In Texas, myth often clashes with the
reality of everyday governance. The
Nacogdoches author team (Ken Collier,
Steven Galatas, & Julie Harrelson-
Stephens) of Lone Star Politics explores
the state's rich political tradition and
explains who gets what, and how by
setting Texas in context with other states'

constitutions, policymaking, electoral
practices, and institutions. Critical thinking
questions and unvarnished "Winners and
Losers" discussions guide students toward
understanding Texas government. This
Fifth Edition expands its coverage of civil
rights in the state, and includes the
contemporary issues that highlight the
push and pull between federal, state, and
local governments.

In this timely volume, James E. Katz, a
leading authority on social consequences

of communication technology, analyzes the way new mobile telecommunications affect daily life both in the United States and around the world. *Magic in the Air* is the most wide-ranging analysis of mobile communication to date. Katz investigates the spectrum of social aspects of the cell phone's impact on society and the way social forces affect the use, display, and re-configuration of the cell phone. Surveying the mobile phone's current and emerging role in daily life, Katz finds that it provides many benefits for the user, and that some of these benefits are subtle and even counter-intuitive. He also identifies ways the mobile phone has not been entirely positive. After reviewing these he outlines some steps to ameliorate the mobile phone's negative effects. Katz also discusses use and abuse of mobile phones in educational settings, where he finds that their use is eroding students' participation in class even as it is helping them to cheat on exams and cut class. Parents no longer object to their children having mobile phones in class in a post-Columbine and 9/11 era; instead they are pressing schools to change their rules to allow students to have their phones

available during class. And mobile phone misbehavior is by no means limited to students: Katz finds that teachers are increasingly taking calls in the middle of class, even interrupting their own lectures to answer what they claim are important calls. In keeping with the book's title, Katz explores the often overlooked psychic and religious uses of the mobile phone, an area that has only recently begun to command scholarly interest. *Magic in the Air* will be essential reading for communications specialists, sociologists, and social psychologists. *A Top Expert Reveals the Secrets Hidden in Your Handwriting* 83 Press PULITZER PRIZE WINNER KAI BIRD'S fascinating memoir of his early years spent in Israel, Jordan, Egypt, Saudi Arabia, and Lebanon provides an original and illuminating perspective into the Arab-Israeli conflict. Weeks before the Suez War of 1956, four-year-old Kai Bird, son of a garrulous, charming American Foreign Service officer, moved to Jerusalem with his family. They settled in a small house, where young Kai could hear church bells and the Muslim call to prayer and watch as donkeys and camels competed with cars

for space on the narrow streets. Each day on his way to school, Kai was driven through Mandelbaum Gate, where armed soldiers guarded the line separating Israeli-controlled West Jerusalem from Arab-controlled East. He had a front-seat view to both sides of a divided city—and the roots of the widening conflict between Arabs and Israelis. Bird would spend much of his life crossing such lines—as a child in Jerusalem, Saudi Arabia, and Egypt, and later, as a young man in Lebanon. Crossing Mandelbaum Gate is his compelling personal history of growing up an American in the midst of three major wars and three turbulent decades in the Middle East. The Zelig-like Bird brings readers into such conflicts as the Suez War, the Six Day War of 1967, and the Black September hijackings in 1970 that triggered the Jordanian civil war. Bird vividly portrays such emblematic figures as the erudite George Antonius, author of *The Arab Awakening*; Jordan's King Hussein; the Palestinian hijacker Leila Khaled; Salem bin Laden, Osama's older brother and a family friend; Saudi King Faisal; President Nasser of Egypt; and Hillel Kook, the forgotten rescuer of more

than 100,000 Jews during World War II. Bird, his parents sympathetic to Palestinian self-determination and his wife the daughter of two Holocaust survivors, has written a masterful and highly accessible book—at once a vivid chronicle of a life spent between cultures as well as a consummate history of a region in turmoil. It is an indispensable addition to the literature on the modern Middle East.

