.

*Second Language Pragmatics and English Language Education in East Asia* Routledge

This edited collection addresses the link between second language pragmatics (including interlanguage and intercultural) research and English language education. The chapters use different contemporary research methods and theoretical frameworks such as conversation analysis, language-learners-as-ethnographers, discourse and interactional approaches and data in contexts (either in the region or overseas). The content explores and discusses the significance of learning and teaching of second language (L2) pragmatics in language education for learners who use English as a lingua franca for academic and intercultural communication purposes with native and non-native speakers of English, focusing on pragmatic actions, social behaviours, perceptions and awareness levels in three regions in

East Asia – China, Japan and South Korea. It is an important contribution to the area of second language pragmatics in language education for East Asian learners. It recommends research-informed pedagogies for the learning and teaching of interlanguage or intercultural pragmatics in regions and places where similar cultural beliefs or practices are found. This is an essential read for researchers, language educators, classroom teachers, readers who are interested in second language pragmatics research and those interested in second language acquisition and English language education in the East Asian context.

Directions for literacy research in precarious times University Press of Colorado

This handbook focuses on the often neglected dimension of interpretation in educational research. It argues that all educational research is in some sense 'interpretive', and that understanding this issue belies some usual dualisms of thought and practice, such as the sharp dichotomy between 'qualitative' and 'quantitative' research. Interpretation extends from the very framing of the research task, through the sources which constitute the data, the process of their recording, representation and analysis, to the way in which the research is finally or provisionally presented. The thesis of the handbook is that interpretation cuts across the fields (both philosophically, organizationally and methodologically). By covering a comprehensive range of research approaches and methodologies, the handbook gives (early career) researchers what they need to know in order to decide what particular methods can offer for various educational research contexts/fields. An extensive overview includes concrete examples of different kinds of research (not limited for example to 'teaching' and 'learning' examples as present in the Anglo-Saxon tradition, but including as well what in the German Continental tradition is labelled 'pädagogisch', examples from child rearing and other contexts of non-formal education) with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice – combined in each case with consideration of the role of interpretation in the process. The handbook includes examples of a large number of methods traditionally classified as qualitative, interpretive and quantitative used across the area of the study of education. Examples are

drawn from across the globe, thus exemplifying the different 'opportunities and constraints' that educational research has to confront in different societies.

*Teacher Knowledge, Self-Efficacy, and Minding the Gap*  
Bloomsbury Publishing

This volume offers comprehensive 'state-of-the-art' overviews of educational policies concerning the teaching of English in a large number of Asian countries. Each contribution is written by a leading expert and gives a clear assessment of current policies and future trends. Starting with a description of the English education policies in the respective countries, the contributors then delve into the 'nuts and bolts' of the English education policies and how they play out in practice in the education system, in schools, in the curriculum, and in teaching. Topics covered include the balance between the acquisition of English and the national language, political, cultural, economic and technical factors that strengthen or weaken the learning of English.

*Critical Approaches to Literacy in Development, Ethnography and Education* SAGE Publications

As part of a long series of Vietnam's policy objectives, English education has been identified as key to improving the quality of its rapidly expanding tertiary institutions and is crucial to the larger aim of modernising and internationalising its economy. Bringing together a wide range of Vietnamese and foreign English education scholars, and tertiary educational practitioners, this book documents the significant progress and challenges in the realisation of Vietnam's English language policies as they are enacted in the higher education sector. Changes to Vietnam's higher education system remain unstable, unsystematic, and insubstantial. This book provides insights into how recent Vietnamese government policy is providing for a substantial and comprehensive renewal of Vietnam's tertiary education as part of their 2020 plan. Academics and students of English education, language policy, and nation building within the context of increased globalisation and marketisation in developing nations and Vietnam, in particular, should find this book valuable.

*Bridging the Multimodal Gap* Routledge

Language, Ethnography, and Education Bridging New Literacy Studies and Bourdieu Routledge

*Critical and Creative Endeavors for Equitable Language in Education* Routledge

The Routledge Handbook of Educational Linguistics provides a comprehensive survey of the core and current language-related issues in educational contexts. Bringing together the expertise and voices of well-established as well as emerging scholars from around the world, the handbook offers over thirty authoritative and critical explorations of methodologies and contexts of educational linguistics, issues of instruction and assessment, and teacher education, as well as coverage of key topics such as advocacy, critical pedagogy, and ethics and politics of research in educational linguistics. Each chapter relates to key issues raised in the respective topic, providing additional historical background, critical discussion, reviews of pertinent research methods, and an assessment of what the future might hold. This volume embraces multiple, dynamic perspectives and a range of voices in order to move forward in new and productive directions, making The Routledge Handbook of Educational Linguistics an essential volume for any student and researcher interested in the issues surrounding language and education, particularly in multilingual and multicultural settings.

Routledge

This edited collection brings to the forefront attempts to connect critical pedagogy and ELT (English Language Teaching) in different parts of the world. The authors in this collection write from their own experiences, giving the chapters nuanced understanding of the everyday struggles that teachers, teacher educators and researchers face within different contexts. Throughout the book, contributors connect micro-contexts (classrooms) with macro-contexts (world migration, politics and social issues) to demonstrate the impact and influences of pedagogy. In problematizing ELT and focusing on so-called 'peripheral' countries where educators have created their own critical pedagogies to respond to their own local realities, the contributors construct ELT in a way that goes beyond the typical ESL/EFL distinction. This unique edited collection will appeal to teacher educators, in-service teachers working in the field as well as students and scholars of English language teaching, second language acquisition and language education policy.

*The Routledge Companion to English Studies* Routledge

The Evolving Curriculum in Interpreter and Translator Education: Stakeholder perspectives and voices examines forces driving curriculum design, implementation and reform in academic programs that prepare interpreters and translators for employment in the public and private sectors. The evolution of the translating and interpreting professions and changes in teaching practices in higher education have led to fundamental shifts in how translating and interpreting knowledge, skills and abilities are acquired in academic settings. Changing conceptualizations of curricula, processes of innovation and reform, technology, refinement of teaching methodologies specific to translating and interpreting, and the emergence of collaborative institutional networks are examples of developments shaping curricula. Written by noted stakeholders from both employer organizations and academic programs in many regions of the world, the timely and useful contributions in this comprehensive, international volume describe the impact of such forces on the conceptual foundations and frameworks of interpreter and translator education.

*Exploring Literacies* Springer

Media and Migration: Learning in a globalized world brings together studies located at the intersection of migration, media and learning, and considers how the learning practices of youth in migration are shaped by new media. The change in the mobilities of people, media, and material goods which allow new connections between 'global' and 'local' life has had a significant impact on contemporary migration, as well as social life more generally. The contributors to this book show how learning trajectories of individual learners become defined by broadly distributed networks and knowledge systems. Learning in stable, closed, and culturally uniform settings is becoming the exception rather than the norm. While immigrant youth are often associated with juggling multiple lives or worlds, such juggling is increasingly becoming typical for all youth living with new media. The book therefore addresses youth learning more generally in relation to media, globalization, and diversity, as well as the digital learning practices of immigrants and non-immigrants. This book was originally published as a special issue of Learning, Media and Technology.
