From three-time Newbery Honor-winning author Gary Paulsen comes a beloved follow-up to his award-winning classic *Hatchet* that asks: What if Brian hadn't been rescued and had to face his deadliest enemy yet--winter? In the Newbery Honor-winning *Hatchet*, thirteen-year-old Brian Robeson learned to survive alone in the Canadian wilderness, armed only with his hatchet. As millions of readers know, he was rescued at the end of the summer. But what if that hadn't happened? What if Brian had been left to face his deadliest enemy--winter? Brian Paulsen raises the stakes for survival in this riveting and inspiring story as one boy confronts the ultimate adventure. "Paulsen picks *Hatchet's* story up in midstream; read together, the two books make his finest tale of survival yet." —Kirkus Reviews, Starred "Breathtaking descriptions of nature . . . Paulsen fans will not be disappointed." —School Library Journal Read all the *Hatchet* Adventures! Brian's Winter The River Brian's Return Brian's Hunt [The New York Teacher](#) Social Studies

*Measuring History* complements the cases presented in *Wise Social Studies Practices* (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of *Measuring History* are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.
