SHERLYN BREANNA

Biographical Dictionary of the History of Technology ASTM International

The story of the anti-slavery movement in Ireland is little known, yet when Frederick Douglass visited the country in 1845, he described Irish abolitionists as the most 'ardent' that he had ever encountered. Moreover, their involvement proved to be an important factor in ending the slave trade, and later slavery, in both the British Empire and in America. While Frederick Douglass remains the most renowned black abolitionist to visit Ireland, he was not the only one. This publication traces the stories of ten black abolitionists, including Douglass, who travelled to Ireland in the decades before the American Civil War, to win support for their cause. It opens with former slave, Olaudah Equiano, kidnapped as a boy from his home in Africa, and who was hosted by the United Irishmen in the 1790s; it closes with the redoubtable Sarah Parker Remond, who visited Ireland in 1859 and chose never to return to America. The stories of these ten men and women, and their interactions with Ireland, are diverse and remarkable.

Mapping Cyberspace Psychology Press

Mapping Cyberspace is a ground-breaking geographic exploration and critical reading of cyberspace, and information and communication technologies. The book: * provides an understanding of what cyberspace looks like and the social interactions that occur there * explores the impacts of cyberspace, and information and communication technologies, on cultural, political and economic relations * charts the spatial forms of virtual

spaces * details empirical research and examines a wide variety of maps and spatialisations of cyberspace and the information society * has a related website at <http://www.MappingCyberspace.com>. This book will be a valuable addition to the growing body of literature on cyberspace and what it means for the future.

Lessons From Effective School Leadership Programs CRC Press

LGBT persons face multiple challenges when entering the coming out process, regardless of their age or place in society. *Coming Out and Disclosures: LGBT Persons Across the Life Span* is a comprehensive guide to the coming out process for LGBT individuals, how to prepare for disclosure, and how disclosure is received in various groups. The book examines sexual orientation and identities; developmental models of coming out; disclosure in adolescence, midlife, or later; coming out to parents and family members; and disclosure outside the family. The book also provides practitioners with guidelines for working with clients who want to make disclosures. *Coming Out and Disclosures: LGBT Persons Across the Life Span* brings together into a single source the latest research and current thought on the experiences of LGBT persons in a heterosexist society. This resource, which is also useful as a supplemental textbook, can be used as a guide to practice for professionals and can be used for in-service training and workshops. This invaluable book has an extensive bibliography. Topics in *Coming Out and Disclosures: LGBT Persons Across the Life Span* include the meaning of sexual identity across various populations, an overview of coming out in the heterosexist world, detailed analysis of the coming out process, examination of the coming out process at different ages, an overview of disclosures in the heterosexist world, detailed analysis of disclosures to parents and family members across various cultures, suggested interventions based on coming out models, special issues experienced in coming out,

strategies to facilitate disclosures, and more. *Coming Out and Disclosures: LGBT Persons Across the Life Span* is an essential guide for any LGBT individual preparing to enter the coming out process, and practitioners in the helping professions, such as social work, counseling, and mental health.

Educational Psychology John Wiley & Sons

Preparing Principals for a Changing World provides a hands-on resource for creating and implementing effective policies and programs for developing expert school leaders. Written by acclaimed author and educator Linda Darling-Hammond and experts Debra Meyerson, Michelle LaPointe, and Margaret Terry Orr, this important book examines the characteristics of successful educational leadership programs and offers concrete recommendations to improve programs nationwide. In a study funded by the Wallace Foundation, Darling-Hammond and the team examined eight exemplary principal development programs, as well as state policies and principals' experiences across the country. Using the data from the study, they reveal how successful programs are structured, the skills and knowledge participants gain, and what they are able to do in practice as school leaders as a result. What do these exemplary programs have in common? Aggressive recruitment; close ties with schools in the community; on-the-ground training under the wing of expert principals, and a strong emphasis on the cutting-edge theories of instructional and transformational leadership. In addition to highlighting the programs' similarities, the study also explains the differences among the programs and sheds light on the effectiveness of approaches and models from different states and contexts?East, West, North, and South; urban and rural; pre-service and in-service. The authors analyze program outcomes for principals and their schools, including illustrative case studies and educators' voices on the influence of programs' strategies for recruitment, internships, mentoring, and coursework. The ideas and suggestions outlined in *Preparing Principals for a Changing World* are presented with the goal of increasing the number of highly qualified, thoughtful, and innovative educational leaders.

