Procedural Generation in Game Development | davidapesce.com

Procedural generation is two big words for one simple thing: the creation of data by computers.

Procedural generation is usually used to create content for video games or animated movies, such as landscapes, 3D objects, character designs, animations, or non-player character dialogue.

Challenges In Procedural Terrain Generation

If you combine terrain generation with monster generation and loot generation, you'll be able to create infinite unique worlds, which

allows your game to have infinite replayability. And if well done, your players are able to enjoy your game for years to come, while experiencing endless challenges and experiences.
