Africa's Blue Economy Vernon Press

This book explores the emergence and assertion of Africa as a significant actor and stakeholder in global affairs and the transformation of the India-Africa relationship. Beginning from this strategic perspective, the book presents an in-depth exploration of India-Africa partnership in all its critical dimensions. It delineates the historical backdrop and shared colonial past to focus on and contextualise the evolution of the India-Africa engagement in the first two decades of the 21st century. The book scrutinises the unfolding international competition in Africa in depth, which includes global actors such as the EU, US, and Japan, among others, focusing especially on China's growing influence in the region. Further, it dissects objectively the continental, regional and bilateral facets of India-Africa relations and offers a roadmap to strengthen and deepen the relationship in the coming decade. This volume will be very useful for students and researchers working in the field of international relations, foreign policy, governance, geopolitics, and diplomacy.

On the Linguistic Infrastructure of World Politics Vij Books India Pvt Ltd

This publication provides an overview of the "blue economy" and emphasizes its significance for protecting the biodiversity of natural resources in Southeast Asia. The "blue economy" is defined as the sustainable use of ocean and coastal resources to drive economic growth and improve livelihoods, while protecting and nurturing marine ecosystems. In this publication, investment approaches, opportunities, and finance mechanisms that can promote and catalyze funds for a sustainable ocean economy are discussed. Multilateral and bilateral funding sources, a market-based approach, incentives, and regulations, among others, are presented. Also considered is the need to align these elements with a cohesive development framework for the blue economy.

Sustainability in the Gulf Springer Nature

This volume explores options for a sustainable maritime domain, including maritime transportation, such as, Maritime Spatial Planning (MSP), maritime education and training, maritime traffic and advisory systems, maritime security. Other activities in the maritime domain covered in the book include small-scale fisheries and sustainable fisheries, and greening the blue economy. The book aims to provide the building blocks needed for a framework for good ocean governance; a framework that will serve through the next decade and, hopefully, well beyond the 2030 milestone of the UN Agenda for Sustainable Development. In short, this book brings together the problems of the current world and sustainable solutions that are in the development process and will eventually materialize in the not so distant future. Additionally, the book presents a trans-disciplinary analysis of integral sustainable maritime transportation solutions and crucial issues relevant to good ocean governance that have recently been discussed at different national, regional and international fora, highlighting ongoing work to develop and support governance systems that facilitate industry requirements, and meet the needs of coastal states and indigenous peoples, of researchers, of spatial planners, and of other sectors dependent on the oceans. The book will be of interest to researchers across many disciplines, especially those that are engaged in cross-sectoral research and developments in the maritime transport sector and across the wider maritime domain. To this end, the book covers areas including natural and social sciences, geographical studies, spatial planning, maritime security and gender studies, as they relate to transport and the wider maritime sector. In addition, the book explores frameworks for sustainable ocean governance being developed under the UN's Agenda for Sustainable Development to 2030. It will also look beyond the 2030 milestone under that Agenda, and will be of use to national and international policymakers and practitioners, government actors at the EU and other regional and national levels and to researchers of ocean governance, sustainability and management, and maritime transport.

IAS Prelims General Studies Paper 1 - 101 Speed Tests with 5 Practice Sets - 4th Edition Routledge

This book describes the marine ecosystem of the Barents Sea, located north of Norway and Russia

as part of the Arctic Ocean. Basic knowledge is presented about components of the ecosystem from virus and bacteria via plankton and fish to seabirds through to marine mammals and their interactions with the physical environment. Ecosystem dynamics are given a prominent role in the book. Mathematical models of the plankton and important fish stocks are employed to help elucidate the interplay between populations and trophic levels. The situation regarding contaminants is reviewed, as is the newly established Norwegian plan for the management of the Barents Sea. The impact of global warming is also discussed. Ecosystem Barents Sea is written for all those with an interest in marine ecology in the arctic seas, including research institutes, governmental ecosystem management units, and natural resources organizations.

The Africa Yearbook is a reliable source of reference covering major domestic political developments, the foreign policy and socio-economic trends of all sub-Saharan states – all related to developments in one calendar year.

