KEENAN DESTINEY

Engineering Management: Low Priced Edition Autores Associados
 Climate change is still, arguably, the most critical and controversial issue facing the world in the twenty-first century. Previously published as *Global Warming: A Very Short Introduction*, the new edition is now *Climate Change: A Very Short Introduction*, reflecting an important change in the terminology of the last decade. In the third edition, Mark Maslin includes crucial updates from the last few years, including the results of the 2013 IPCC Fifth Assessment Report, the effects of ocean acidification, and the impact of changes to global population and health. Exploring all of the key topics in the debate, Maslin makes sense of the complexities climate change involves, from political and social issues to environmental and scientific. Looking at its predicated impacts, he explores all of the controversies, and also explains the various proposed solutions.
 ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way

to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Foodborne Pathogens Black Dog & Leventhal

A bilingual issue of the award-winning feminist journal, exploring the concept of *solidão* and the experiences of Black women across languages, borders, and eras.

Alan Mulally and the Fight to Save Ford Motor Company
Currency

Presents the celebration of a Passover Seder with music, prayer, poetry, and traditional rituals.

Physical, Physiological and Psychological Benefits Operina LLC

Celebrating the theme 'Shared heritage', this volume presents the peer-reviewed proceedings from IKUWA6 (the 6th International Congress for Underwater Archaeology, Fremantle 2016). Papers offer a stimulating diversity of themes and niche topics of value to maritime archaeology practitioners, researchers, students, museum professionals and more.

A Passover Seder Gefen Publishing House Ltd

Swami Rama's translation and commentary on one of the world's most sacred and inspiring scriptures.

Warning Miracle Get Through Guides

The report presents key facts and messages regarding international migration globally and by region during 2000-2020, based on the 2020 revision of the international migrant stock data set, which provides updated estimates of numbers of persons living outside their country of birth, classified by age, sex and origin, for 232 countries and areas. The report also reviews policies and programmes to promote planned and well-managed migration and provides an overview of SDG indicator 10.7.2 on the number of countries with migration policies to facilitate orderly, safe, regular and responsible migration and mobility of people, used for measuring progress toward the achievement of SDG target 10.7.

The Systemic, Interpersonal, and Intrapyschic Experience
Macmillan

The book can be seen as a welcomed contribution to this field of study. . . [it] raises some important questions and problems of scientific mobility. Høgni Kalsø Hansen, *Papers in Regional Science* This is a very timely book looking at East West migration, which has recently become a hot political issue in various West European countries. It does an excellent job in laying out the intricacies of mobility that affect different groups, particularly knowledge migrants . The book successfully shows that knowledge migrants follow different motivational routes than other groups of migrants in their choice of mobility between institutes and nations. It makes a valuable contribution to a growing body of research that seeks to change established thinking and rhetoric about migration and to shift it from a dualistic thinking of migration in terms of economic vs. non-economic migrants. What this book shows is that the professional identity of people often supersedes their nationalities in relation to why and where they move. Sami Mahroum, NESTA, UK Based on excellent empirical research on migrating scientists from Poland and Bulgaria to the UK and Germany, this book follows an innovative agenda which is crucial to the world today the movement of people and the movement of knowledge. It achieves this by a creative blend of analysing personal stories, embedded in their professional and family networks, on the one hand, and macro-scale discussions of brain drain, brain gain and national and European policy implications on the other. Russell King, University of Sussex, UK This book makes a timely contribution to understanding the circulation of scientific knowledge via international mobility. It skillfully combines an analysis of structural and institutional changes, with a focus on individual circumstances, life courses and motivations. The outcome is a compelling account of the role of international migration in the transfer of knowledge across borders, and in shaping the careers of individual scientists. This places people and human mobility at the heart of the debate about how the knowledge economy is produced and reproduced. Allan Williams, London Metropolitan University, UK *Moving People and Knowledge* provides a fresh examination of the processes of highly skilled science migration. Focusing on intra-European mobility and, in particular, on the new dynamics of East West migration, the authors investigate the movement of Polish and Bulgarian researchers to and from the UK and Germany. Key questions include: who is moving, how long for, and why? In addressing the motivations and experiences of mobile scientists and their families, insights into professional and personal motivations are provided, demonstrating how relationships, networks and infrastructures shape decision-making. This book provides a useful perspective on the implications of increasing researcher mobility for both sending and receiving regions and the individuals concerned which is necessary for the construction of future policies on sustainable scientific development. This empirical account provides a nuanced analysis of the duration

and flow of scientific mobility showing the prevalence of repeat and shuttle moves in science careers. It will be of particular interest to researchers in European social policy, migration studies and EU law, as well as policymakers in the field of highly skilled migration especially those working on the free movement of persons provisions and the European Research Area and European Area of Higher Education.

