A collection of stories focuses on contemporary Native American concerns--white injustice, the fragmenting of the Indian community, and the loss of tribal identity--and recalls Indian legends and tribal stories.

While globalization unifies the world, divisions re-emerge within it in the form of a spectacular separation between Islam and the West. How can it be that Huntington's contested idea of a clash of civilizations became such a powerful

political myth through which so many people look at the world? Bottici and Challand disentangle such a process of myth-making both in the West and in Muslim majority countries, and call for a renewed critical attitude towards it. By analysing a process of elaboration of this myth that took place in academic books, arts and media, comics and Hollywood films, they show that the clash of civilizations has become a cognitive scheme through which people look at the world, a practical image on the basis of which they act on it, as well as a drama which mobilizes passions and emotions. Written in a concise and accessible way, this book is a timely and valuable contribution to the academic literature, and more generally, to the public debate. As such, it will be an important reference for scholars and students of political

science, sociology, philosophy, cultural studies, Middle Eastern politics and Islam. [The Myth of the Clash of Civilizations](#) Routledge

The term 'progress' is a modern Western notion that life is always improving and advancing toward an ideal state. It is a vital modern concept which underlies geographic explorations and scientific and technological inventions as well as the desire to harness nature in order to increase human beings' ease and comfort. With the advent of Western colonization and to the great detriment of the colonized, the notion of progress began to perniciously and pervasively permeate across cultures. This book details the impact of the notion of progress on the Nagas and their culture. The interaction between the Nagas and the West, beginning with British military conquest

and followed by American missionary intrusion, has resulted in the gradual demise of Naga culture. It is almost a cliché to assert that since the colonial contact, the long evolved Naga traditional values are being replaced by Western values. Consequences are still being felt in the lack of sense of direction and confusion among the Nagas today. Just like other Indigenous Peoples, whose history is characterized by traumatic cultural turmoil because of colonial interference, the Nagas have long been engaged in self-shame, self-negation and self-sabotage.

The conversion of the lands on the southern and eastern shores of the Baltic Sea by Germans, Danes and Swedes in the period from 1150 to 1400 represented the last great struggle between Christianity and paganism on the European continent, but for the indigenous peoples of Finland, Livonia, Prussia, Lithuania and Pomerania, it was also a period of wider cultural conflict and transformation. Along with the Christian faith came a new and foreign culture: the German and Scandinavian languages of the crusaders and the Latin of their priests, new names for places, superior military technology, and churches and fortifications built of stone. For newly baptized populations, the acceptance of Christianity encompassed major changes in the organization and practice of political, religious and social life, entailing the acceptance of government by alien elites, of new cultic practices, and of new obligations such as taxes, tithes and military service in the armies of the Christian rulers. At the same time, as the Western conquerors carried their campaigns beyond pagan territory into the principalities of north-western Russia, the Baltic Crusades also developed into a struggle between Roman Catholicism and Orthodoxy. This collection of sixteen essays by both established and younger scholars explores the theme of clash of cultures from a variety of perspectives, discussing the nature and ideology of crusading in the medieval Baltic region, the struggle between Catholicism and Orthodoxy, and the cultural confrontation that accompanied the process of conversion, in subjects as diverse as religious observation, political structures, the practice of warfare, art and music, and perceptions of the landscape.

Recommended Reading by Warren Buffet in his March 2013 Letter to Shareholders How speculation has come to dominate investment—a hard-hitting look from the creator of the first index fund. Over the course of his sixty-year career in the mutual fund industry, Vanguard Group founder John C. Bogle has witnessed a massive shift in the culture of the financial sector. The prudent, value-adding culture of long-term investment has been crowded out by an aggressive, value-destroying culture of short-term speculation. Mr. Bogle has not been merely an eye-witness to these changes, but one of the financial sector's most active participants. In *The Clash of the Cultures*, he urges a return to the common sense principles of long-term investing. Provocative and refreshingly candid, this book discusses Mr. Bogle's views on the changing culture in the mutual fund industry, how speculation has invaded our national retirement system, the failure of our institutional money managers to effectively participate in corporate governance, and the need for a federal standard of fiduciary duty. Mr. Bogle recounts the history of the index mutual fund, how he created it, and how exchange-traded index funds have altered its original concept of long-term investing. He also presents a first-hand history of Wellington Fund, a real-world case study on the success of investment and the failure of speculation. The book concludes with ten simple rules that will help investors meet their financial goals. Here, he presents a common sense strategy that "may not be the best strategy ever devised. But the number of strategies that are worse is infinite." *The Clash of the Cultures: Investment vs. Speculation* completes the trilogy of best-selling books, beginning with *Bogle on Investing: The First 50 Years* (2001) and *Don't Count on It!* (2011)

