For those who think--or dream--of opening a restaurant, this book is a must read. Author Ron Salisbury started out running his parents' venerable Los Angeles landmark El Cholo (founded 1923) and went on to successfully own and operate eight more popular Southern California restaurants over the ensuing decades. The author offers up his experience on how to not just survive, but thrive, in a fickle and competitive business. Want to know why you shouldn't waste money on advertising? Why you should always check in with the dishwasher? How not to lose \$10,800 in annual sales? The role that women play in restaurant selection? It's all here, written in short readable vignettes with Salisbury's incisive wisdom and wit. He guarantees that at least one idea will more than save you the cost of the book, repeatedly. More than a restaurant manual, the book is filled with universal insights into good business practices. And diners in search of a great restaurant experience will appreciate Salisbury's insights into what gets people to return to their favorites.

WITH NEW ANALYSIS OF HBS AND THE FINANCIAL CRISIS When Philip Delves Broughton abandoned his career as a successful journalist and enrolled in Harvard Business School's prestigious MBA course, he joined 900 other would-be tycoons in a cauldron of capitalism. Two years of Excel shortcuts and five hundred of HBS's notorious business case studies lay ahead of him, but he couldn't have told you what OCRA was, other than a vegetable, or whether discount department stores make more money than airlines. He did, however, know that HBS's alumni appeared to be taking over the world. The US president, the president of the World Bank, the US treasury secretary, the CEOs of General Electric, Goldman Sachs and Proctor & Gamble - all were bringing HBS experience to the way they ran their banks, businesses and even countries. And with the prospect of economic enlightenment before him, he decided to see for himself exactly what they teach you at Harvard Business School. Philip Delves Broughton's hilarious and enlightening account of his experiences within Harvard Business School's hallowed walls provides an extraordinary glimpse into a world of case study conundrums, guest lectures, Apprentice-style tasks, booze lugging, burn-outs and high flyers. And with HBS alumni heading the very global governments, financial institutions and FTSE 500 companies whose reckless love of deregulation and debt got us into so much trouble, he discovers where HBS really adds value - and where it falls disturbingly short.

During medical training there are certain tasks that are not taught at medical school nor in the common reference books. There are some skills that medical students are expected to learn by 'osmosis'. These skills are never officially taught or examined in medical school, but are, however, a fundamental part of being a safe, good and efficient doctor. This book includes 'golden rules' or important points to remember and case examples, both of which are given as displayed extracts. This book will help the junior doctor unlock their potential and improve their performance, cutting the time it takes to achieve certain medical objectives. It is meant to fill in the gaps where the medical school and clinical guides stop. It gives the reader the information needed to organise themselves so that they can hit the ground running. It is not intended as a clinical survival guide, but more a friendly hand to allow the reader to get ahead in medicine and how to keep on track and develop a career path.

Your graduate work was on bacterial evolution, but now you're lecturing to 200 freshmen on primate social life. You've taught Kant for twenty years, but now you're team-teaching a new course on ÖEthics and the Internet.Ó The personality theorist retired and wasn't replaced, so now you, the neuroscientist, have to teach the "Sexual Identity" course. Everyone in academia knows it and no one likes to admit it: faculty often have to teach courses in areas they don't know very well. The challenges are even greater when students don't share your cultural background, lifestyle, or assumptions about how to behave in a classroom. In this practical and funny book, an experienced teaching consultant offers many creative strategies for dealing with typical problems. How can you prepare most efficiently for a new course in a new area? How do you look credible? And what do you do when you don't have a clue how to answer a question? Encouraging faculty to think of themselves as learners rather than as experts, Therese Huston points out that authority in the

classroom doesn't come only, or even mostly, from perfect knowledge. She offers tips for introducing new topics in a lively style, for gauging students' understanding, for reaching unresponsive students, for maintaining discussions when they seem to stop dead, and -yes- for dealing with those impossible questions. Original, useful, and hopeful, this book reminds you that teaching what you don't know, to students whom you may not understand, is not just a job. It's an adventure.

You went to school and you learned about various subjects. You learned about math, science, history, how to read and write along

with other things. Wonderful! However, what the school system neglected to teach you about is the subject of MONEY. They never taught you what money truly represents; where it comes from, how to manage it, how to invest it and how to save it. Sure they may have reviewed some of the basics, but of course that wasn't enough and as a result you fail at the money game. You don't know how to save or invest and you are over leveraged on your credit cards. In fact according to statistics the average U.S. household credit card debt stands at \$15,185 with 45 million Americans having outstanding balances of \$10,000 or more. Practically all of these people went through the school system yet they are financially in trouble and in debt because they were never truly taught about money in school. In his book entitled "What They Didn't Teach You in School About Money" Omar Johnson gives you the necessary information that will enable you to overcome your money ignorance. You will learn how to manage your money, how to invest and save it, how to make more of it and much much more.