Berg

A documentary filmmaker, bringing together Artificial Intelligence experts from around the world, explores the terrifying possibility of catastrophic outcomes once we share the planet with intelligent machines who are smarter and more powerful than we could ever have imagined. 25,000 first printing.

Preharvest Food Safety Peter Lang

Jerusalem is a holy and magical city. It was the Golden Jerusalem of King David and the wise King Solomon, the Golden Jerusalem of Jesus and the cradle of Christianity, as well as Islam's third holiest site. Har-El demonstrates the dynamic interrelationship and historical process between man, landscape, geographical conditions, conquests, culture and religion.

Opto-mechanical Fiber Optic Sensors Edward Elgar Publishing

"The best book to come out on Herodotus in years."—G. E. R. Lloyd, *King's College Cambridge*

The Representation of the Other in the Writing of History OUP Oxford

Microbial Safety of Fresh Produce covers all aspects of produce safety including pathogen ecology, agro-management, pre-harvest and post-harvest interventions, and adverse economic impacts of outbreaks. This most recent edition to the IFT Press book series examines the current state of the problems associated with fresh produce by reviewing the recent, high-profile outbreaks associated with fresh-produce, including the possible internalization of pathogens by plant tissues, and understanding how human pathogens survive and multiply in water, soils, and fresh fruits and vegetables.

Oral and Written Contexts St. Martin's Press

E se a vida animal de repente desaparecesse da Terra, excepto num pequeno recanto do mundo e em doses mínimas? Talvez as causas se conheçam depois, mas o que importa é a existência de alguns seres, aturdidos pelo desaparecimento de tantos, e procurando sobreviver. É sobre estes sobreviventes e as suas reacções, desejos, frustrações mas também pequenas/grandes vitórias que trata este romance. Detalhe importante: o recanto do mundo que escapou à hecatombe situa-se numa desgraçada zona da desgraçada África. O que permitirá questionar as relações contemporâneas no velho Mundo.

Brazil Archaeopress Publishing Ltd

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while

many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

Relational Family Therapy Franklin Classics

Relational Family Therapy introduces a cutting-edge family and couple therapy model that synthesizes relational theories and integrates object relations theory with interpersonal psychoanalysis and self-psychology. The model holds that individuals deal with conflicts rooted in the frustrated and threatening environment they grew up in by later forming intimate relationships that are comparable to the core experiences from their primary family systems. The book outlines the three levels of experience—systemic, interpersonal, and intrapsychic—and provide concrete ways for the therapist to address client problems and promote affect regulation. Chapters include transcripts of actual family therapy sessions as well as genograms so readers can see the model in action.

Secret Language of Animals Nova Science Publishers

Published to accompany an exhibition to Brazilian art and culture, this volume juxtaposes Baroque masterpieces with contemporary art as well as indigenous, African and European influences, in order to explore the integration of sensory and spiritual experience in Brazilian art.

The Book UN

This collection of writings from seasoned pastors contains over 700 years of combined ministry experience for old and new pastors alike.

A Prayer to Our Father John Wiley & Sons

An overview of farm-to-fork safety in the preharvest realm Foodborne outbreaks continue to take lives and harm economies, making controlling the entry of pathogens into the food supply a priority. Preharvest factors have been the cause of numerous outbreaks, including *Listeria* in melons, *Salmonella* associated with tomatoes, and Shiga toxin-producing *E. coli* in beef products, yet most traditional control measures and regulations occur at the postharvest stage. Preharvest Food Safety covers a broad swath of knowledge surrounding topics of safety at the preharvest and harvest stages, focusing on problems for specific food sources and food pathogens, as well as new tools and potential solutions. Led by editors Siddhartha Thakur and Kalmia Kniel, a team of expert authors provides insights into critical themes surrounding preharvest food safety, including Challenges specific to meat, seafood, dairy, egg, produce, grain, and nut production Established and emerging foodborne and agriculture-related pathogens Influences of external factors such as climate change and the growing local-foods trend Regulatory issues from both US and EU perspectives Use of pre- and probiotics, molecular tools, mathematical modeling, and one health approaches Intended to encourage the scientific community and food industry stakeholders to advance their knowledge of the developments and challenges associated with preharvest food safety, this book addresses the current state of the field and provides a diverse array of chapters focused on a variety of food commodities and microbiological hazards.