Perspectives on the Blue Economy Tapir Academic Press

Led by Dubai and Abu Dhabi, the UAE has become deeply embedded in the contemporary system of international power, politics, and policy-making. Only an independent state since 1971, the seven emirates that constitute the UAE represent not only the most successful Arab federal experiment but also the most durable. However, the 2008 financial crisis and its aftermath underscored the continuing imbalance between Abu Dhabi and Dubai and the five northern emirates. Meanwhile, the post-2011 security crackdown revealed the acute sensitivity of officials in Abu Dhabi to social inequalities and economic disparities across the federation. The United Arab Emirates: Power, Politics, and Policymaking charts the various processes of state formation and political and economic development that have enabled the UAE to emerge as a significant regional power and major player in the post Arab Spring reordering of Middle East and North African Politics, as well as the closest partner of the US in military and security affairs in the region. It also explores the seamier underside of that growth in terms of the condition of migrant workers, recent interventions in Libya and Yemen, and, latterly, one of the highest rates of political prisoners per capita in the world. The book concludes with a discussion of the likely policy challenges that the UAE will face in coming years, especially as it moves towards its fiftieth anniversary in 2021. Providing a comprehensive and accessible assessment of the UAE, this book will be a vital resource for students and scholars of International Relations and Middle East Studies, as well as non-specialists with an interest in the United Arab Emirates and its global position.

The Blue Economy in Sub-Saharan Africa World Scientific

Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries, which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region's contemporary development challenges through the lens of the UN's Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of Environmental Studies, Political Economy, and

Economics of the GCC states.

This booklet describes, in a non-technical manner, some important aspects of the Code of Conduct for Responsible Fisheries. The purpose is to create greater awareness of the goals and purpose of the Code and to encourage its effective application in all capture fisheries and in aquaculture. This booklet does not replace the Code of Conduct but simply presents some of the complex information contained within the Code in a simplified form in an attempt to make it more accessible to all users of fisheries.

[Abu Dhabi's Vision 2030](#) International Renewable Energy Agency (IRENA)

Since the turn of the century, Africa has been emerging economically, politically and socially and striving to assert itself on the global stage. This book provides an interdisciplinary view of Africa's struggle to find its unique voice and contribute to the dialogue of international affairs. Highlighting both challenges and opportunities, the book explores the multi-faceted economic, political and social debates that surround Africa's emergence in a complex, increasingly globalised world. The author provides holistic, complementary and policy-oriented advice to African governments and policymakers on how to cope with new interrelated realities in an age of globalisation. This book will be of great interest to students, academics and researchers in the areas of political economy, international development, global governance, public policy and the international relations of African states. It will also appeal to African leaders, policymakers and governments who seek to increase the ability of their countries to cope with the challenges presented by a globalised world.

[The Blue Economy 3.0](#) Frontiers Media SA

Five out of the eight South Asian countries have direct access to the Indian ocean, yet research tends to focus instead on the region's landmass. Much less attention is paid to the extensive maritime space that links South Asian countries, provides their populations with vital access to resources, connects their economies to global trade networks and perhaps most importantly, contributes to law and order at sea. At a time when the Indian Ocean has gained great interest and relevance for many global actors, the role and location of South Asia will have critical implications for strategic calculation and alignment. Furthermore, if trade imbalances are to be tackled and economic globalization to regain steam, enhancing South Asia's ability to export and import through the oceans is essential. Finally, climate change is projected to impact South Asia massively. Coping with humanitarian crises and natural disasters will need critical investments in maritime capacities and cooperation. This edited volume brings together multiple perspectives on contemporary maritime governance in South Asia, from practitioners, policy-makers and academics around the world. They examine India's role as South Asia's leading naval and economic power and the capacity of key actors to shape maritime order in the Indian Ocean. Contents: Foreword (Tommy Koh) Preface and Acknowledgements List of Contributors Editorial Introduction (Jivanta Schoettli) Order: Security in the Indian Ocean (Shivshankar Menon) Sri Lanka's Role in the Indian Ocean and the Changing Global Dynamics (Harsha de Silva) Resolution of Maritime Boundary Disputes among Bangladesh, Myanmar and India in the Bay of Bengal (Md Khurshed Alam) Maritime Safety and Security and Development of the Blue Economy in the Indian Ocean Rim Association (IORA) (K V Bhagirath) Does India Use Trade Effectively? [Small-Scale and Artisanal Fisheries: Insights and Approaches for Improved Governance and Management in a Globalized Context](#) Oxford Business Group

This report explores the growth prospects for the ocean economy, its capacity for future employment creation and innovation, and its role in addressing global challenges. Special attention is devoted to the emerging ocean-based industries.

[The Present State of the Art](#) BRILL

Island nations have benefited from their ocean resources, with marine uses and activities contributing to their economic development. There is a growing appreciation of the critical role oceans play in sustainable economic growth and the need to manage and protect coastal and marine ecosystems that are the fundamental basis for that growth.

