This landmark volume
brings together leading
scholars in the field to
investigate recent
conceptual shifts,
research findings and
policy debates on the

informal economy as well
as future challenges and
directions for research
and policy. Well over half
of the global workforce
and the vast majority of
the workforce in
developing countries work
in the informal economy,
and in countries around
the world new forms of

informal employment are emerging. Yet the informal workforce is not well understood, remains undervalued and is widely stigmatised. Contributors to the volume bridge a range of disciplinary perspectives including anthropology, development economics, law, political science, social policy, sociology, statistics, urban planning and design. The *Informal Economy Revisited* also focuses on specific groups of informal workers, including home-based workers, street vendors

and waste pickers, to provide a grounded insight into disciplinary debates. Ultimately, the book calls for a paradigm shift in how the informal economy is perceived to reflect the realities of informal work in the Global South, as well as the informal practices of the state and capital, not just labour. The *Informal Economy Revisited* is the culmination of 20 years of pioneering work by WIEGO (Women in Informal Employment: Globalizing and Organizing), a global

network of researchers, development practitioners and organisations of informal workers in 90 countries. Researchers, practitioners, policy-makers and advocates will all find this book an invaluable guide to the significance and complexities of the informal economy, and its role in today's globalised economy. The story of the man who instigated the work that led to the internet—and shifted our understanding of what computers could be. Behind every great revolution is a vision and behind perhaps the greatest revolution of our time, personal computing,

is the vision of J.C.R. Licklider. He did not design the first personal computers or write the software that ran on them, nor was he involved in the legendary early companies that brought them to the forefront of our everyday experience. He was instead a relentless visionary that saw the potential of the way individuals could interact with computers and software. At a time when computers were a short step removed from mechanical data processors, Licklider was

writing treatises on "human-computer symbiosis", "computers as communication devices", and a now not-so-unfamiliar "Intergalactic Network." His ideas became so influential, his passion so contagious, that Waldrop called him "computing's Johnny Appleseed. In a simultaneously compelling personal narrative and comprehensive historical exposition, Waldrop tells the story of the man who not only instigated the work that led to the

internet, but also shifted our understanding of what computers were and could be. Included in this edition are also the original texts of Licklider's three most influential writings: 'Man-computer symbiosis' (1960), which outlines the vision that inspired the personal computer revolution of the 1970s; his 'Intergalactic Network' memo (1963), which outlines the vision that inspired the internet; and "The computer as a communication device" (1968, co-authored with Robert Taylor), which

amplifies his vision for what the network could become.

The Dream Machine UN This report is the ninth in the world migration report series which is designed as a substantive contribution to increasing the understanding of current and strategic migration issues throughout the world. It presents key data and information on migration as well as thematic chapters on highly topical migration issues. It is structured to focus on two key contributions for

readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues. The two parts are intended to provide both overview information that helps to explain migration patterns and processes globally and regionally, as well as insights and recommendations on major issues that policymakers are - or soon - will be grappling with.

Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical

dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

The Dazzle of the Digital is written in the context of digital technology’s inextricable link with progress and modernity in India, with the COVID pandemic in the backdrop. Digital technology such as

smartphones and the internet exemplify the popular ideal of a modernity where the proliferation of data and information seamlessly translates into knowledge and value. The authors attempt to wrestle with this impulsive conflation of the digital with the modern, and argue that the former can sometimes retard progress rather than foster it. They provide examples from various spheres – ranging from public service delivery to private markets – to unpack the

pitfalls of a blinkered view on modernity. The book presents an objective take on the potential of digital technology, written with the hope that it will prompt greater societal reflection on technology as a lever for advancement, at a time when the march of everything digital is inexorable.

Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do

they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? World Development Report 2017: Governance and the Law addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power

interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine

the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective

policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.

Nowadays remembered mostly through Adam Smith's references to the short-lived Ayr Bank in the Wealth of Nations, the 1772-3 financial crisis was an important historical episode in its own right, taking place during a pivotal period in the development of financial capitalism and coinciding with the start of the traditional industrialisation narrative. It was also one of the earliest purely financial

crises occurring in peacetime, and its progress showed an impressive geographical reach, involving England, Scotland, the Netherlands and the North American colonies. This book uses a variety of previously unpublished archival sources to question the bubble narrative usually associated with this crisis, and to identify the mechanisms of financial contagion that allowed the failure of a small private bank in London to cause rapid and severe distress throughout the

18th century financial system. It re-examines the short and turbulent career of the Ayr Bank, and concludes that its failure was the result of cavalier liability management akin to that of Northern Rock in 2007, rather than the poor asset quality alleged in existing literature. It furthermore argues that the Bank of England's prompt efforts to contain the crisis are evidence of a Lender of Last Resort in action, some thirty years before the classical formulation of the concept by Henry

Thornton.

Africa 2017-2018 Taylor & Francis
 "Although there is debate about the estimated health burden of rabies, the estimates of direct mortality and the DALYs due to rabies are among the highest of the neglected tropical diseases. Poor surveillance, underreporting in many developing countries,

frequent misdiagnosis of rabies, and an absence of coordination among all the sectors involved are likely to lead to underestimation of the scale of the disease. It is clear, however, that rabies disproportionately affects poor rural communities, and particularly children. Most of the expenditure for post-exposure prophylaxis is borne by those who can least afford it. As a result of growing dog and human populations, the burden of human deaths from rabies

and the economic costs will continue to escalate in the absence of concerted efforts and investment for control. Since the first WHO Expert Consultation on Rabies in 2004, WHO and its network of collaborating centres on rabies, specialized national institutions, members of the WHO Expert Advisory Panel on Rabies and partners such as the Gates Foundation, the Global Alliance for Rabies Control and the Partnership for Rabies Prevention, have been

advocating the feasibility of rabies elimination regionally and globally and promoting research into sustainable cost-effective strategies. Those joint efforts have begun to break the cycle of rabies neglect, and rabies is becoming recognized as a priority for investment. This Consultation concluded that human dog-transmitted rabies is readily amenable to control, regional elimination in the medium term and even global elimination in the long term. A resolution on

major neglected tropical diseases, including rabies, prepared for submission to the World Health Assembly in May 2013 aims at securing Member States' commitment to the control, elimination or eradication of these diseases. Endorsement of the resolution would open the door for exciting advances in rabies prevention and control."-- Publisher's description.