Research, Technology, and Applications in Mechanical Sensing Univ of California Press

THE INSIDE STORY OF THE EPIC TURNAROUND OF FORD MOTOR COMPANY UNDER THE LEADERSHIP OF CEO ALAN MULALLY. At the end of 2008, Ford Motor Company was just months away from running out of cash. With the auto industry careening toward ruin, Congress offered all three Detroit automakers a bailout. General Motors and Chrysler grabbed the taxpayer

lifeline, but Ford decided to save itself. Under the leadership of charismatic CEO Alan Mulally, Ford had already put together a bold plan to unify its divided global operations, transform its lackluster product lineup, and overcome a dysfunctional culture of infighting, backstabbing, and excuses. It was an extraordinary risk, but it was the only way the Ford family—America's last great industrial dynasty—could hold on to their company. Mulally and his team pulled off one of the greatest comebacks in business history. As the rest of Detroit collapsed, Ford went from the brink of bankruptcy to being the most profitable automaker in the world. American Icon is the compelling, behind-the-scenes account of that epic turnaround. On the verge of collapse, Ford went outside the auto industry and recruited Mulally—the man who had already saved Boeing from the deathblow of 9/11—to lead a sweeping restructuring of a company that had been unable to overcome decades of mismanagement and denial. Mulally applied the principles he developed at Boeing to streamline Ford's inefficient operations, force its fractious executives to work together as a team, and spark a product renaissance in Dearborn. He also convinced the United Auto Workers to join his fight for the soul of American manufacturing. Bryce Hoffman reveals the untold story of the covert meetings with UAW leaders that led to a game-changing contract, Bill Ford's battle to hold the Ford family together when many were ready to cash in their stock and write off the company, and the secret alliance with Toyota and Honda that helped prop up the American automotive supply base. In one of the great management narratives of our time, Hoffman puts the reader inside the boardroom as Mulally uses his celebrated Business Plan Review meetings to drive change and force Ford to deal with the painful realities of the American auto industry. Hoffman was granted unprecedented access to Ford's top executives and top-secret company documents. He spent countless hours with Alan Mulally, Bill Ford, the Ford family, former executives, labor leaders, and company directors. In the bestselling tradition of *Too Big to Fail* and *The Big Short*, *American Icon* is narrative nonfiction at its vivid and colorful best. *Enciclopedia Internacional de Pseudónimos* University of Texas Press

As indicated in the title, the axis around which the content of this work revolves are the relations between education and democracy. If it is reasonable to suppose that democracy is not taught through undemocratic practices, it must not be inferred that the democratization of internal relations within the school is a sufficient condition for preparing young people for active participation in the democratization of society. It is not simply a matter of choosing between authoritarian or democratic relations within the classroom, but rather of articulating the work developed in schools with the process of democratization of society. The pedagogical practice contributes in a specific way, that is to say, pedagogically, to the democratization of society insofar as one understands how the question of democracy is posed with regard to the proper nature of pedagogical work, which, in turn, implies a real inequality (at the point of departure) and a possible equality (at the point of arrival).

Operina John Wiley & Sons

This book explores the role and status of local and regional authorities (also referred to as 'subnational authorities' or 'SNAs') in European Union law, and reveals the existence of two parallel yet opposed constitutional imaginations of the supranational legal order. Through a survey of various areas of EU law, including primary and secondary legislation, case law as well as various soft law instruments, Finck introduces two narratives. These are the 'outsider narrative' and the 'insider narrative' that frame these constitutional imaginations. According to the outsider narrative, the structure of the legal order is bi-centric,

composed of the member states and the EU only. This narrative envisages SNAs as outsiders of EU law, whose interactions with Union law are merely of an indirect nature. However, in addition to this well-known account of EU law, a parallel yet distinct narrative can be identified according to which SNAs are insiders that entertain direct relations with the European Union and

contribute to the substantive development of EU law. It is illustrated that the coexistence of both narratives has wider implications as it points towards a shift in the structure of the European legal order itself, which is transitioning from bi-centricity to polycentricity.