[Working for a Sustainable Future](#) Springer Nature

This report explores the growth prospects for the ocean economy, its capacity for future employment creation and innovation, and its role in addressing global challenges. Special attention is devoted to the emerging ocean-based industries in light of their high growth and innovation potential, and contribution to addressing challenges such as energy security, environment, climate change and food security. The report examines the risks and uncertainties surrounding the future development of ocean industries, the innovations required in science and technology to support their progress, their potential contribution to green growth and some of the implications for ocean

management. Finally, and looking across the future ocean economy as a whole, it explores possible avenues for action that could boost its long-term development prospects while managing the use of the ocean itself in responsible, sustainable ways. This book belongs to the OECD Report Series

[Coastal Sequestration for Climate Change Mitigation](#) Disha Publications

As Ecuador and the world at large grapple with the emerging challenge of the COVID-19 pandemic, it is important not to forget the fundamentals of the Ecuadorian economy and the success stories of 2019 and the start of 2020. We believe contained within these pages is an accurate, balanced account of the state of the Ecuadorian economy as of publication, told through the words of the dozens of top public- and private-sector figures. The Business Year's country-specific publications, sometimes featuring over 150 face-to-face interviews, are among the most comprehensive annual economic publications available internationally. This 212-page publication covers green economy, finance, hydrocarbons, mining, agriculture, construction, industry, transport, education, health, ICT, and tourism.

[Towards the Blue Economy](#) Springer Nature

The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

[Sustainability in the Maritime Domain](#) Asian Development Bank

Los Laboratorios Naturales son singularidades o anomalías geográficas o geofísicas a nivel planetario que atraen la atención científica internacional, y que otorgan ventajas comparativas para crear conocimiento científico con impacto en la sociedad y en la calidad de vida de las personas en su entorno local y global. En este libro, los autores –José Miguel Aguilera y Felipe Larraín– resaltan la participación presente y futura del país en los grandes desafíos globales de la humanidad, como los profundos efectos del cambio climático, la comprensión de nuestro lugar en el universo, la urgencia de la conservación medioambiental, y el reto de tener un desarrollo humano en entornos sustentables, resilientes y participativos. Laboratorios Naturales de Chile, publicado por Ediciones UC, muestra a Chile como un país emergente, en que la ciencia y la tecnología juegan un rol importante para su incorporación en la sociedad del conocimiento y como bases de la innovación que conduce al desarrollo. “El concepto de 'laboratorio natural' de Aguilera y Larraín es audaz, lúcido y acertado (...). Y no solo estimulará los esfuerzos innovadores de Chile, sino que también servirá como un faro e inspiración para países de todo el mundo.” JEFFREY D. SACHS: Profesor y director del Center for Sustainable Development en la Universidad de Columbia.

[Blue Carbon](#) OECD Publishing

The 1982 United Nations Convention on the Law of the Sea (UNCLOS) remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance including maritime transport, fisheries, and marine environmental sustainability, have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs), particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of integrated and cross-sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. This volume focuses on the role of the UN Specialized Agencies towards the development of effective and sustainable ocean governance by looking at the more elaborate mechanisms they developed in order to achieve the desired objectives laid down in UNCLOS. From FAO to UNODC, the volume examines how they ensure sustainable development and how much coordination exists among them.

[Technology and the Blue Economy](#) World Scientific

"Illusions of Location Theory: Consequences for Blue Economy in Africa" questions the relevance of 'location theory' in explaining the coastal-hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa. It pays more attention to territorial contestations, maritime disputes, vulnerabilities of landlocked states, and expansionist policies as displayed through spatial organizational regimes. These areas of investigation have previously been largely studied from the narrow perspective of 'location', unduly focusing on comparative advantages of 'distance', while neglecting the influence of 'forces' such as technology, ideology, and the power of mental mapping in spatial decision making. This volume puts forward the argument that the harmonious relationship between states, and efficient exploitation of the blue economy ecosystem in ways that promote peace between states, lies not only in the structural transformation of markets, but also in bridging the spatial and social divide between the coastal and hinterland societies. Thus, this work proffers possibilities for a holistic regime for managing Africa's coastal-hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy. The combination of theoretical and empirical analysis, buttressed by in-depth case studies of what works in the management of blue economy ecosystem and what does not work, make this volume ideal for researchers, students, and practitioners interested in African regional studies, African political economy, political geography, strategic military studies, governance of seas and oceans, and maritime science/diplomacy.

[An Urban History](#) The Business Year

This outlook highlights climate-safe investment options until 2050, policies for transition and specific regional challenges. It also explores options to eventually cut emissions to zero.