Offers information on all types of corrosion, corrosion theory and the major materials of construction used for reducing corrosion, including metals, plastics, linings, coatings, elastomers and masonry products. The text provides analyses of corrosion testing techniques, materials handling and fabrication procedures, on-stream and off-stream corrosion monitoring, design methods that prevent or control corrosion, and more.

Chemical & Metallurgical Engineering Routledge

The north-east of England in the Eighteenth century was a region where many different kinds of musical activity thrived and where a wide range of documentation survives. Such activities included concert-giving, teaching, tuning and composition, as well as music in the theatre and in church. Drawing upon a rich selection of source material, Roz Southey examines the impulses behind such activities and the meanings that local people found inherent in them.

Music-making in North-east England During the Eighteenth Century CRC Press

During the last two centuries, ethno-linguistic nationalism has been the norm of nation building and state building in Central Europe. The number of recognized Slavic languages (in line with the normative political formula of language = nation = state) gradually tallied with the number of the Slavic nation-states, especially after the breakups of Czechoslovakia, the Soviet Union and Yugoslavia. But in the current age of borderless cyberspace, regional and minority Slavic languages are freely standardized and used, even when state authorities disapprove. As a result, since the turn of the 19th century, the number of Slavic languages has varied widely, from a single Slavic language to as many as 40. Through the story of Slavic languages, this timely book illustrates that decisions on what counts as a language are neither permanent nor stable, arguing that the politics of language is the politics in Central Europe. The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe.

CRC Press

The Center for the Study of Chinese Military Affairs (CSCMA) in the Institute for National Strategic Studies at the National Defense University commissioned this book to fill this gap in the open-source literature on the People's Liberation Army (PLA). The book helps fulfill the CSCMA's congressionally-mandated mission "to study and inform policymakers in the Department of Defense, Congress, and throughout the Government regarding the national goals and strategic posture of the People's Republic of China and the ability of that nation to develop, field, and deploy an effective military instrument in support of its national strategic goals." The authors combine extensive individual expertise in cruise missiles, arms control, and nonproliferation, Asian security, the Chinese military, and the Chinese defense industry. Dennis Gormley, a Senior Lecturer at the University of Pittsburgh's Graduate School of Public and International Affairs, is an internationally recognized expert on cruise missiles.

Weapon Systems Handbook Routledge

The Routledge Dictionary of Modern American Slang offers the ultimate record of modern, post WW2 American Slang. The 25,000 entries are accompanied by citations that authenticate the words as well as offer examples of usage from popular literature, newspapers, magazines, movies, television shows, musical lyrics, and Internet user groups. Etymology, cultural context, country of origin and the date the word was first used are also provided. In terms of content, the cultural transformations since 1945 are astounding. Television, computers, drugs, music, unpopular wars, youth movements, changing racial sensitivities and attitudes towards sex and sexuality are all substantial factors that have shaped culture and language. This new edition includes over 500 new headwords collected with citations from the last five years, a period of immense change in the English language, as well as revised existing entries with new dating and citations. No term is excluded on the grounds that it might be considered offensive as a racial, ethnic, religious, sexual or any kind of slur. This dictionary contains many entries and citations that will, and should, offend. Rich, scholarly and informative, The Routledge Dictionary of Modern American Slang and Unconventional English is an indispensable resource for language researchers, lexicographers and translators.

