The Interpretation of Realities
Routledge

Eros and Economy: Jung, Deleuze, Sexual Difference explores the possibility that social relations between things, partially inscribed in their aesthetics, offer important insights into collective political-economic relations of domination and desire. Drawing on the analytical psychology of Carl Jung and the philosophy of Gilles Deleuze, this

book focuses on the idea that desire or libido, overlaid by sexual difference, is a driving force behind the material manifestations of cultural production in practices as diverse as art or economy. Re-reading the history of capitalism and aesthetics with an awareness of the forces of sexual difference reveals not just their integral role in the development of capitalist markets, but a new understanding of our political-economic relations as humans. The appearance of the energies of sexual difference is highlighted in a number of different historical periods and political economies, from the Rococo period of pre-revolutionary France, to the aesthetics and economics of Keynesian Bloomsbury, to our contemporary Postmodern sensibility. With these

examples, Jenkins demonstrates that the very constitution of capitalist markets is affected by the interaction of these forces; and she argues that a conscious appreciation and negotiation of them is integral to an immanent, democratic understanding of power. With its unique application of Jungian theory, this book provides important new insights into debates surrounding art, aesthetics, and identity politics, as well as into the quest for autonomous, democratic institutions of politics and economics. As such, this book will appeal to researchers, academics and postgraduate students in the fields of Jung, psychoanalysis, political economy, cultural studies and gender studies, as well as those interested in the field of cultural economy.

C.G. Jung and the Humanities Routledge
Political theorist Laurie M. Johnson deals with Jung's analysis of the effects of modern scientific rationalism on the development of communism, fascism and Nazism in the 20th century and applies this analysis to the rise of the New Right in the 21st century. Jung's thought provides much needed insight into contemporary ideologies such as neoliberalism, Identitarianism and the Alt-Right. Johnson explains Jungian analytical psychology as it relates to these topics, with a chapter devoted to Jung's views of Friedrich Nietzsche, who exemplifies the modern problem with his proclamation that God is dead, and an in-depth discussion of Jung's views on truth and the psychological function of religion as a safeguard against deadly

mass movements. She then turns to Jung's treatment of anti-Semitism and the Nazi movement, and his views on race and racism. Johnson applies these historical insights to the current manifestations of mass psychological disruption in the clash between neoliberals and the right-wing populist and Identitarian movements on the rise in North America and Europe. She concludes by discussing the search for an authentic and meaningful life in a West that rejects extremism and is open to authentic spiritual experiences as a counterbalance to mass mindedness. Ideological Possession and the Rise of the New Right will appeal to both undergraduate and graduate students of psychology and intellectual history. The book will also be of interest to those

wishing to understand the new nationalist, nativist and Identarian movements. sh between neoliberals and the right-wing populist and Identitarian movements on the rise in North America and Europe. She concludes by discussing the search for an authentic and meaningful life in a West that rejects extremism and is open to authentic spiritual experiences as a counterbalance to mass mindedness. Jung, Psychology, Postmodernity

Shambhala Publications

The concepts of postmodernism and the experience of living in the age of postmodernity have engendered in many North Americans today feelings of alienation, emptiness, and nihilism. This dissertation examines the effects of postmodernism on contemporary psychological concepts of the self and argues that a Jungian and archetypal understanding of the self, read hermeneutically and with the aid of a postmodern lens, could provide a meaningful framework for many whose values and belief systems have crumbled. In their quest to think what philosophy has left unthought, postmodern writers attempt to wrestle with the truly radical other. I argue that this other is similar to that which

preoccupied Jung in his investigation of the collective unconscious and the objective psyche, and that these concepts have profound significance for bridging the subject-object divide and for healing the nihilism inherent in Western metaphysics and the modern scientific paradigm. Jung was marginalized from mainstream psychology precisely because there was no adequate paradigm through which to understand him. It is possible for Jung to be heard by a wider audience in the field of psychology today because much of his work is better understood viewed through a postmodern lens and also because certain contemporary theories of personality development are so much in line with Jung's own. This dissertation compares, in particular, Jung's theories

of evolutionary consciousness with Kegan's work on adult stage development and shows how Kegan's insights on the struggle to move from what he calls a stage 4 level of consciousness, which he associates with modernism, to a stage 5 level of consciousness, which he associates with postmodernism, has components which are strikingly similar to Jung's concept of individuation. Kegan suggests that we are being forced to be postmodern before we are psychologically ready and that there is yet no adequate holding environment to help us smoothly through the transition. I argue that Jung's psychology of the self, which transcends the human ego and builds a bridge to the other, may provide that holding environment.

