If you think a yard is a place to play ball, feet are only good for wearing shoes, and a palm is just a tree that grows in Miami, think again! They are all actually units of measure--different ways of measuring how tall, how short and how faraway things are. In this simple, hands-on math concept book, you'll learn how the ancient

Egyptians and Romans used their fingers, hands, arms, and legs as measuring tools. But don't worry if it's all Greek to you. With David A. Adler's playful, informative text and Nancy Tobin's colorful illustrations explaining the difference between customary and metric systems, you'll really measure up!

Deadly Duet, 1 Caleb Cassell always gets what he wants. Starting out as a fighter, Caleb and his friend, Henry, have fought their way to the top. They've left a trail of bodies behind them and forged a life out of violence and illegal dealings. They control girls, guns, drugs, and are not afraid of taking out anyone who threatens their business. When Caleb first sees Donna working in the jewelry store, he knows he wants her. Donna's latest customer scares and excites her. She tries to fight off his advances but all too soon she gives in. One date turns into a second, and before she knows what's happening they're together. When the truth of who he is comes out, can Donna find it in her heart to remain with him? Who could love a crime boss that everyone fears? The

Scarred One Deadly Duet, 2 Henry is the scarred one of the deadly duet. Everyone fears him, avoids him, and he takes his pleasures out on the whores he controls. He does whatever it takes to get the job done, even kill a woman's boyfriend in front of her. Lydia knows there is more to Henry than meets the eye but she will not be the one to find out the truth. She wants nothing to do with him or the world he's involved in. When they are kidnapped, she has to put her faith in him to get them out. Witnessing the damage done to Lydia, Henry promises to kill everyone responsible. With no other choice, Lydia sees the real man within him. She can no longer walk away as she has fallen in love with the scarred one. What will she do when his need for vengeance puts her at risk once again?

Harvey Daniels' Literature Circles introduced tens of thousands of teachers to the power of student-led book discussions. Nancy Steineke's Reading and Writing Together showed how a teacher can nurture friendship and collaboration among young readers. Now, Daniels and Steineke team up to focus on one crucial element of the Literature Circle model; the short, teacher-directed lessons that begin, guide and follow-up every successful book club meeting. Mini-lessons are the secret to book clubs that click. Each of these forty-five short, focused, and practical lessons includes Nancy and Harvey's actual classroom language and is formatted to help busy teachers with point-by-point answers to the questions they most frequently ask. How can I: steer my students toward deeper comprehension? get kids interested in each others' ideas? make sure kids choose

just-right books? help students schedule their reading and meeting time? deal with kids who don't do the reading? get kids to pay more attention to literary style and structure? help special education and ELL students to participate actively in book clubs? get kids to expand their repertoire of reading strategies? make sure groups are on-task when I'm not looking over their shoulder? introduce writing tools (including role sheets) that support student discussion?. help shy or dominating members get the right amount of "airtime?" give grades for book clubs without ruining the fun? use scientific research to justify the classroom time I spend on literature circles? Each mini-lesson spells out everything from the time and materials needed to word-by-word instructions for students. The authors even warn "what could go wrong," helping teachers to avoid predictable management problems. With abundant student examples, reproducible forms, photographs of kids in action, and recommended reading lists, Mini-lessons for Literature Circles helps you deepen student book discussions, create lifelong readers, and build a respectful classroom

community.

Our World 3 McGraw Hill Professional
In this century, the United States will be challenged to provide sufficient quantities of high-quality water to its growing population. Water is a limiting resource for human well-being and social development, and projections of population growth as well as changing social values suggest that demands for this resource will increase significantly. These projections have fueled concerns among the public and water resources professionals alike about the adequacy of future water supplies, the sustainability and restoration of aquatic ecosystems, and the viability of our current water resource research programs and our institutional and physical water resource infrastructures. With the goal of outlining a roadmap to guide policymakers, the Water Science and Technology Board (WSTB) held a series of discussions at several of its meetings in 1998-2000 about the future of the nation's water resources and the appropriate research needed to achieve their long-term sustainability. From those discussions, the board produced this report, the objectives of which are to:

draw attention to the urgency and complexity of water resources issues facing the United States in the twenty-first century; broadly inform decision makers, researchers, and the public about these issues and challenges; identify needed knowledge and corresponding water resources research areas that should be emphasized immediately and over the long term; and describe ways in which the setting of the water research agenda, the conduct of water research, and investments devoted to such research should be improved in the next few decades. This report discusses major research questions related to the critical water issues that face the nation. It lays out an interdisciplinary research portfolio for the next 20 years and recommends agenda-setting processes that can maximize the nation's ability to prioritize and conduct water resources research. One of these days, I'm going to sit down and write that novel.... Everyone thinks about doing it, yet most people who do start a novel end up stalling after a few chapters. Where do these would-be novelists go wrong? Are the characters dull and cliched? Did the story arc collapse? Did they succumb to a dreaded

bout of "writer's block"? Or maybe it was all just taking too long? These problems used to stop writers in their tracks, but nothing will get in your way after reading Write Your Novel in a Month. Author and instructor Jeff Gerke has created the perfect tool to show you how to prepare yourself to write your first draft in as little as 30 days. With Jeff's help, you will learn how to organize your ideas, create dynamic stories, develop believable characters, and flesh out the idea narrative for your novel--and not just for the rapid-fire first draft. Jeff walks you through the entire process, from initial idea to the important revision stage, and even explains what to do with your novel once you've finished. Whether you are participating in National Novel Writing Month or you're simply hoping to complete a draft over winter break or your vacation, this book covers the entire scope of writing a novel and lays out exactly what you need to know to get it done fast and right.
