McFarlane, Hopkins, and Nield's *Land Law* is the most succinct, analytical textbook available in this subject area. These experienced and respected authors have used their unique approach to land law to provide a consistent structure with which students and lecturers can tackle the topics. The approach arms students with the tools needed to analyse content covered in classes and exams autonomously by demonstrating how to consider rules in isolation before looking at the full picture. This method helps students make links across topics. The concise treatment allows students to concentrate on building an in-depth, sophisticated grasp of the core principles. The authors' direct writing style and contextual outlook guides readers through the depth and detail and gives lucidity to abstract rules. The use of significant cases to exemplify rules in practice and diagrams for visual learners gives additional clarity to concepts that are particularly difficult to imagine. Students are encouraged to test their knowledge by answering end-of-chapter questions and to widen their research by referring to the resources suggested in the further reading lists accompanying each chapter. Online resources: Students can access additional supportive materials online including:- Web links to useful sites containing further information on chapter-specific topics- Self-test questions with instant feedback- Essay questions and guidance on how to answer them- Updates on legal developments in land law

A notary is a public official responsible for independently verifying signatures and oaths. Depending

on how a document is written, a notarization serves to affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual.

Tracing Your First World War Ancestors - Second Edition Scarecrow Press

Historians of British colonial rule in India have noted both the place of military might and the imposition of new cultural categories in the making of Empire, but Bhavani Raman, in Document Raj, uncovers a lesser-known story of power: the power of bureaucracy. Drawing on extensive archival research in the files of the East India Company's administrative offices in Madras, she tells the story

of a bureaucracy gone awry in a fever of documentation practices that grew ever more abstract—and the power, both economic and cultural, this created. In order to assert its legitimacy and value within the British Empire, the East India Company was diligent about record keeping. Raman shows, however, that the sheer volume of their document production allowed colonial managers to subtly but substantively manipulate records for their own ends, increasingly drawing the real and the recorded further apart. While this administrative sleight of hand increased the company's reach and power within the Empire, it also bolstered profoundly new orientations to language, writing, memory, and pedagogy for the officers and Indian subordinates involved. Immersed in a subterranean world of delinquent scribes, translators, village accountants, and entrepreneurial fixers, Document Raj maps the shifting boundaries of the legible and illegible, the legal and illegitimate, that would usher India into the modern world.