**The Clash of Cultures in the Ancient Near East** Dogwise Publishing

A celebrated social psychologist offers a radical new perspective on cultural differences that reveals why some countries, cultures, and individuals take rules more seriously and how following the rules influences the way we think and act. In *Rule Makers, Rule Breakers*, Michele Gelfand, "an engaging writer with intellectual range" (*The New York Times Book Review*), takes us on an epic journey through human cultures, offering a startling new view of the world and

ourselves. With a mix of brilliantly conceived studies and surprising on-the-ground discoveries, she shows that much of the diversity in the way we think and act derives from a key difference—how tightly or loosely we adhere to social norms. Just as DNA affects everything from eye color to height, our tight-loose social coding influences much of what we do. Why are clocks in Germany so accurate while those in Brazil are frequently wrong? Why do New Zealand's women have the highest number of sexual partners? Why are red and blue states really so divided? Why was the Daimler-Chrysler merger ill-fated from the start? Why is the driver of a Jaguar more likely to run a red light than the driver of a plumber's van? Why does one spouse prize running a tight ship while the other refuses to sweat the small stuff? In search of a common answer, Gelfand spent two decades conducting research in more than fifty countries. Across all age groups, family variations, social classes, businesses, states, and nationalities, she has identified a primal pattern that can trigger cooperation or conflict. Her fascinating conclusion: behavior is highly influenced by the perception of threat. "A useful and engaging take on human behavior" (*Kirkus Reviews*) with an approach that is consistently riveting, *Rule Makers, Rule Breakers* thrusts many of the puzzling attitudes and actions we observe into sudden and surprising clarity. *John Bogle on Investing* Routledge Who needs CNN when we have *Culture Clash?* --Steve Winn, S. F. Chronicle *Japanese Bankers in the City of London* Blackstone Publishing This volume uses the prism of political cultures to interpret Kansas politics and disclose the intimate connections between the state's past and its current politics. The framework of political cultures evolves from underlying political preferences for liberty, order, and equality, and these preferences form the basis for the active political cultures of individualism, hierarchy, and egalitarianism. This comprehensive examination of Kansas political institutions argues that Kansas politics, historically and presently, may best be understood as a clash of political cultures.

Praise for *Don't Count On It!* "This collection of Jack Bogle's writings couldn't be more timely. The clarity of his thinking—and his insistence on the relevance of ethical standards—are totally relevant as we strive to rebuild a broken financial system. For too many years, his strong voice has been lost amid the cacophony of competing self-interests, misdirected complexity, and unbounded greed. Read, learn, and support Jack's mission to reform the industry that has been his life's work." —PAUL VOLCKER, Chairman of the President's Economic Recovery Advisory Board and former Chairman of the Federal Reserve (1979–1987) "Jack Bogle has given investors throughout the world more wisdom and plain financial 'horse sense' than any person in the history of markets. This compendium of his best writings, particularly his post-crisis guidance, is absolutely essential reading for investors and those who care about the future of our society." —ARTHUR LEVITT, former Chairman, U.S. Securities and Exchange Commission "Jack Bogle is one of the most lucid men in finance." —NASSIM N. TALEB, PhD, author of *The Black Swan* "Jack Bogle is one of the financial wise men whose experience spans the post-World War II years. This book, encompassing his insights on financial behavior, pitfalls, and remedies, with a special focus on mutual funds, is an essential read. We can only benefit from his observations." —HENRY KAUFMAN, President, Henry Kaufman & Company, Inc. "It was not an easy sell. The joke at first was that only finance professors invested in Vanguard's original index fund. But what a triumph it has been. And what a focused and passionate drive it took: it is a zero-sum game and only costs are certain. Thank you, Jack." —JEREMY GRANTHAM, Cofounder and Chairman, GMO "On finance, Jack Bogle thinks unconventionally. So, this sound rebel turns out to be right most of the

time. Meanwhile, many of us sometimes engage in self-deception. So, this book will set us straight. And in the last few pages, Jack writes, and I agree, that Peter Bernstein was a giant. So is Jack Bogle." —JEAN-MARIE EVEILLARD, Senior Adviser, First Eagle Investment Management  
Insights into investing and leadership from the founder of The Vanguard Group  
Throughout his legendary career, John Bogle-founder of the Vanguard mutual fund group and creator of the first index mutual fund-has helped investors build wealth the right way, while, at the same time, leading a tireless campaign to restore common sense to the investment world. A collection of essays based on speeches delivered to professional groups and college students in recent years, in *Don't Count on It* is organized around eight themes  
Illusion versus reality in investing  
Indexing to market returns  
Failures of capitalism  
The flawed structure of the mutual fund industry  
The spirit of entrepreneurship  
What is enough in business, and in life  
Advice to America's future leaders  
The unforgettable characters who have shaped his career  
Widely acclaimed for his role as the conscience of the mutual fund industry and a relentless advocate for individual investors, in *Don't Count on It*, Bogle continues to inspire, while pushing the mutual fund industry to measure up to their promise.

