Teaching Languages, Literatures, and Cultures through Theater—Theoretical Approaches and Classroom Practices SUNY Press

A fully updated overview of the causation, function, development and evolution of cephalopod behaviour, richly illustrated in full colour.

Machine Learning and Modeling Academic Press

From proposal to examination, producing a dissertation or thesis is a challenge. Grounded in decades of experience with research training and supervision, this fully updated and revised edition takes an integrated, down-to-earth approach drawing on case studies and examples to guide you step-by-step towards productive success. Early chapters frame the tasks ahead and show you how to get started. From there, practical advice and illustrations take you through the elements of formulating research questions, working with software, and purposeful writing of each of the different kinds of chapters, and finishes with a focus on revision, dissemination and deadlines. How to Write a Better Thesis presents a cohesive approach to research that will help you succeed.

Engendering Rationalities Casemate Publishers

In researching this book, the author took on the role of a hostess in one of Tokyo's many "hostess clubs". The resulting text critically examines how

such establishments create bonds among white-collar men and forge a masculine identity that suits the needs of their corporations.

Adaptation of Western Economics by Russian Universities Lexington Books

Published since 1959, International Review of Neurobiology is a well-known series appealing to neuroscientists, clinicians, psychologists, physiologists, and pharmacologists. Led by an internationally renowned editorial board, this important serial publishes both eclectic volumes made up of timely reviews and thematic volumes that focus on recent progress in a specific area of neurobiology research. This volume, concentrates on the brain transcriptome. Brings together cutting-edge research on the brain transcriptome

Cephalopod Behaviour College SuccessIntroduction to Sociology 2eIntroduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye JonesInternational Encyclopedia Of Comparative Law Chapter 1 Introduction

First published in 2005. Routledge is an imprint of Taylor & Francis, an informa company.

Feminist and Postmodern Approaches in Practice Routledge

From its inception in Greek antiquity, the science of optics was aimed primarily at explaining sight and accounting for why things look as they do. By the end of the seventeenth century, however, the analytic focus of optics had shifted to light: its fundamental properties and such physical behaviors as reflection, refraction, and diffraction. This dramatic shift—which A. Mark Smith characterizes as the “Keplerian turn”—lies at the heart of this fascinating and pioneering study. Breaking from previous scholarship that sees Johannes Kepler as the culmination of a long-evolving optical tradition that traced back to Greek antiquity via the Muslim Middle Ages, Smith presents Kepler instead as marking a rupture with this tradition, arguing that his theory of retinal imaging, which was published in 1604, was instrumental in prompting the turn from sight to light. Kepler’s new theory of sight, Smith reveals, thus takes on true historical significance: by treating the eye as a mere light-focusing device rather than an image-producing instrument—as traditionally understood—Kepler’s account of retinal imaging helped spur the shift in analytic focus that eventually led to modern optics. A sweeping survey, *From Sight to Light* is poised to become the standard reference for historians of optics as well as those interested more broadly in the history of science, the history of art, and cultural and intellectual history.

Liberal Cosmopolitan BRILL

This volume brings together a collection of twenty contributions which offer a diversity of methodological tools and analytical issues concerning the study of different aspects of the role of verbs, clauses and constructions in a rich variety of languages such as Present-Day English, Old English, Old Saxon, French, Spanish, Arabic, German, Upper Sorbian, Latvian, Sino-Tibetan, and the Australian dialects Pitjantjatjara, Yankunytjatjara and Ngaanyatjarra. The use of empirical data and the wide range of languages are the two main challenges addressed here. The book will serve to contribute to current literature on functional-oriented linguistics, incorporating linguistic typology, and corpus-based and contrastive perspectives. The volume is divided into three main parts. The first brings together eight contributions centrally related to the category of the verb both from a synchronic and diachronic perspective. The second part consists of five chapters which revolve around the syntax and semantics of clauses. Finally, the seven essays in the third section explore different formal and functional aspects of the study of constructions in an assortment of languages.

The Use of Conjectural Emendation in the Restoration of the Text of the New Testament, the Epistle of James As a Case Study Gulf Professional Publishing

This book is a cross-cultural critique on the problem of the liberal cosmopolitan in modern Chinese intellectuality in light of Lin Yutang’s literary and cultural practices across China and America. It points to the desirability of a middling Chinese modernity.

Learning to Be Tibetan BRILL

Serfdom and Slavery compares the two forms of legal servitude in cultures in Western civilization, in Europe and the New World from ancient times to the modern period. Within a tightly controlled framework of general contextual chapters followed by specific case studies, a distinguished team of scholars offers 17 specially written essays that illuminate the nature, development, impact and termination of serfdom and slavery in European society. While the case studies range from classical Greece to early modern Brandenburg, and from medieval England to nineteenth-century Russia, the volume as a whole is closely integrated. It makes an important contribution to a topic of increasing international interest.

Icelanders and the Kings of Norway Smithsonian Inst Press

A highly original work in history and theory, this survey considers major themes including identity, class and sexual difference, and weaves them into debates on the nature and point of history. *Sceptical History* arrives at new ways of doing history that consider non-Western history and feminist approaches. Using a wide range of historical and cultural contexts, the study draws extensively on feminist scholarship, both feminist history and postcolonial feminism.

Examines the role of village notables in nineteenth-century France.