All Amazed celebrates the life and work of the late Roy Kiyooka (1926-1994), one of Canada's first multi-disciplinary artists whose work transcended categorical and cultural exclusivity. At various periods of his life, Kiyooka was a painter, sculptor, teacher, poet, musician, filmmaker, and photographer. When Kiyooka arrived in Vancouver in 1959, he was already one of Canada's most respected abstract painters. His modernist stance at the time inspired a generation of Vancouver painters to reach beyond regionalism. In the sixties and seventies, Kiyooka began to write and publish poetry and produce photographic works; the best known of these, *StoneDGloves* (1969-1970), is both a poetic and photographic project. In all of his projects, he saw the position of the

artist as being in opposition to the institutions of art. The shape and scope of Kiyooka's work continues to be revealed, seven years after his death. Based on a major multidisciplinary conference at the University of British Columbia organized by such luminaries as Michael Ondaatje, Daphne Marlatt, Scott Watson, and John O'Brian, *All Amazed* pays tribute to a remarkable artist and poet who continues to amaze and astound us. Includes essays by Roy Miki, Henry Tsang, Sheryl Conkelton, and Scott Toguri McFarlane, as well as numerous black and white images of Kiyooka's artwork.

John Dewey is known as a pragmatic philosopher and progressive architect of American educational reform, but some of his most important contributions came in his thinking about art. Dewey argued that there is strong social value to be found in art, and it is artists who often most challenge our preconceived notions. *Dewey for Artists* shows us how Dewey advocated for an “art of democracy.” Identifying the audience as co-creator of a work of art by virtue of their experience, he made space for public participation. Moreover, he believed that societies only become—and remain—truly democratic if its citizens embrace democracy itself as a creative act, and in this he advocated for

the social participation of artists. Throughout the book, Mary Jane Jacob draws on the experiences of contemporary artists who have modeled Dewey's principles within their practices. We see how their work springs from deeply held values. We see, too, how carefully considered curatorial practice can address the manifold ways in which aesthetic experience happens and, thus, enable viewers to find greater meaning and purpose. And it is this potential of art for self and social realization, Jacob helps us understand, that further ensures Dewey's legacy—and the culture we live in.

SystemVerilog is a Hardware Description Language that enables designers to work at the higher levels of logic design abstractions that match the increased complexity of current day integrated circuit and field-programmable gate array (FPGA) designs. The majority of the book assumes a basic background in logic design and software programming concepts. It is directed at: * students currently in an introductory logic design course that also teaches SystemVerilog, *

designers who want to update their skills from Verilog or VHDL, and * students in VLSI design and advanced logic design courses that include verification as well as design topics. The book starts with a tutorial introduction on hardware description languages and simulation. It proceeds to the register-transfer design topics of combinational and finite state machine (FSM) design - these mirror the topics of introductory logic design courses. The book covers the design of FSM-datapath designs and their interfaces, including SystemVerilog interfaces. Then it covers the more advanced topics of writing testbenches including using assertions and functional coverage. A comprehensive index provides easy access to the book's topics. The goal of the book is to introduce the broad spectrum of features in the language in a way that complements introductory and advanced logic design and verification courses, and then provides a basis for further learning. Solutions to problems at the end of chapters, and text copies of the SystemVerilog examples are available from the author as described in the Preface.

"India has a complicated taxation system. This is made even more complex thanks to its federal system with each state having its own taxation rules and regulations. This makes it difficult for business houses and

organizations, and very often, the complex tax structures end up having a negative impact on consumers as they end up paying more for goods and services. The proposed Goods and Services Tax or GST has been in the pipeline for quite some time. Finance Minister Arun Jaitley hopes to pass the bill by April 2016. The author takes us on a journey from the history of taxation in India, to its current practices and the future...if GST is implemented. You can learn about the intricacies, pros and cons of GST in this easy-to-read, pithy book."
