Transactions of the Cambridge Philosophical Society San Francisco : H.H. Bancroft

A collection of the monthly climatological reports of the states, originally issued separately for each state or section. Similar data was combined in the Monthly weather review for July 1909 to Dec. 1913, also pub. separately during that time for each of the 12 districts. Previous to July 1909 monthly reports were issued for each state or section.

While the design of adjustment policies in the latter part of the 1980s has generally shown greater attention to their impact on growth and social implications, this book argues that several orthodox adjustment policies are still incongruent with long-term development in Africa. It goes on to discuss a development strategy which could lead to a much awaited economic recovery and improvement in social conditions in Africa in the 1990s drawing its conclusions from a general theoretical discussion and national case-studies.

This paper discusses São Tomé and Príncipe's Third and Fourth Reviews Under the Extended Credit Facility Arrangement, Extension of the Arrangement, And Modification of Performance Criteria (PCs). Program implementation is broadly back on track. After missing the end-2016 fiscal targets by large margins, the government adopted corrective measures and met all five end-June 2017 PCs. The implementation of structural reforms under the program is progressing, albeit at a much slower pace than anticipated due mainly to capacity constraints and delays in the delivery of technical assistance. The IMF staff recommends the completion of the joint third and fourth reviews, approval of the extension to end-2018, and rephasing of the program.

Uncertainties related to the impacts of COVID-19 on daily life are increasingly growing. Inherent effects have grown beyond the well-defined sphere of health risks and have shocked the livelihood and food security in several countries. Particularly in the poorest countries, the impact is more devastating due to the limited availability of resources to slow down the spread of the disease. These countries require immediate actions to safeguard food security and human health. Irrigation has a great role in improving crop productivity and ensuring food security. However, expanding

irrigation could impact the availability of water for sanitation and hygiene which has a central role in slowing down the spread of the disease. It is, thus, clearer that irrigation development should also comply with the requirement of extended need of water for sanitation and hygiene. Developing multiple water use would certainly allow to fight the pandemic while ensuring the basic needs of food security in rural communities. To support the concept of multiple water use, a new initiative called SMART irrigation - SMART WASH is proposed for corporate solutions to enhance irrigation and provide WASH facilities to vulnerable communities, thus, responding to the critical needs in times of pandemic crisis.

Annual Report of the Commissioner of Labor Springer

Over the last 30 years referendums have played an increasingly important role in determining government policy. Recent high profile referendums in Scotland, Catalonia and Ukraine have continued the movement towards independence referendums following decolonization and the end of the Cold War. The Greek bailout referendum and Britain's vote on membership of the EU reflect a tradition of European states giving their people a direct say in the transfer of sovereign powers to the European Union seen through the ratification of key treaties such as Maastricht, Amsterdam, Nice and Lisbon. This Routledge Handbook covers key aspects and issues of direct democracy and referendums throughout the world including: •their history; •when, why, where, how and on which issues referendums are held; •why some referendums are more democratic than others; •how referendums are won; •whether they produce good policies; •if referendums increase participation and improve the quality of representative democracies; •do referendums increase trust in democracy and the political actors; •the impact of new technology on the possibilities, methods and frequency of direct

public political participation; •how they should be regulated. Covering other related areas such as recall, citizen juries and random selection, this compendium is an indispensable guide to referendums and the workings of modern democracy.
