 Future -- and Past -- of Surgery | Popular ScienceOften, surgeons use "live" x-rays during surgery
 (called fluoroscopy, floor-ah-sko-pee) to obtain this information. In the past decade, great advances
 have been made that has taken navigation of the spine (or localization) to a new height. Also known
 as "computer-assisted, image-guidance," navigation technology is advancing at a rapid
 rate.Advancements in Spine Surgery - SpineUniversePaediatric surgery—the surgical care of children
 from the fetus to adolescent—is a comparatively new surgical specialty, which began shortly after
 the second world war. 1,2 Pioneering work during the formative years of the specialty has enabled
 many lethal congenital malformations to be corrected. The surgical treatment of childhood disease
 has also progressed enormously.Recent advances: Paediatric surgeryRecent advances in shoulder

The cost of new technology does bring the price up, but the improvement in the procedure and in your resulting vision are what matter most. The experience of your surgeon: New surgeons must start somewhere, but you'd rather it not be on your eyes. An experienced LASIK surgeon may have done 10,000 to 25,000 procedures or more.

LASIK and Beyond: Newest Advances in Technology and ...Surgery is a constantly evolving specialty in medicine - research and technological advances have made surgical procedures safer and more effective and offer shorter recovery times. Recent Advances in Surgery 38 is the latest volume in the annually-publishing series that reviews current topics in general surgery and its major subspecialties.

Recent advances in computerised delivery systems have led to a wider field of application of lasers in surgery and more predictable results. The carbon dioxide laser was one of the first to be used, but the difficulty in limiting adjacent non-specific tissue damage, with the subsequent risk of scarring, limited its application in plastic surgery.
