Sittig's Handbook of Pesticides and Agricultural Chemicals is specifically designed for use by those engaged in the agricultural and food processing industries, both vital to our nation's health and economy. People in every phase of food production, from the farm to the fork, will find a wealth of material here. It will also be of interest to professionals in the pharmaceutical, cosmetics, and personal care industries who use agricultural products as ingredients. It provides crop, chemical,

regulatory, health and safety information on nearly 800 pesticides, fertilizers, and other agricultural chemicals. These chemicals are organized withg unique identifiers so that all who may have contact with or interest in them can find critical information quickly. The international financial crisis in 2008 marked the beginning of important changes in the international economic system. The emerging market economies are increasingly becoming a driving force for the global economic growth. Under such circumstances, the Sino-Latin American economic and trade cooperation has entered a new period

of historical opportunity. Based on the economic development trend and the adjustment of policy, this book explores the prospect for Sino-Latin American economic and trade cooperation. It tracks the development path for this cooperation in the next 10 years by analyzing resource endowment, industrial structure, economic system, development pattern, basic economic policy, economic environment, economic and trade relations between China and Latin America .