The Oil and Gas Journal Routledge

The Dynamics of Persuasion provides a comprehensive and up-to-date introduction to persuasive communication and attitude change. Offering a thorough discussion of classic and contemporary theories of persuasion, this text explores the structure and functions of attitudes, consistency

between attitude and behavior, and issues in attitude measurement. Examining persuasion through media, interpersonal, and psychological lenses, author Richard M. Perloff systematically investigates the impact of persuasive communication on attitudes toward a variety of topics, including health, politics, and racial prejudice. In addition to presenting persuasion theory and research, he provides numerous examples of persuasion in action, demonstrating the role of persuasion research in everyday life. Written in a highly accessible and clear style, *The Dynamics of Persuasion* serves to: introduce the social science perspective on persuasion enhance understanding of persuasion theories and research highlight the major issues discussed in the field of persuasion research explore the complexities and subtleties in the dynamics of everyday persuasion raise awareness about the ethics of contemporary persuasion. New to this edition are: 2008 election examples interspersed throughout the text focused discussions on compliance-gaining and negative advertising examples of strong attitude, such as the pros and cons of using animals in research. Complimented by a Companion Website (www.routledge.com/textbooks/dynamicsofpersuasion4e) with resources for students and instructors, *The Dynamics of Persuasion* is an engaging text appropriate for advanced courses on persuasion in communication, psychology, marketing, and sociology. In its exploration of the dynamics of persuasive communication, it illuminates the powerful effects persuasion has in contemporary society and enhances understanding of this ubiquitous communicative strategy.

Autonomous Mobile Robots in Unknown Outdoor Environments World Resources Inst

July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. That's time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com. SDVOSB If there is a standard you would like published, let us know. Our web site is usgovpub.com

This study is the first book-length examination of ejectives and their phonological patterning, deepening the empirical understanding of ejectives and contributing to both phonological theory and to typologies of sound change.

Report (to Accompany H.R. 4687) (including Cost Estimate of the Congressional Budget Office). Routledge

Mobile robots have been increasingly applied in many different scenarios, such as space exploration and search and rescue, where the robots are required to travel over uneven terrain while outdoors. This book provides a new framework and the related algorithms for designing autonomous mobile robotic systems in such unknown outdoor environments.

Communication and Attitudes in the 21st Century CRC Press

Vols. 7- include "Abstracts" which, beginning with v. 9 form a separately paged section, and from v. 17 on, have separate title pages.

Social Register John Wiley & Sons

Fundamentals of Radiochemistry presents a comprehensive overview of the principles, objectives, and methods of radiochemistry and how they are applied in various fields of chemistry. Topics covered include characteristics of radioactivity and radioactive matter, the chemistry of ephemeral radionuclides, actinides of high atomic number, positronium, and physicochemical behavior of systems containing one or more compounds at tracer or sub-tracer concentration. Numerous appendices are included to provide additional detail to information presented in chapters. Because *Fundamentals of Radiochemistry* is the first book to discuss what chemical information can be obtained with sub-tracer amounts, it is essential reading for inorganic chemists, radiochemists, analytical chemists, nuclear chemists and others interested in the topic.

Cumulative Book Index Routledge

In this IBM® Redbooks® publication, you will gain an appreciation of the IBM CICS® Transaction Gateway (CICS TG) product suite, based on key criteria, such as capabilities, scalability, platform, CICS server support, application language support, and licensing model. Matching the requirements to available infrastructure and hardware choices requires an appreciation of the choices available. In this book, you will gain an understanding of those choices, and will be capable of choosing the appropriate CICS connection protocol, APIs for the applications, and security options. You will understand the services available to the application developer when using a chosen protocol. You will then learn about how to implement CICS TG solutions, taking advantage of the latest capabilities, such as IPIC connectivity, high availability, and Dynamic Server Selection. Specific scenarios illustrate the usage of CICS TG for IBM z/OS®, and CICS TG for Multiplatforms, with CICS Transaction Server for z/OS and IBM WebSphere® Application Server, including connections in CICS, configuring simple end-to-end connectivity (all platforms) with verification for remote and local mode applications, and adding security, XA support, and high availability.
