Validation Of InformationThe SCAP
Validation Program is designed to test
the ability of products to use the
features and functionality available
through SCAP and its component
standards. Under the SCAP Validation
Program, independent laboratories are
accredited by the NIST National
Voluntary Laboratory Accreditation

Program (NVLAP). Accreditation requirements are defined in NIST Handbook 150, and NIST Handbook 150-17 ...Security Content Automation Protocol Validation Program | CSRCThe Security Content Automation Protocol (SCAP) is a method for using specific standards to enable automated vulnerability management, measurement, and policy compliance evaluation of systems deployed in an organization, including e.g., FISMA (Federal Information Security Management Act, 2002) compliance. The National Vulnerability Database (NVD) is the U.S. government content repository for SCAP.Security Content Automation Protocol - WikipediaThe Security Content Automation Protocol (SCAP) is a synthesis of interoperable specifications

derived from community ideas. Community participation is a great strength for SCAP, because the security automation community ensures the broadest possible range of use cases is reflected in SCAP functionality.