In *Hiding from History*, Meili Steele challenges an assumption at the heart of current debates in political, literary, historical, and cultural theory: that it is impossible to reason through history. Steele believes that two influential schools of contemporary thought "hide from history": liberal philosophies of public reason as espoused by such figures as Jürgen Habermas, Martha Nussbaum, and John Rawls and structuralism/poststructuralism as practiced by Judith Butler, Hayden White, and Michel Foucault. For Steele, public reasoning cannot be easily divorced from either the historical imagination in general or the specific legacies that shape, and often haunt, political communities. Steele introduces the concept of public imagination—concepts, images, stories, symbols, and practices of a culture—to show how the imaginative social space that citizens inhabit can be a place for political discourse and debate. Steele engages with a wide range of thinkers and their works, as well as historical events:

debates over the display of the Confederate flag in public places; Ralph Ellison's exchange with Hannah Arendt over school desegregation in Little Rock; the controversy surrounding Daniel Goldhagen's book, *Hitler's Willing Executioners*; and arguments about the concept of a "clash of civilizations" as expressed by Samuel Huntington, Ashis Nandy, Edward Said, and Amartya Sen. Championing history and literature's capacity to articulate the politics of public imagination, *Hiding from History* boldly outlines new territory for literary and political theory.

The period covered by the Old Testament – beginning in approximately 3000 BC – was one of great technological development and innovation in warfare, as competing cultures clashed in the ancient Middle East. The Sumerians were the first to introduce the use of bronze into warfare, and were centuries ahead of the Egyptians in the use of the wheel. The Assyrians developed chariot warfare and set the standard for a new equine-based military culture. The Babylonians had an army whose people were granted land in return for army service. This authoritative history gives an overview of warfare and fighting in the age of the Old Testament, from the Akkadians, Early and Middle Kingdom Egypt and their enemies, Mycenaean and Minoan Greece and Crete, Assyrians and New Kingdom Egyptians, the Hittites, the Sea Peoples who gave rise to the Philistines, the Hebrew kingdom, the Babylonian kingdom, the Medes and later Persian Empires, through to early Classical Greece. Author Simon Elliott explores how archaeology can shed light on events in the Bible including the famous tumbling walls of Jericho, the career of David the boy warrior who faced the Philistines, and Gideon, who was able to defeat an army that vastly outnumbered his own.

From the bestselling author of *The Submission: A young Afghan-American woman is trapped between her ideals and the complicated truth in this "penetrating" (O, Oprah Magazine), "stealthily suspenseful," (Booklist, starred review), "breathtaking and achingly nuanced" (Kirkus, starred review) novel. Parveen Shams, a college senior in search of a calling, feels pulled between her charismatic and mercurial anthropology professor and the comfortable but predictable Afghan-American community in her Northern California hometown. When she discovers a bestselling book*

called *Mother Afghanistan*, a memoir by humanitarian Gideon Crane that has become a bible for American engagement in the country, she is inspired. Galvanized by Crane's experience, Parveen travels to a remote village in the land of her birth to join the work of his charitable foundation. When she arrives, however, Crane's maternity clinic, while grandly equipped, is mostly unstaffed. The villagers do not exhibit the gratitude she expected to receive. And Crane's memoir appears to be littered with mistakes, or outright fabrications. As the reasons for Parveen's pilgrimage crumble beneath her, the U.S. military, also drawn by Crane's book, turns up to pave the solde road to the village, bringing the war in their wake. When a fatal ambush occurs, Parveen must decide whether her loyalties lie with the villagers or the soldiers -- and she must determine her own relationship to the truth. Amy Waldman, who reported from Afghanistan for the *New York Times* after 9/11, has created a taut, propulsive novel about power, perspective, and idealism, brushing aside the dust of America's longest-standing war to reveal the complicated truths beneath. *A Door in the Earth* is the rarest of books, one that helps us understand living history through poignant characters and unforgettable storytelling. In the Fourth Edition of *Cultures and Societies in a Changing World*, author Wendy Griswold illuminates how culture shapes our social world and how society shapes culture. Through this book, students will gain an understanding of the sociology of culture and explore stories, beliefs, media, ideas, art, religious practices, fashions, and rituals from a sociological perspective. Cultural examples from multiple countries and time periods will broaden students' global understanding. Students will develop a deeper appreciation of culture and society from this text, gleaning insights that will help them overcome cultural misunderstandings, conflicts, and ignorance and that will help equip them to live their professional and personal lives as effective, wise citizens of the world.

#### Culture Clash Routledge

The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of

international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly "universal" Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.
