Monitoring, Richard Bejtlich explores the products, people, and processes that implement the NSM model. By focusing on case studies and the application of open source tools, he helps you gain hands-on knowledge of how to better defend networks and how to mitigate damage from security incidents. Tao of Network Security Monitoring, The: Beyond Intrusion ...Mr. Bejtlich's newest books are The Best of TaoSecurity Blog, Volume 1: Milestones, Philosophy and Strategy, Risk, and Advice, and The Best of TaoSecurity Blog, Volume 2: Network Security Monitoring, Technical Notes, Research, and China and the Advanced Persistent Threat. The third installment will arrive by the end of 2020, and will cover current events, law, wise people, history, and appendices. TaoSecurity In the author's latest book, Extrusion Detection, a claim is made on page 228 in which he says "The best reference for building an NSM infrastructure is my book, The Tao of Network Security Monitoring: Beyond Intrusion Detection". So far that statement is indisputable. The Tao of Network Security Monitoring: Beyond Intrusion ...The Tao of Network Security Monitoring opens its doors to the world of hackers. The author explains the differences between full content data (logging everything to the application layer), session data (looking at just the different conversations between hosts), and statistical data plus much more. The Tao of Network Security Monitoring: Beyond Intrusion ...The Tao of Network Security Monitoring is one of the most comprehensive and up-to-date sources available on the subject. It gives an excellent introduction to information security and the importance of network security monitoring, offers hands-on examples of almost 30 open source network security tools, and includes information relevant to security managers through
