Cutting the Fuse offers a wealth of new knowledge about the
origins of suicide terrorism and strategies to stop it. Robert A.
Pape and James K. Feldman have examined every suicide terrorist
attack worldwide from 1980 to 2009, and the insights they have
gleaned from that data fundamentally challenge how we
understand the root causes of terrorist campaigns today—and
reveal why the War on Terror has been ultimately
counterproductive. Through a close analysis of suicide campaigns
by Al Qaeda and other terrorist organizations in Iraq, Afghanistan,

Pakistan, Lebanon, Israel, Chechnya, and Sri Lanka, the authors
provide powerful new evidence that, contrary to popular and
dangerously mistaken belief, only a tiny minority of these attacks
are motivated solely by religion. Instead, the root cause is foreign
military occupation, which triggers secular and religious people
alike to carry out suicide attacks. Cutting the Fuse calls for new,
effective solutions that America and its allies can sustain for
decades, relying less on ground troops in Muslim countries and
more on offshore, over-the-horizon military forces along with
political and economic strategies that empower local communities
to stop terrorists in their midst.

The Explosion of Global Suicide Terrorism and How to Stop It

United States Department of Defense

This book examines India's transboundary river water disputes
with its South Asian riparian neighbours — Pakistan, Bangladesh,
Nepal and Bhutan. It explores the history of disputes and
cooperation over the transboundary river water in this region as
well as discusses current disputes and future concerns. It
analyses how and why existing transboundary river water sharing
treaties between India and its South Asian riparian neighbours are
confronted with challenges. The book indicates that India's
transboundary river water disputes with its South Asian riparian
neighbours are likely to escalate in coming years due to the
widening of the demand–supply gap in the respective countries.
It further shows the impact of bilateral relations on the resolution
of transboundary river water disputes, even as cordial
relationships do not always guarantee the absence of river water
disputes between riparian states. The book looks at some key
questions: How political are India's transboundary rivers water
disputes in South Asia? Why do the roots of India's river water
disputes with Bangladesh and Pakistan lie in the partition of the
British India in 1947? Why are there reservations against India's
hydroelectricity projects or allegations of water theft? Is it
possible to resolve transboundary river water disputes among
these South Asian countries? This book will greatly interest
scholars and researchers working in the areas of river

management, environmental politics, transnationalism, water
resources, politics and international relations, security studies,
peace and conflict studies, geopolitics, development studies,
governance and public administration, and South Asian studies in
addition to policymakers and journalists.

Pakistan's Quagmire G. K. Hall

Pakistan and its neighboring countries contain all recognized kinds of most important plate boundaries as well as important dynamic intra-plate twists. Understanding the tectonics in this multifaceted area has been delayed by a relative lack of data and the difficulty of geologic and tectonic troubles. Even with the raise in the quantity of data in the past few years, the complications of the area need a multidirectional approach to cope with the geology and tectonics. Thus, in order to assemble huge, multidirectional data sets with varying superiority and resolution, this study takes on a Geographic Information System (GIS) approach to see at these troubles in a comprehensive and exceptional way. In this study, the authors compile maps of surficial tectonic features and deepness of the Moho, Pn velocities and Pg velocities for Pakistan and explain a cross-section means to work with data in a GIS format.

This book presents mainly the geotechnical details of geomaterials (soils and rocks) found in all the 36 states and union territories of India. There are 37 chapters in this book. Chapter 1 provides an overview of geomaterials, focusing on their engineering properties as determined based on the project site investigations and laboratory/field tests; this will help readers understand the technical details explained throughout the book, with each chapter dealing with geomaterials of one state/union territory only. Each chapter, contributed by a team of authors, follows a common template with the following sections: introduction, major types of soils and rocks, properties of soils and rocks, use of soils and rocks as construction materials, foundation and other geotechnical structures, other geomaterials, natural hazards, case studies and field tests, geoenvironmental impact on soils and rocks, concluding remarks and references. All the chapters cover highly practical information and technical data for application in ground infrastructure projects, including foundations of structures (buildings, towers, tanks, machines and so on), highway, railway and airport pavements, embankments, retaining structures/walls, dams, reservoirs, canals and ponds, and landfills and tunnels. These details are also highly useful for professionals dealing with mining, oil and gas projects and agricultural and aquacultural engineering projects. Although this book covers the Indian ground characteristics, the information provided can be helpful in some suitable forms to the professionals of other countries having similar ground conditions and applications.

This book identifies reforms that can help manage environmental priority problems associated with transport's impacts on air quality, noise pollution, road safety, hazardous-materials transport, climate change, and urban sprawl. The policy options are contextualized in light of the Government of Pakistan's 2011 Framework for Economic Growth and its strategic objectives. Appendixes A-D present additional background information, describe the economic and institutional analyses undergirding this report, and detail the report's methodology. This analytical work by a team of World Bank specialists focuses on: • analyzing the policy and institutional adjustments required to address environmental, social, and poverty aspects of increased

transportation efficiency in Pakistan; • identifying policy options for the Government of Pakistan to better serve the population, to enhance social cohesion, and to foster equitable benefit sharing with low-income or other vulnerable groups; • developing a broad participatory process to give a voice to stakeholders who could be affected by enhancements of freight transport productivity; and • making robust recommendations to strengthen governance and the institutional capacity of agencies to manage the environmental, social, and poverty consequences of freight transportation infrastructure.

