Hisn-E-Haseen (english With Arabic Text) The Application of Islamic Criminal Law in PakistanSharia in Practice

The chant of "Azadi!"—Urdu for "Freedom!"—is the slogan of the freedom struggle in Kashmir against what Kashmiris see as the Indian Occupation. Ironically, it also became the chant of millions on the streets of India against the project of Hindu Nationalism. Even as Arundhati Roy began to ask what lay between these two calls for Freedom—a chasm or a bridge?—the streets fell silent. Not only in India, but all over the world. The coronavirus brought with it another, more terrible understanding of Azadi, making a nonsense of international borders, incarcerating whole populations, and bringing the modern world to a halt like nothing else ever could. In this series of electrifying essays, Arundhati Roy challenges us to reflect on the meaning of freedom in a world of growing authoritarianism. The essays include meditations on language, public as well as private,

and on the role of fiction and alternative imaginations in these disturbing times. The pandemic, she says, is a portal between one world and another. For all the illness and devastation it has left in its wake, it is an invitation to the human race, an opportunity, to imagine another world.

From Conversion to the Taliban Grove Press

Summary: "Since the rise of the Taliban and Al Qaeda, the traditional Islamic schools known as the madrasa have frequently been portrayed as hotbeds of terrorism. For much longer, the madrasa has been considered by some as a backward and petrified impediment to social progress. However, for an important segment of the poor Muslim populations of Asia, madrasas constitute the only accessible form of education. This volume presents an overview of the madrasas in countries such as China, Indonesia, Malaysia, India and Pakistan."--Publisher description.

Chosen Ones John Joseph Adams

Annotation. In the aftermath of 9/11 Islamic seminaries or madrasas received much media attention in India, mostly owing to the alleged link between madrasa education and forms of violence. Yet, while ample information on madrasas for boys is available, similar institutions of

Islamic learning for girls have for the greater part escaped public attention so far. This study investigates how madrasas for girls emerged in India, how they differ from madrasas for boys, and how female students come to interpret Islam through the teachings they receive in these schools. Observations suggest that, next to the official curriculum, the 'informal' curriculum plays an equally important role. It serves the madrasa's broader aim of bringing about a complete reform of the students' morality and to determine their actions accordingly. "This book provides the first ever overview of the history and development of Islam in Afghanistan. It covers every era from the conversion of Afghanistan through the medieval and early modern periods to the present day. Based on primary sources in Arabic, Persian, Pashto, Urdu and Uzbek, its depth and scope of coverage is unrivalled by any existing publication on Afghanistan. As well as

state-sponsored religion, the chapters cover such issues as the rise of Sufism, Sharia, women's religiosity, transnational Islamism and the Taliban. Islam has been one of the most influential social and political forces in Afghan history. Providing idioms and organizations for both anti-state and anti-foreign mobilization, Islam has proven to be a vital socio-political resource in modern Afghanistan. Even as it has been deployed as the national cement of a multi-ethnic 'Emirate' and then 'Islamic Republic,' Islam has been no less a destabilizing force in dividing Afghan society. Yet despite the universal scholarly recognition of the centrality of Islam to Afghan history, its developmental trajectories have received relatively little sustained attention outside monographs and essays devoted to particular moments or movements. To help develop a more comprehensive, comparative and developmental picture of Afghanistan's Islam from the eighth century to the present, this edited volume brings together specialists on different periods, regions and languages. Each chapter forms a case study 'snapshot' of the Islamic beliefs, practices, institutions and authorities of a particular time and place in Afghanistan"--Provided by publisher

A COMMON MISUNDERSTANDING which deters people from practising Islam is the idea that Islamic teachings are quite difficult to practise. Alongside this, there are many opportunities a person comes across on a daily basis to amass reward for the Hereafter, but which one misses due to lack of knowledge. Easy Good Deeds is a valuable book which details many good deeds that every person can easily practise without any major effort. The author has highlighted actions over a wide spectrum of areas, ranging from worship to social conduct, all of which entail minimal effort but reap abundant reward nonetheless. This concise work will help readers appreciate the importance of many righteous actions, realise how easy it is to perform them, and ultimately imbue them with the spirit to practise Islam in its entirety.

Transmission, Transformation and Communication Univ of California Press

From ancient Mesopotamia into the 20th century, "the Circle of Justice" as a concept has pervaded Middle Eastern political thought and underpinned the exercise of power in the Middle East. The Circle of Justice depicts graphically how a government's justice toward the population generates political power, military strength, prosperity, and good administration. This book traces this set of relationships from its earliest appearance in the political writings of the Sumerians through four millennia of Middle Eastern culture. It explores how people conceptualized and acted upon this powerful insight, how they portrayed it in symbol, painting, and story, and how they transmitted it from one regime to the next. Moving towards the modern day, the author shows how, although the Circle of Justice was largely dropped from political discourse, it did not disappear from people's political culture and expectations of government. The book demonstrates the Circle's relevance to the Iranian Revolution and the rise of Islamist movements all over the Middle East, and suggests how the concept remains relevant in an age of capitalism. A "must read" for students, policymakers, and ordinary citizens, this book will be an important contribution to the areas of political history, political theory, Middle East studies and Orientalism.