Movies, modernity and the unconscious

Routledge

Ever since the shocking revelations of the fascist ties of Martin Heidegger and Paul de Man, postmodernism has been haunted by the specter of a compromised past. In this intellectual genealogy of the postmodern spirit, Richard Wolin shows that postmodernism's infatuation with fascism has been extensive and widespread. He questions postmodernism's claim to have inherited the mantle of the Left, suggesting instead that it has long been enamored with the opposite end of the political spectrum. Wolin reveals how, during in the 1930s, C. G. Jung, Hans-Georg Gadamer, Georges Bataille, and Maurice Blanchot were seduced by fascism's

promise of political regeneration and how this misapprehension affected the intellectual core of their work. The result is a compelling and unsettling reinterpretation of the history of modern thought. In a new preface, Wolin revisits this illiberal intellectual lineage in light of the contemporary resurgence of political authoritarianism.

Subject to Change Chiron Publications

A lavishly illustrated volume of C.G. Jung's visual work, from drawing to painting to sculpture. A world-renowned, founding figure in analytical psychology, and one of the twentieth century's most vibrant thinkers, C.G. Jung imbued as much inspiration, passion, and precision in what he made as in what he wrote. Though it spanned his entire lifetime and included painting, drawing, and

sculpture, Jung's practice of visual art was a talent that Jung himself consistently downplayed out of a stated desire never to claim the title "artist." But the long-awaited and landmark publication, in 2009, of C.G. Jung's *The Red Book* revealed an astonishing visual facet of a man so influential in the realm of thought and words, as it integrated stunning symbolic images with an exploration of "thinking in images" in therapeutic work and the development of the method of Active Imagination. The remarkable depictions that burst forth from the pages of that calligraphic volume remained largely unrecognized and unexplored until publication. The release of *The Red Book* generated enormous interest in Jung's visual works and allowed scholars to engage with the

legacy of Jung's creativity. The essays collected here present previously unpublished artistic work and address a remarkably broad spectrum of artistic accomplishment, both independently and within the context of *The Red Book*, itself widely represented. Tracing the evolution of Jung's visual efforts from early childhood to adult life while illuminating the close relation of Jung's lived experience to his scientific and creative endeavors, *The Art of C.G. Jung* offers a diverse exhibition of Jung's engagement with visual art as maker, collector, and analyst.

Discovering C.G. Jung's Art Mediums and Creative Process W. W. Norton & Company

Many years ago the famous French psychoanalyst Jaques Lacan said that

women want to be wanted, not to be loved. Now, in her fascinating book about female desire and empowerment, internationally renowned Jungian analyst and author Polly Young-Eisendrath explores this idea further. Women look to others to provide them with confidence, happiness and self-esteem. This reliance produces a need to please others, in order to receive praise. We please others by trying to conform to an image, rather than finding out what our real needs are. If this image conflicts with our inner needs we can become resentful, frustrated and out of control. Often we deal with this unhappiness by trying even harder to make ourselves the kind of spouse, lover, mother or worker who is wanted and desired. We have to abandon these female images

and discover our own real needs, without fear or shame. Only by learning to voice these needs clearly, and meet them from within, can we escape the cycle of 'wanting to be wanted'.

