Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

The first comparative grammar of the Semitic languages, by H. Zimmern, was published a hundred years ago and the last original work of this kind was issued in Russian in 1972 by B.M. Grande. The present grammar, designed to come out in the centenary of the completion of Zimmern's work, fills thus a gap. Besides, it is based on both classical and modern Semitic languages, it takes new material of these last decades into account, and situates the Semitic languages in the wider context of Afro-Asiatic. The introduction briefly presents

the languages in question. The main parts of the work are devoted to phonology, morphology, and syntax, with elaborate charts and diagrams. Then follows a discussion of fundamental questions related to lexicographical analysis. The study is supplemented by a glossary of linguistic terms used in Semitics, by a selective bibliography, by a general index, and by an index of words and forms. The book is the result of twenty-five years of research and teaching in comparative Semitic grammar.

 Here is a reprint of the English-Pali Dictionary by A.P. Buddhadatta Mahathera published long ago by the Pali Text Society in Roman script. This publication was then considered a notable event in the life of the Society for it was a great improvement on a similar earlier work by Venerable W. Piyatissa whose usefulness was reduced for the English-speaking readers by the Pali words being given in Sinhalese script. This is a considerably enlarged form of a concise English-Pali Dictionary compiled by the present author during the second World War. The author has coined many new words and has given

more than one Pali word for some English verbs which do not exist in the ancient languages like Pali. This dictionary, though not an exhaustive one, has proved much useful to the scholars of the Pali language as it presents well chosen material in a single volume of a manageable size. (by the same author) **CONCISE PALI-ENGLISH DICTIONARY** - This Concise Pali-English Dictionary has been prepared mainly for use by students in schools and colleges. The author is not only an eminent Elder of the Buddhist Order but one of the leading Pali scholars recognized both in the East and West as an authority on the subject. It is to be observed that the author has kept more or less to the traditional sense of words while not altogether ignoring the meanings given by western scholars in their translations and lexicons. Many errors in the latter sources have also been rectified. But the basic sense adopted is in nearly every instance the traditionally accepted meaning in accord with the commentaries and the glossaries. This perhaps is of special value to beginners as thereby they get introduced to the indigenous tradition, thus providing a useful basis on which to build up a more scientific knowledge as the study advances.

Upon its publication in 2002, Josef Tropper's *Altäthiopisch: Grammatik des Gəʿəz mit Übungstexten und Glossar* was quickly recognized as the best modern grammar of Classical Ethiopic in any

language. Now Eisenbrauns makes Tropper's grammar available for the first time in English, in this revised and expanded edition by Josef Tropper and Rebecca Hasselbach-Andee. Gəʿəz literature is diverse and of major importance for the study of early Christianity, Judaism, and the history of eastern Africa. The language of this rich literature, however, has been difficult to access until now. Designed to help language learners acquire competency with the script from the start, Classical Ethiopic provides a comprehensive treatment of Gəʿəz grammar, with detailed chapters on the language's writing system, phonology, morphology, morphosyntax, and syntax. Numerous example sentences illustrate the grammatical concepts discussed, and each example is presented in Ethiopic script, transliteration, and English translation. The grammar concludes with an appendix presenting sample texts to be used as exercises, an English-Gəʿəz glossary, and an updated bibliography that takes into account the developments that have occurred in the study of Gəʿəz in the nearly two decades since Tropper's original publication. Appropriate for the classroom and for independent study, Classical Ethiopic is sure to become the standard reference in English for the study of the language. *Selected Comparative-historical Afrasian Linguistic Studies* K G Saur Verlag GmbH & Company

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts

and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Few images are as evocative as the silhouette of the Arab dhow as, under full sail, it tacks to windward on glittering waters of Red Sea before moving across the face of the rising or setting sun. In this authoritative new book, Dionisius A. Agius, one of the foremost scholars of Islamic material culture, offers a lucid and wide-ranging history of the iconic dhow from medieval to modern times. Traversing the Arabian and African coasts, he shows that the dhow was central not just to commerce but to the vital transmission and exchange of ideas. Discussing trade and salt routes, shoals and wind patterns, spice harvest seasons and the deep and resonant

connection between language, memory and oral tradition, this is the first book to place the dhow in its full and remarkable cultural contexts.

This book is designed to cover one year's work in Hebrew leading up to a full understanding of the language. It has been used by the author with his students for many years and the published text is the result of testing and refining over these years. Every attempt has been made to make the grammar clear and simple. For example, all Hebrew words are transliterated, as well as being given in the original for the first three-quarters of the book. The grammatical discussion is made as unsophisticated as possible for it is the author's intention that this book should also be of use to those who study Hebrew without a teacher.