International experts analyze Pakistan's security and insurgency issues, looking at the threats posed to and by this nuclear-armed Islamic nation. The only country in Islamic world to be formed in the name of Islam and a nuclear power, Pakistan today is struggling for its very existence and is at war with itself. "Pakistan's Quagmire" focuses on the insurgency in Pakistan, a security problem not only for the country, but also for the region and the rest of the world. To foster a thorough understanding of

the many aspects of the issue, the book looks at both theoretical and practical aspects, from international relations, conflict processes, and political Islam to the annihilation of the TTP, the presence of Al-Qaeda in tribal regions, and the role of Pakistani military and agencies. The essays are contributed by international scholars, journalists, economist, nuclear security experts, security analysts, and strategists. A unique contribution, "Pakistan's Quagmire" will be an essential resource for students in conflict processes, security studies, political Islam, and US foreign policy as well as for policymakers and professionals looking to better grasp the quagmire caused by insurgency and the ongoing war on terror in Pakistan.

A Grammatical Description World Bank Publications

The scope of this study of the Pakistan Army must be wide and in-depth, as the army has played a major part in the country's history. The author describes Pakistan's violent internal politics and erratic international relations with a deep knowledge gained through his long association with the country and its armed forces. Pakistan's wars with India are covered vividly, drawing on unpublished material and details from Indian as well as Pakistani sources. The country's resurrection under Zulfikar Ali Bhutto is described, as is the decade of dictatorship that followed his time in power. The story of what occurred after this period of dominance, when Pakistan grappled with unaccustomed democracy and verged on anarchy, is told with the aid of the author's personal knowledge of many of the senior players. This fifth edition incorporates new material covering crucial developments since 2014, including Operation Zarb-e-Azb in Waziristan. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient

Master's Thesis from the year 2010 in the subject Geography / Earth Science - Meteorology, Aeronomy, Climatology, grade: Excellent, , course: Masters, language: English, abstract: Traditional approaches provide only limited opportunities for general analysis of tectonic structure. However, Geographic Information System provides unique opportunities for solving a wide spectrum of problems, related to analyzing earthquake phenomena. GIS can also provide an effective platform for data assortment, organization, and research with multidirectional data sets. In addition, GIS can also provide an effective solution for integrating different layers of information. In this research an interactive, diversified seismological, geological, and geographical digital database has been developed for Pakistan. Using this GIS database, a better understanding of the tectonics and crustal structure of the region is possible. With the help of this database we have compiled new maps of seismological parameters, depth to moho, Pn velocity and Pg velocity. The developed GIS database would help us in natural hazard evaluation, seismic risk assessment, and understanding of earthquake occurrences

BULLETIN TOME XCII Simon and Schuster

Delusional States: Feeling Rule and Development in Pakistan's Northern Frontier is the first in-depth study of state power and social struggle in Gilgit-Baltistan - the only Shia-majority region of Sunni-dominated Pakistan and a contested border zone that forms part of disputed Kashmir. For seven decades, the political conflict

over Kashmir has locked India and Pakistan in brutal wars and hate-centered nationalisms. This book illuminates how within this story of hate lie other stories - of love and betrayal, loyalty and suspicion, and beauty and terror. Placing these emotionalities at the centre of its analysis, *Delusional States* rethinks the state-citizen relation in deeply felt and intimate terms, offering a fine-grained ethnographic analysis of power and subjection in contemporary Pakistan. A powerful contribution to studies of state-making and Muslim sociality in South Asia, the book additionally offers distinct theoretical insights in the fields of social movements, political ecology, education, and global development studies.

The troubled borderland of Pakistan and Afghanistan the so-called AfPak region is one of the most dangerous areas of the world. Between 2006 and 2010 David L. Gosling lived in Peshawar, the provincial capital of Khyber-Pakhtunkhwa, where he was principal of Edwardes College, a prestigious higher education college, affiliated with the University of Peshawar. In this book, Gosling describes his time at Edwardes College and the challenges and changes of his tenure. Already the first co-educational college in the province, Gosling significantly increased the proportion of female students and staff. The book also describes the early stages of Taliban growth in Afghanistan, its spill-over into the tribal borderlands of Pakistan and how a combination of Pakistan army activity and US drone strikes provoked a furious backlash by Taliban groups against civilian targets in and around Peshawar, including death threats against the author. Providing a personal account of the education and politics of this frontier region, this book offers a unique viewpoint on a part of the world which is often misunderstood."