The Female Trickster Piatkus Books
 In *The Racial Complex: A Jungian Perspective on Culture and Race*, Fanny Brewster revisits and examines Jung's classical writing on the theory of complexes, relating it directly to race in modern society. In this groundbreaking exploration, Brewster deepens Jung's minimalist writing regarding the cultural complexes of American blacks and whites by identifying and re-defining a psychological complex related to ethnicity. Original and insightful, this book provides a close reading of Jung's complexes theory with an Africanist

perspective on raciality and white/black racial relationships. Brewster explores how racial complexes influence personality development, cultural behavior and social and political status, and how they impact contemporary American racial relations. She also investigates aspects of the racial complex including archetypal shadow as core, constellations and their expression, and cultural trauma in the African diaspora. The book concludes with a discussion of racial complexes as a continuous psychological state and how to move towards personal, cultural and collective healing. Analyzing Jung's work with a renewed lens, and providing fresh comparisons to other literature and films, including *Get Out*, Brewster extends Jung's work to become more

inclusive of culture and ethnicity, addressing issues which have been left previously unexamined in psychoanalytic thought. Due to its interdisciplinary nature, this book will be of great importance to academics and students of Jungian and post-Jungian studies, sociology, politics, history of race, African American studies and African diaspora studies. As this book discusses Jung's complexes theory in a new light, it will be of immense interest to Jungian analysts and analytical psychologists in practice and in training.

Ideological Possession and the Rise of the New Right Polity

This book of expert essays explores the concept of the whole as it operates within the psychology of Jung, the philosophy of Deleuze, and selected

areas of wider twentieth-century Western culture, which provided the context within which these two seminal thinkers worked. Addressing this topic from a variety of perspectives and disciplines and with an eye to contemporary social, political, and environmental crises, the contributors aim to clarify some of the epistemological and ethical issues surrounding attempts, such as those of Jung and Deleuze, to think in terms of the whole, whether the whole in question is a particular bounded system (such as an organism, person, society, or ecosystem) or, most broadly, reality as a whole. Jung, Deleuze, and the Problematic Whole will contribute to enhancing critical self-reflection among the many contemporary theorists and

practitioners in whose work thinking in terms of the whole plays a significant role.

The Darkening Spirit John Wiley & Sons Introduces readers to the modes of literary and cultural study of the previous half century *A Companion to Literary Theory* is a collection of 36 original essays, all by noted scholars in their field, designed to introduce the modes and ideas of contemporary literary and cultural theory. Arranged by topic rather than chronology, in order to highlight the relationships between earlier and most recent theoretical developments, the book groups its chapters into seven convenient sections: I. Literary Form: Narrative and Poetry; II. The Task of Reading; III. Literary Locations and Cultural Studies; IV. The

Politics of Literature; V. Identities; VI. Bodies and Their Minds; and VII. Scientific Inflections. Allotting proper space to all areas of theory most relevant today, this comprehensive volume features three dozen masterfully written chapters covering such subjects as: Anglo-American New Criticism; Chicago Formalism; Russian Formalism; Derrida and Deconstruction; Empathy/Affect Studies; Foucault and Poststructuralism; Marx and Marxist Literary Theory; Postcolonial Studies; Ethnic Studies; Gender Theory; Freudian Psychoanalytic Criticism; Cognitive Literary Theory; Evolutionary Literary Theory; Cybernetics and Posthumanism; and much more. Features 36 essays by noted scholars in the field Fills a growing need for companion books that can

guide readers through the thicket of ideas, systems, and terminologies Presents important contemporary literary theory while examining those of the past The Wiley-Blackwell Companion to Literary Theory will be welcomed by college and university students seeking an accessible and authoritative guide to the complex and often intimidating modes of literary and cultural study of the previous half century. The Cultural Complex Other Press, LLC This groundbreaking book was seeded by the first-ever joint Jung-Lacan conference on the notion of the sublime held at Cambridge, England, against the backdrop of the 100th anniversary of the outbreak of the Great War. It provides a fascinating range of in-depth psychological perspectives on aspects of

creativity and destruction inherent in the monstrous, awe-inspiring sublime. The chapters include some of the outcrop of academic and clinical papers given at this conference, with the addition of new contributions that explore similarities and differences between Jungian and Lacanian thinking on key topics such as language and linguistics, literature, religion, self and subject, science, mathematics and philosophy. The overall objective of this vitalizing volume is the development and dissemination of new ideas that will be of interest to practising psychoanalysts, psychotherapists and academics in the field, as well as to all those who are captivated by the still-revolutionary thinking of Jung and Lacan. [A Jungian Perspective on Culture and Race](#) Princeton University Press