Recent events have focused attention on the perceived differences and tensions between the Muslim world and the modern West. As a major strand of Western public discourse has it, Islam appears resistant to internal development and remains inherently pre-modern. However Muslim societies have experienced most of the same structural changes that have impacted upon all societies: massive urbanisation, mass education, dramatically increased communication, the

emergence of new types of institutions and associations, some measure of political mobilisation, and major transformations of the economy. These developments are accompanied by a wide range of social movements and by complex and varied religious and ideological debates. This textbook is a pioneering study providing an introduction to and overview of the debates and questions that have emerged regarding Islam and modernity. Key issues are selected to give readers an understanding of the complexity of the phenomenon from a variety of disciplinary perspectives. The various manifestations of modernity in Muslim life discussed include social change and the transformation of political and religious institutions, gender politics, changing legal regimes, devotional practices and forms of religious association, shifts in religious authority, and modern developments in Muslim religious thought.

No legal system in the world has aroused as much public interest as Sharia. However, the discourse around Sharia law is largely focussed on its development and the theories, principles and rules that inform it. Less attention has been given to studying the consequences of its operation, particularly in the area of Islamic criminal law. Even fewer studies explore the actual practice of Islamic criminal law in contemporary societies. This book aims to fill these gaps in our understanding of Sharia law in practice. It deals specifically with the consequences of enforcing Islamic criminal law in Pakistan, providing an in-depth and critical analysis of the application of the Islamic law of Qisas and Diyat (retribution and blood money) in the Muslim world today. The empirical evidence adduced more broadly demonstrates the complications of applying traditional Sharia in a modern state.

Incorporating a rich series of case-studies covering a range of geographical areas, this collection of essays examines the history of modern intellectuals in the Islamic world throughout the twentieth century. The contributors reassess the typology and history of various scholars, providing significant diachronic analysis of the different forms of communication, learning, and authority. While each chapter presents a separate regional case, with an historically and geographically different background, the volume discloses commonalities, similarities and intellectual echoes through its comparative approach. Consisting of two parts, the volume focuses first on al-Manar, the influential journal published between 1898 and 1935 that inspired much imagination and arguments among local intelligentsias all over the Islamic world. The second part discusses the formation, transmission and transformation of learning and authority, from the Middle East to Central and Southeast Asia. Constituting a milestone in comparative studies of the modern Islamic world, this book highlights the range of and transformation in the role of intellectuals in Islamic societies.

How do religious traditions create strangers and neighbors? How do they construct otherness? Or, instead, work to overcome it? In this exciting collection of interdisciplinary essays, scholars and activists from various traditions explore these questions. Through legal and media studies, they reveal how we see religious others. They show that Jewish, Christian, Islamic, and Sikh texts frame others in open-ended ways. Conflict resolution experts and Hindu teachers, they explain, draw on a shared positive psychology. Jewish mystics and Christian contemplatives use powerful tools of compassionate perception. Finally, the authors explain how Christian theology can help teach respectful views of difference. They are not afraid to discuss how religious groups have alienated one another. But, together, they choose to draw positive lessons about future cooperation.

This "splendidly satirical novel" by the award-winning Pakistani author "beautifully captures the absurdity and folly of war and its ineluctable impact" (Booklist, starred review). An American pilot crash lands in the desert and finds himself on the outskirts of the very camp he was supposed to bomb. After days spent wandering and hallucinating from dehydration, Major Ellie is rescued by one of the camp's residents, a teenager named Momo, whose money-making schemes are failing while his family falls apart. His older brother left for his first day of work at an American base and never returned; his parents are at each other's throats; his dog is having a very bad day; and a well-meaning aid worker has shown up wanting to research him for her book on the Teenage Muslim Mind. To escape the madness, Momo sets out to search for his brother, and hopes his new Western acquaintances might be able to help find him. But as the truth of Ali's whereabouts begin to unfold, the effects of American "aid" on this war-torn country are revealed to be increasingly pernicious. Shia Islam is a central issue in contemporary politics. Often associated with Iran, Shiite communities actually exist in many Islamic countries. Focusing on the «other Shiites» outside Iran, this book offers a survey of their diversity and multiplicity in the last two centuries. The contributions cover three major topics. The first part deals with the relationship of Shia minorities to the Sunni regimes. Secondly the public affirmation of their identities through specific rituals and social attitudes is analysed. Finally, the third part of this volume examines the strengthening of these identities through traditional religious rituals and cultural performances, or through the re-interpretation and adaptation of these to present-day life. Coming from various academic backgrounds, the authors have used different methodologies and have been engaged in field-work.