Serfdom and Slavery SAGE Publications

Dramatic Interactions is a collection of essays on the flourishing and interdisciplinary subject of teaching foreign languages, literatures, and cultures through theater. With rich examples from a variety of commonly and less commonly taught languages, this book affirms both the relevance and effectiveness of using theater for foreign language learning in the most comprehensive sense of the term. It includes innovative approaches to specific theatrical texts and addresses numerous aspects of foreign language learning such as oral proficiency and communication, intercultural competence, the role of affect and motivation in foreign language study, multiple literacies, regional variations and dialect, literary analysis and adaptation, and the overall liberating effects of verbal and non-verbal self-expression in the foreign language. *Dramatic Interactions* renders accessible, efficacious, and enjoyable the study of languages, literatures, and cultures through theater with the hope of inspiring and facilitating the greater incorporation of theatrical texts and techniques in foreign language courses at every level.

music and theatre to look for present trends in both the ethnography of performance and performance ethnography. One of the main concerns of this volume is with an embodied, affective and sensory ethnography that privileges encounters between ethnographer, participants and practices as key to understanding and knowledge. Another is the extent to which individuals are shaped by their engagement with ethnographic practice in the midst of migration, diffusion, revival, appropriation and commodification of performance. A third is the interface of academic disciplines with the idea of performance, and the way in which academics and practitioners are drawn to ethnography to better understand, negotiate, perform and profess their diverse fields. Individual chapters include a refreshed interface for performance studies and anthropology through new approaches to ritual; a consideration of performance studies through an ethnography of PSi; the emplaced body as a tool for ethnographic research; somatic practice in dance as a mode of ethnography; artisanal musical instrument making as performance; the commodification of traditional performance; and an introductory overview that reflects shifting ethnographic perspectives on traditional performances.

ORIGINS & SPREAD AGRIC PAST Cambridge University Press

This volume completes a trilogy (Lee, 2012, 2017) on the philosophy of medicine, Western and Chinese. Its immediate prequel (Lee, 2017) sets out in general outline the philosophical and methodological core of Classical Chinese Medicine (CCM); this volume fleshes out that “skeleton” by examining in detail its peculiar concepts and characteristics, such as Getihua/Personalised Medicine, Preventive Medicine, Tianren-xiangying (Macro-Micro-cosmic Wholism), Zhèng-Fang Wholism (Wholism at the level of diagnosis and treatment), and Mind-Body Wholism (the person as primitive concept). CCM is here shown to instantiate “ecosystem science”, which is post-Newtonian in orientation, departing from familiar Newtonian landmarks such as Reductionism and linearity, resting on thing-ontology for a non-reductionist, non-linear science. This approach highlights a rich irony and paradox: namely, how CCM in being backward-looking (relying on classical texts as foundational texts and prescriptions of some two thousand years standing) simultaneously manages to be at the cutting edge of scientific thinking today.

Changing Barnsley Univ of California Press

"The transitions from hunting and gathering to agriculture had revolutionary consequences for human society, leading to the emergence of urban civilizations, and ultimately, to humanity's dependence on relatively few domesticated animals and plants. Though the subject has been studied extensively, results have typically been interpreted in terms of local cultural sequences. By contrast, *The Origins and Spread of Agriculture and Pastoralism in Eurasia* provides a continental-scale framework for examining the agricultural "revolution" from its inception nearly 10,000 years ago." -Back cover.

Single chapter from the eBook Understanding Physical Geography Cambridge University Press

Cutting edge feminist investigations of rationality.

College Success University of Chicago Press

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

Classical Chinese Medicine Springer Science & Business Media

Providing theoretical grounding, case studies and practical solutions, *Implementing Ethics in Educational Ethnography* examines how researchers can overcome ethical dilemmas associated with and encountered during ethnographic research. From the initial stages of research design such as consideration from regulatory bodies, through research occurring in the field to project completion and reporting, it explores many of the factors associated with ensuring culturally sensitive and ethical studies. The book covers key questions including: What can researchers expect of ethical review boards? Where and with whom should dialogue take place about ethicality within research? What effect does a research focus have on regulation and research practice? What is the effect of context on ethical practices? Does the positionality of a researcher have an effect on ethical practices? How do we ensure that ethicality supports the trustworthiness of research projects? Using a range of international case studies, *Implementing Ethics in Educational Ethnography* provides researchers and students with invaluable details about how to navigate the field, ensuring that they can sustain good ethical practice throughout the life of a research project.

Chapter 1: Introduction to Physical Geography Cambridge Scholars Publishing

Changing Barnsley looks at how Barnsley has evolved, through the eyes of the former Mining and Technical College on Church Street, which now hosts Barnsley's very own University. Covering the 75 years of its existence, it tracks the period from 1932, when the building was first built, until 2007, when the University was fully up and running. Built along the northern side of the Town Hall in 1932, on Church Street, the Building which now houses Barnsley's very own University has been at the centre of education in Barnsley since its construction. As the mining industry became more regulated and professional, the building originally started life as a mining college, training and equipping Barnsley's workforce with the necessary skills to work in the coal industry. With the demise of coalmining and the broadening of Barnsley's industries, it became a technical college, focussing on a more general education. Now as the industrial heritage has faded and the regeneration of Barnsley has been implemented, the conversion of the building into a University, to provide Higher Education to Barnsley is an important step in raising aspirations and equipping Barnsley with the skills for the future. This book tells the history of this building, the people that have used it and the skills they have gained.