Edited by Murray Stein and Thomas Arzt, the essays in the series Jung's Red Book for Our Time: Searching for Soul under Postmodern Conditions are geared to the recognition that the posthumous publication of *The Red Book: Liber Novus* by C.G. Jung in 2009 was a meaningful gift to our contemporary world. The Red Book can be considered as a contribution to the "Golden Chain" (*aurea catena*) of the world's imaginative literature reaching back to the ancient Sumerian Epic of Gilgamesh. As Jung describes this tradition in a letter to Max Rychner, "Faust is the most recent pillar in that bridge of the spirit which spans the morass of world history, beginning with the Gilgamesh epic, the I Ching, the Upanishads, the Tao-te-Ching, the fragments of Heraclitus, and continuing

in the Gospel of St. John, the letters of St. Paul, in Meister Eckhart and in Dante." The Red Book extends the "Golden Chain" into our era. Each of the 18 essays in this third volume of the series, Jung's Red Book for Our Time, is unique, and all of them converge on the central theme of the relevance of The Red Book for people today in search of soul under postmodern conditions. This is the third volume of a multi-volume series set up on a global and multicultural level and includes essays from the following distinguished Jungian analysts and scholars:

Changemakers (RLE: Jung) Chiron Publications

Jung, Psychology, Postmodernity explores points of confluence and, more often, contradictions between Jungian

and postmodern ideas. Throughout the book Raya Jones examines how personal meaning emerges in human activity. Jung addressed this in terms of symbol formation, with particular attention to dreams, myths, art and other fantasy productions. Postmodern psychologists tend to address issues of meaning in terms of peoples self-understanding and identity construction, with a focus on self-positioning in actual conversation or on autobiographical narratives. Jones draws a line of critical comparison between postmodern psychology and Jung's descriptions of the symbolic dimension, myth, and the structure of the psyche. The book culminates with an evaluation of Jung's psychic energy concept, for which there is no direct counterpart in postmodern psychology.

Jung, Psychology, Postmodernity is an original critique of two key moments in the history of psychology. It will be welcomed by Jungians, as well as psychotherapists, and students of psychology.

Post-Jungian Perspectives on Women and Humour in Popular Culture Routledge

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human

psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist

notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. The image of Kali appearing in the color insert following page 44 is © Maitreya Bowen, reproduced with her permission, maitreyabowen@yahoo.com.

The Black Sun Routledge
Christian Ethics and Commonsense
Morality goes against the grain of

various postmodern approaches to morality in contemporary religious ethics. In this book, Jung seeks to provide a new framework in which the nature of common Christian moral beliefs and practices can be given a new meaning. He suggests that, once major philosophical assumptions behind postmodern theories of morality are called into question, we may look at Christian morality in quite a different light. On his account, Christian morality is a historical morality insofar as it is rooted in the rich historical traditions of the Christian church. Yet this kind of historical dependence does not entail the evidential dependence of all moral beliefs on historical traditions. It is possible to argue for the epistemic autonomy of moral beliefs, according to

which Christian and other moral beliefs can be justified independently of their historical sources. The particularity of Christian morality lies not in its particular historical sources that also function as the grounds of justification, but rather in its explanatory and motivational capacity to further articulate the kind of moral knowledge that is readily available to most human beings and to enable people to act upon their moral knowledge.

A Jungian Perspective on Sibling Position and the Family Atmosphere Chiron Publications

What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with

many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory

of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.

The Racial Complex Routledge

This book explores C.G. Jung's complex relationship with Friedrich Nietzsche through the lens of the so-called 'visionary' literary tradition. The book connects Jung's experience of the posthumously published *Liber Novus* (*The Red Book*) with his own (mis)understanding of Nietzsche's *Zarathustra*, and formulates the hypothesis of Jung considering *Zarathustra* as Nietzsche's *Liber Novus* -- both works being regarded by Jung as 'visionary' experiences. After exploring some 'visionary' authors often compared

by Jung to Nietzsche (Goethe, Hölderlin, Spitteler, F. T. Vischer), the book focuses upon Nietzsche and Jung exclusively. It analyses stylistic similarities, as well as explicit references to Nietzsche and *Zarathustra* in *Liber Novus*, drawing on Jung's annotations in his own copy of *Zarathustra*. The book then uses *Liber Novus* as a prism to contextualize and understand Jung's five-year seminar on *Zarathustra*: all the nuances of Jung's interpretation of *Zarathustra* can be fully explained, only when compared with *Liber Novus* and its symbology. One of the main topics of the book concerns the figure of 'Christ' and Nietzsche's and Jung's understandings of the 'death of God.'

