Why did Christianity begin, and why did it take the shape it did? To answer this question -- which any historian must face -- renowned New Testament scholar N. T. Wright focuses on the key points: what precisely happened at Easter? What did the early Christians mean when they said that Jesus of Nazareth had been raised from the dead? What can be said today about this belief? This book, third in Wright's series Christian Origins and the Question of God, sketches a map of ancient beliefs about life after death, in

both the Greco-Roman and Jewish worlds. It then highlights the fact that the early Christians' belief about the afterlife belonged firmly on the Jewish spectrum, while introducing several new mutations and sharper definitions. This, together with other features of early Christianity, forces the historian to read the Easter narratives in the gospels, not simply as late rationalizations of early Christian spirituality, but as accounts of two actual events: the empty tomb of Jesus and his "appearances." How do we explain these phenomena? The early Christians' answer was that Jesus had indeed been bodily raised from the dead; that was why they hailed him as the messianic "son of God." No modern historian has come up with a more convincing explanation. Facing this question, we are confronted to this day with the most central issues of the Christian worldview and theology.

A Brilliant, Buoyant Guide to Publishing Your Book Hundreds of thousands of

books come out every year worldwide. So why not yours? In *The Book Bible*, New York Times bestseller and wildly popular Manhattan writing professor Susan Shapiro reveals the best and fastest ways to break into a mainstream publishing house. Unlike most writing manuals that stick to only one genre, Shapiro maps out the rules of all the sought-after, sellable categories: novels, memoirs, biography, how-to, essay collections, anthologies, humor, mystery, crime, poetry, picture books, young adult and middle grade, fiction and nonfiction. Shapiro once worried that selling 16 books in varied sub-sections made her a literary dabbler. Yet after helping her students publish many award-winning bestsellers on all shelves of the bookstore, she realized that her versatility had a huge upside. She could explain, from personal experience, the differences in making each kind of book, as well as ways to find the right genre for every project and how to craft a winning proposal or great cover letter to get a top agent and book editor to say yes. This valuable guide will teach both new and experienced scribes how to attain their dream of becoming a successful author.