Remaking Men Routledge

Stanton Marlan brings together writings

which span the course of his career, examining Jungian psychology and the alchemical imagination as an opening to the mysteries of psyche and soul. Several chapters describe a telos that aims at the mysterious goal of the Philosophers' Stone, a move replete with classical and postmodern ideas catalysed by prompts from the unconscious: dreams, images, fantasies, and paradoxical conundrums. Psyche and matter are seen with regards to soul, light and darkness in terms of illumination, and order and chaos as linked in the image of chaosmos. Marlan explores the richness of the alchemical ideas of Carl Jung, James Hillman, and others and their value for a revisioning of psychology. In doing so, this volume challenges any tendency to literalism

and essentialism, and contributes to an integration between Jung's classical vision of a psychology of alchemy and Hillman's Alchemical Psychology. C.G. Jung and the Alchemical Imagination will be a valuable resource for academics, scholars, and students of Jungian and post-Jungian studies, Jungian analysis, and psychotherapy. It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training.

Toward Postmodern Psychoanalysis
Routledge

C. G. Jung has been and continues to be a pervasive yet often unacknowledged presence in twentieth-century art and intellectual life. This timely volume is the first comprehensive attempt to assess this presence and to demonstrate Jung's

far-reaching cultural impact. The distinguished contributors represent a number of views, from traditional Jungian to the most contemporary post-Jungian stances, including feminist, non-Jungian, and anti-Jungian positions. Jung, as seen in this volume, addresses a wide range of contemporary issues related to creativity, gender, religion, popular culture, and hermeneutics. The essays reveal dimensions of his work that extend far beyond psychoanalytical theory and that show his hermeneutics to be a much more subtle and sophisticated methodology than previously allowed by his critics. This methodology appears, in fact, to have anticipated significant aspects of contemporary critical principles and practice. The contributors to the volume

were among the participants in a major international conference sponsored by Hofstra University and the C. G. Jung Foundation of New York, held in 1986 at Hofstra University. They include Thomas Belmonte, Robert Bly, Joseph Campbell, Edward S. Casey, Stanley Diamond, Jean Erdman, Leslie Fiedler, James Hillman, Paul Kugler, Ibram Lassaw, Neil Levine, David L. Miller, Lucio Pozzi, Gilles Quispel, Robert Richenbourg, Carol Schreier Rupprecht, Andrew Samuels, Harold Schechter, and June Singer. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of

these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Alchemy and Art of Darkness
Routledge

Although alchemy is popularly regarded as the science that sought to transmute base physical matter, many of the medieval alchemists were more interested in developing a discipline that would lead to the psychological and spiritual transformation of the individual. C. G. Jung discovered in his study of alchemical texts a symbolic and imaginal language that expressed many of his

own insights into psychological processes. In this book, Marie-Louise von Franz examines a text by the sixteenth-century alchemist and physician Gerhard Dorn in order to show the relationship of alchemy to the concepts and techniques of analytical psychology. In particular, she shows that the alchemists practiced a kind of meditation similar to Jung's technique of active imagination, which enables one to dialogue with the unconscious archetypal elements in the psyche. Originally delivered as a series of lectures at the C. G. Jung Institute in Zurich, the book opens therapeutic insights into the relations among spirit, soul, and body in the practice of active imagination.

Jung's Nietzsche Routledge

Why do leading political figures arise

when they do? Does sibling position determine political destiny? Originally published in 1992, a leading Jungian analyst at the time, Louis Stewart wrote an intriguing study of the influence of family and sibling position on the destiny of the individual and on the future of society. He shows how the four basic sibling positions are related to corresponding styles of political

leadership, and uses examples of US presidents and UK prime ministers to illustrate his point. Stewart argues that world leaders owe their pre-eminence to a matching of political zeitgeist with sibling position within the family and he provides fascinating and persuasive material on major political figures, including Hitler, Saddam Hussein, Gorbachev, Stalin and Ghandi.
